Any ordinary Hot Air Furnace will produce heat if you will only supply enough fuel. The "Kelsey" has several special and valuable features but most important is that it will give more heat with less fuel and is the most durable heater made.

The "Kelsey" fire pot being constructed of several upright, tubular, corrugated, east iron sections (see cut) around which the fire passes and up through which the cold air passes while being heated, and this entire section being wrapped with a heavy steel casing which becomes heated by the fire striking it when passing down outside of upright sections towards smoke pipe, it in turn warms the air that passes up between this steel casing and the galvanized iron casing, this explains why the "Kelsey" has three times more radating surface and warm air capacity than an ordinary Furnace. The "Kelsey" heats every room evenly, wheresoever located, with a pice, mill, bealthful warm air that will not injure your fermine. The "Kelsey" will heat rooms 60 feet

distant.
The "Kelsey" does not heat your celler

Septemper. We are drinking the wine of the ages, From cups that are brimming over With the sweet of a honey unbought with

money, Distilled from the heart of the clover. The flowers afringe on the way side Are in raiment of purple and gold; To the rough hewn edge of the old stone ledge The clinging brier yines hold.

We are breaking life's fine elixir In the waft of the perfumed breeze, The sudden showers, the sunlit hours, The rustle of Isaves on the trees,

The fathomiess blue of the heaven, The beauty and bloom of the day, Are making us young—they are waking the tongue Of the years that have passed away.

Tis the radiant rare September, With the cluster rips on the vine, With scents that mingle in splcy tingla On the hill slope's glimmering line.

Hidden Foes.

The daily Examiner of Wednesday, Sept. 2nd, contains the following:— To RETAIN REV. J. J. RAE.—A compli-ment was paid to the efficient work and pularity of Rev. J. J. Rae, pastor of Charlotte street methodist church, last night. At a regular meeting of the official quarterly board of the church held last night, the following resolution was

unanimously passed:

Moved by Mr. M. A. Morrison, and seconded by Mr. Joseph Batten, and resolved: That this quarterly official board of the Charlotte street methodist church assembled in its first regular board meeting of this conference year, desires to place on record its high appreciation of the services rendered our church during the past two years by our pastor, the Rev. J. J. Rae, and we feel that the work so successfully carried thus far will vield greater results if the pastoral term of Mr. Rae be extended to a fourth year. We therefore take this opportunity of extending a hearty invitation the Rev. Mr. Rae to remain our pastor for a fourth year, and trust that he as well as the stationing committee may comply with

our request. The vote was by ballot, and of the sixteen members who were present, every one cast his ballot for the retention of the services of Rev. Mr. Rae for a fourth year on the expiry of his present three years' term. The board is thoroughly representative of the congregation, who will no doubt as unanimously endorse the spirit of the resolution as the board passed it. And not only the congregation but the citizens generally, will also cast their vote to retain as long as possible a pastor, who not only by his eloquent preaching, but by his discharge of the duties of citizenship, has endeared himself to every class of the community. When the action of the board was made known to Rev. Mr. Ras he asked two weeks' time for consideration, and accordingly his answer to the resolution will be made at an adjourned meeting of the board to be held a fortnight hence.

A VERY SAD ACCIDENT .- A most distressing occurrence happened here on Monday. The noon train was coming down from the north at 12,30, and when it turned the curve at the round house the driver noticed a little child on the track at the cowbridge north of Mary street. He clapped on the air brakes, and screamed the whistle for the brakesman to do likewise. As a result the train was held up very quickly, but not until the locomotive had passed over the the average this season. Turnips and child, cutting off one of its legs below the knee, and tearing away the flesh to the thigh. The poor little sufferer proved to be the two year-old child of Brakesman Greenbury, and doubtless it was making its way to the round house to meet its father when the train would come in. It was a sight that melted the hearts of all who saw it to see the mutilated babe in its suffering condition. Drs. Eastwood and Bogart were called, and found it necessary to amputate the leg between the thigh and the knee.

A MELANCHOLY DEATH. - Wm. J. Jewell, aged 28 years, son of James Jewell, tenant on Mr. H. W. Wilcox's farm, east of this town, has been in poor cursions to the northwest. He consulted a doctor at Toronto and was ordered to return home here. The young man came back very dispondent, and on Tuesday decided to go down to the lake shooting. He came down to town and procured ammunition, and went south from his father's residence. He did not return on Tuesday night, and on Wednesday morning his father went south to see what had become of him. Down in the ravine south of the house he found the young man's body lying dead. It was evident that despondency and bad health had resulted in temporary aberration, and the poor young fellow had taken his own life with the gun. Coroner Carson was summoned, and after learning all the particulars of the case decided that an inquest was unnecessary. The young man's body was interred at the union cemetery yesterday atternoon. The Obronicle tenders to Mr. and Mrs. Jewell its heartfelt sympathy in this very trying case.—Chronicle, August 28.

Assault,-An Italian named Barsoddi is undergoing a sentence of 30 days in the Minden gaol, having been convicted before Police Magistrate Fielding of assaulting Mr. Pusey. It appears the prisoner and seven other Italians stood on the track of the I B. & O. railway on the approach of the "pup," a small sugine sometimes used on that road. They were expecting the president along the line and wished an interview, which they obtained in this way, and Barsoddi, acting as spokesman for the party, undertook to use a club as an interpreter, to which the president naturally enough objected, and prosecuted him for assault with above results.

HART-MOORE.-A large and happy crowd assembled at the residence of Mrs. Damion, Prospect Point, Stanhope, on Wednesday evening, to witness the marriage of her daughter, Miss Maggie Moore, to Mr. G. P. Hart, storekeeper, Carnarvon. The knot was tied by Rev. J. R. Peake, of Minden. Miss Susian Hart, sister of the groom, acted as bridesmaid, while Rev. Enoch Cook assisted the groom. After the ceremony the party sat down to an elaborate spread, to which ample justice was done. The happy couple left Thursday morning for Toronto on their honeymoon, carrying with them the besh wishes for future happiness of all their friends.- Echo.

The Habit of Being Ready.

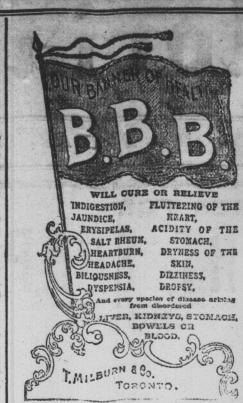

You may call it what you like-pre sence of mind, a cool head, quick think ing, or an instinct to do what is right the first time-the fact remains that it is a habit acquired by experience, of being ready always to use one's muscles and brains at a moment's notice—the habit of being ready.

When you are on your wheel and a tangle is ahead, what do you do? What is a natural thing to do? Get off and walk aside. When you are in a boat health all summer, and recently went to and a flaw comes against the sail, what Toronto to take in one of the harvest ex. | do you do? What is a reasonable thing to do? Let the sheet and sail go where the flaw cannot come against it. When to the ground on the hands. What do you do when a man stops you for the purpose of robbing you or for one thing or another? Do the reasonable thing; crawl on the floor, because smoke always rises and you can breathe far better. If you must go through flames, pour water over yourself before starting. If the undersow in the surf catches you and carries you out, do the reasonable thing; float—swimming is useless. By floating you will keep above water, and in a moment somebody will come in a boat. Year after year women and children drown within twenty yards of a hundred drown within twenty yards of a nuddred people. Why? Because the average unpractised person is paralyzed quite long enough to allow the struggling to drown. Then every one does the right thing, and rushes for the life-beat ten feet away—too late. So we might go on for a week. The particular case is unimportant. It suffices you not if you know what to do and do not have the power to do it. Asquire the not have the power to do it. Acquire the habit of responsibility and prompt action by putting yourself in situations that require this, and when you have acquired the habit of being ready, you are pretty sure of doing something that is reasonable in an emergency when it arises, even if you are not primed with all the knowledge of this particular case.—Harper's Bazar.
