Take a modern interpretation of the parable. There is no cooking without fire. In cooking overta. ked, the bowels become clogged, they cannot dispose of the food that is given them. The impuristes back up on the liver. Then comes the vultures—the torments of a deceased liver. A serious question has arisen at Oshawa. An issuer of marriage licenses there has been selling licenses for 20 years past his only authority being a notice that he had been appointed an issuer of such licenses. He holds no offical commission. In a receent law suit, the point was raised that he could not issue legal licenses, and this view is likely to be sustained. It follows therefore that all the licenses issued in 20 years are illegal and yoid, and will put people married on such licenses in an uccomfortable position.

Bowmanville schools adopted vertical writing over a year ago and many pupile have acquired the art to a remarkable degree. The special advantages may be briefly stated as follows; 1. It is more legible than a slanting hand, and, this covers more than half of all that is really valuable in writing. 2 It is more hygenic, favoring a much bester writing posture, and being much easier for the eyes of both pupil and teachers. 1. It is more easily learned, and hence more easily taught. For tittle children it is especially easy. 4 It is more rapid especially when legibility is taken into consideration, as well as speed.

For a good, everyday household angel give us the woman who laughs. Her pastry may not always be just right, and she may occasionally burn her bread and torget to replace missing buttons, but for solid comfort all day and every day, she is a paragon.
