The Little Dead Scholar

Written for The Warder by Thos. C. Robson,

He came in the spring, 'ere the snow drop Had opened its tiny flowers, Ere the ice on the lake had melted-This little dead schoolmate of ours.

Ie was small, but smart as a cricket, Timid at times, and full of fears. only from his fine striped jacket Could you tell the ripeness of his years.

school he was both late and early. And then, he did not come to stay, For when the boys grew very noisy. Why, he would just up and away.

At his lessons he was quite perfect, And from his tiny form or self, Of love, of faith, of gratitude He could teach the teacher himself.

But one day early in autumn. He was nibbling a piece of bread, When a careless foot just touched him, [And there, our poor chipmonk lay dead.

On the warm south bank of the school The girls made him a bed of flowers, and laid him to sleep in the sunshine,

This little dead schoolmate of ours. The little ones whispered together
As they put by his dinner bowl,

He has gone to play with our sisters In the far-away land of the soul. A Great Book Free!

When Dr. R. V. Pierce, of Buffalo, N. Y., published the first edition of his great work, The People's Common Sense Medical Adviser. he announced that after 680,000 copies had been sold at the regular price, \$1.50 per copy, the profit on which would repay him for the great amount of labor and money expended in producing it, he would distribute the next half million free. As this number of copies has already been sold, he is now giving away, absolutely free, 500,00 copies of this most complete, interesting and valuable common sense medical work ever published—the recipient only being required to mail him, at the above address, 31 one-cent stamps, to remedy." Sold by P. Morgan.—71-1. the above address, 31 one-cent stamps, to cover cost of mailing only, and the book will be sent post paid. It is a veritable medical library, complete fn one volume. Contains 1008 pages, profusely illustrated. The free addition is precisely the same as that sold at \$1.50 except only that the books are in strong manilla paper covers instead of cloth. Send now before they all are givan away.

Foods from Canada for Great Britain.

The English are good customers for food products. They eat as a matter of business: and as everybody knows are diligent in business. They are the customers of all nations who produce a surplus of estable things. If one looks over the map of the world and examines the returns of the British board of trade, he will find nearly every civilized country a competitor for a share in the British markets. Denmark, Germany, France, the United States, and all the rest of them, are engaged in a strenuous and merciless, though peaceful, competition for the place of favoured waiter to furnish her tables. The food account of Great Britain for

twelve of the chief articles which she imported in 1895 was a stupendous one, as the following table shows:

ARTICLES.	VALUE.	
Wheat, barley, oats, flour, etc.	241,986,692	
Animala, living (for food)	43,635,759	
Dressed meats	114,109,534	
Oheese	22,752,299	
Butter	69,326,786	ı
Eggs	19,483,437	ı
F18h	14,495,226	
Fruit, raw	23 680,290	
Lard	14,317,446	ı
Milk, condensed or preserved	5,273,320	
Potatoes	5,693, 62 0 2,945,112	
Donlan and came		

Of these foods Canada may in time supply the largest share. Forty-five per cent. of the population of Canada are engaged in rural occupations, practically in producing foods. Twenty eight and a half millions of acres are under cultivation; and now that cold storage is to be provided for the carriage of fine tood products in an undeteriorated condition o Great Britain, the supply of them may be enormously increased. This question is one of interest to all who are concerned for the permanent integrity and stability

of the empire.-The Flag. Game of Grab.

The Toronto papers have been having a great time for the past month discussing a dim the glory of having persuaded a British municipal grab attributed to Mayor R. J. premier to change his mond. We have made Fleming. About six weeks ago the city a pretty large claim to supervisory jurisdiction council eat till the we sma hours one night. Fleming. About six weeks ago the city council sat till the we sma' hours one night, and after the spectators had left a grant of \$500 was made to Mayor Fleming to recompense him for cutlays in charity. The reperters were asked not to give the item to the public lest the mayor might be worried to death by fakir mendicants wanting a share of the council state of the ot the \$500, and nothing was known of the transaction until the ever watchful Ex- Ald. E. A. Macdonald got wind of it. and applied to the courts for an injunction to restrain the city@treasurer from paying over the money. The items began to appear enowing that Mayor Fleming had contemplated a trip to the B O. rieming had contemplated a trip to the B C. mines, and people put that and that together and concluded that the \$500 grant was made to pay the mayor's trip to Rossland. They raised an awful talk, and upon the head of it Mayor Fleming took high ground, refusing to become "custodian" of the "fund" thus created for charity. Considering that the city pays its mayor \$3600 as salary, and this extra grab for the suspected purpose of seeing the grab for the suspected purpose of seeing the

A Useful Cement.

An excellent cement for mending almost anything may be made by mixing together litharge and glycerine to the consistency of thick cream or fresh putty. The cement is useful for mending stone jars or any coarse earthenware, stopping leaks in seams of tin or wash boilers, cracks and holes in iron kettles etc. It may also be used to fasten on lamp tops, or tighten loose bolts whose nuts are lost, to tighten loose joints of wood or trop, and in many other ways about the various kitchen utensils. In all cases the article mended should not be used until the cement will harden when it resist the action of water. hot or cold, acids, and almost any degree of

How to Keep Winter Apples.

Oftentimes we hear complaints that winter apples are spoiling in the early part of the wincer. The reason of it is that they are kept in too warm quarters. Apples should be kept in a cool, dry place; at a temperature of 20°, if possible, and will keep better in closed barrels kept on their side, elevated from the floor to permit the air to circulate all around. Barrels that are opened for use are also better standing elevated from the floor and kept covered from the air. Scabby apples are better kept out of the barrels and apread out in a dry place. In opening a barrel of apples for use it is advisable to open the bottom to use from first, as the pressing process squeezes the apples at the bottom, which is the end that is pressed and will not keep as long as the faced end, which is placed in carefully by hand, stems downward, and where the choicest apples are generally put in order to protect them from the press.

SAD COMPLAINTS.

Ladies Must Protect Themselves.

Several ladies have recently written to the manufacturers of Diamond Dyes complaining of having received very worth-less dyes from certain dealers (whose names are known) instead of the Diamond Dyes that were asked for.

The manufacturers of Diamond Dyes. while they deplore this unwise and dishonest practice of substituting, cannot give any greater protection to the public than they are now affording in the way of warnings through the columns of the

All buyers of dyes who ask for the Diamond Dyes should look for the name on the outer envelope. If the name "Diamond" is not seen, rest assured you are being offered some miserable imitation, Diamond Dyes are the only perfect dyes in the world for home dyeing. The

best druggists and dealers sell them.

Acute Sufferings From Acute Rheumatic Ailment Relieved by South American Rheumatic Cure When Hope Had Well-Nigh Gone-Mrs. W. Ferris, Wife of a Well-Known Manufacturer of Glencoe, Cheerfully Tells the Story of Her Cure. was about exhausted, I was induced to try relief, and after taking two bottles all pain had vanished and there has been no return

Lord Salisbury on Venezuela.

Lord Salisbury's announcement at the Lord Mayor's banquet that the Venezuelan dispute between this country and Great Britain was settled did not come as a surprise to this side of the water. Since the publication of the correspondence between Mr. Olney and Lord Salisbury on the subject of general arbitration, the triendly conclusion of the unpleasant discussion over Venezuela has been assumed by

American people, who are always optimists, especially as to their toreign affairs. So far as the Weekly is concerned, we have never imagined that war would issue out of the affair, or that Mr. Olney's blunt diplomacy would be deeply resented or ineffectual Granting that the manner in which the secretary of State put his demand, and that any interference in the controversy between Venezuela and Great Britain at all, are to be regretted, it must be admitted that Mr Olney has gained a decided triumph, and it is not to anything by yielding to the claim which this country championed. It would have greatly improved her position on this side of the water it she had long ago been more considerate of her international relations with American governments. Besides, in this affair with Venezuela there never was any doubt that her refusal to arbitrate the whole question was wrong. It was more than an obstinate refusal to acknwledge the claims of a smaller state; it was a confession, at least to all who were familiar with the case so far as it had then gone, that Great Britain intended to keep what she had taken so long as she could, without regard to the equities of Venezuela's claim. No one knew where the boundary line was, because, as we pointed out long ago, there never was a boundary line. Therefore the declination of Great Britain to submit to arbitration could possibly mean nothing but a contemptuous refusal to yield any point to small and weak a power as Venezuela. Now that Lord Saliabury has announced

that the case is settled, the president and Mr. Olney have not only accomplished their object, but they will receive that generous credit which the world always accords to success. Not many Americans will recollect the dispute as to our right to meddle with the matter, in view of the fact that Lord Salisbury has agreed to respond to the demands of Mr. Olney Whatever limitations there may be as to the subject of arbitration, we are sure that no trouble will arise from them. The rights of some British settlers, not only to their property, but to be governed by the laws of England, have been acknowledged by the United States, and Mr. Olney's clever proposition to apply the principle of prescription, leaving under British control such British settlements as have been for fifty years in their

possession, is perfectly satisfactory to Vens-There may come out of all this, as we have more than once intimated, that which will responsibility for the conduct of a state over which we have no control is quite another thing. - Harper's Weekly.

NO AVAIL.

Adam Soper of Burk's Falls Found All Remedies For Kidney Disease of No Avail Until He Used South American Kidney Cure—To-day He is a Well Man and Gives the Credit Where it is Due.

"For a long time I have been a great sufferer from disease of the kidneys. The pains I suffered were the severest. I had tried all kinds of remedies, but all to no avail. AN INCURABLE CURED.

AFTER TREATMENT IN CANADA'S BEST HOSPITAL HAD FAILED.

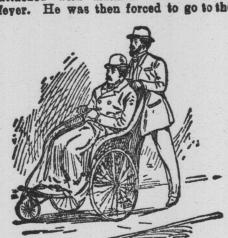

One of the Most Remarkable Cases on Record-Ten Years of Intense Suffer. ing From Acute Rheumatism-The

Whole Body Contracted and Out of Shape in Every Limb-Again Restored to Active Life. ?

From the Newmarkst Advertiser.

We suppose there is not a resident of Newmarket who does not know of his years of suffering and who has not heard of his release from a life of helplessness and pain through the medium of Dr. Williams' Pink Pills. Indeed we doubt if in the annals of medicine there is a more remarkable restoration than has been accomplished in Mr. Moffatt's case. and he deems it his duty to mankind to make the facts known through the columns of the Advertiser.

Ten years ago Mr. Moffatt was working the Newmarket hat factory. Through the influence of the damp room, and possibly some carelessness in regard to his health, he was attacked with a severe cold which eventually settled in his limbs. For some years he was an almost constant sufferer from rheumatic pains and spent much money in treatment for the trouble, but with no result beyond an occasional temporary release from pain. Finally to make matters worse he was attacked with malaria and rheumatic feyer. He was then forced to go to the

found that he was afflicted with torticollis (wry neck). During the first six mouths in the hospital he was under the treatment of the staff electrician, but the powers of electricity entirely failed, and after a consultation of physicians it was deemed advisable to perform an operation. Six weeks later a second operation was "I was for years a great sufferer from rheumatic affection in my ankles, and at times was so bad that I could not walk. I constitute the could not walk. I cessful only in so far as they afforded temporary relief. He remained in the tried every known remedy and treated with best physicians for years, but no permanent relief. Although my confidence in remedies hospital from November, 1890, till January, 1892, and with all the modern i South American Rheumatic Cure. I purchased a bottle. The very first dose gave me that well equipped institution no parmapotatices, says the American Agriculturist nent relief could be obtained. He was in its final report published this week. ficial, but instead he continually grew worse, and in March 1892, was again knew of his condition did not believe he bushels, a decrease of more than 50,000, had long to live. At this time every joint | 000 bushels, or 171 per cent. compared in his body was swollen and distorted, with a year ago. The total area harand he suffered the most excruciating agony. If a person walked across his bedroom it intensified the pain as though he was being pierced and torn with dian crop 55,300,000 bushels, a decrease and if touched he would scream of nearly 13,000,000 bushels compared aloud with agony. In this state of hope less suffering he remained bedfast for this side of the ocean and the smaller eighteen months, all the while using all manner of medicines from which relief Agriculturist thicks that the outlook for might be hoped for. Then he was put under the treatment of a celebrated Toronto specialist, but with no better result. After this last experiment failed, he determined to try Dr. Williams' Pink Pills, at the same time discontinuing all other treatment. At the end of three be denied that Great Britain will not lose months there was a very noticeable improvement in his condition, and so much so that his mother thought he could be lifted outside. He was still so weak, however, that he was only able to remain up a few minutes as before. When taken back to bed he telt a sudden tingling sensation going up from his toes and through his joints and spine. The next morning when he awoke the pain had left the body and lodged in the arms, and then for some weeks the pain flitted from place to place in the arms, and then disappeared, and he has not had a particle of pain since. All this time he was taking Dr. Williams' Pink Pills and slowly but surely regaining his strength. Then an invalid's chair was procured, and he was wheeled out, eventually he was able to wheel himself about. The continued use of the Pink Pills constantly added to his strength, and then the chair was discarded for crutches, and then the crutches for a cane. At this time (Sept. 1895), Mr. Moffat had so far recovered that he was a frequent contributor to the columns of the Advertiser and procuring a horse and buggy he was engaged as local reporter for the paper. The once utterly helpless invalid is now able to go about, and to get in and out of his buggy with out any assistance, and is at his post of duty whenever called upon.

Thus we find that after years of suffering and helplessness Dr. Williams' Pink
Pills have proved successful after all other
remedies and the best medical treatment had utterly failed. With such marvellous cures as this to its credit it is no wonder that Dr. Williams' Pink Pills is the most popular medicine with all classes throughout the land, and this case certainly justifies the claim put forth on its behalf hat it 'cures when other medicines fail.'

GENTS.—I was in very poor health for over four years; the doctor said it was constipation. Not wanting to spend too much cash I got three bottles of B. B. B. and took it regularly. I can certify that I am now in the very best of health and feel very grateful to B.B.B. Alfred Teroux, Montreal, Que.—63-tf The Wild Cherry combined with Milburn's Cod Liver Oil Emulsion makes it delicious in

taste and perfect in curative power. -68-4. As Well as Ever. DRAR SIRS,—After suffering for two years from acute indigestion I tried B.B.B. I took only three bottles, which made me as well as ever I was. I highly recommend B.B.B. to all dyspeptics. Mrs. John White, Austin. Man.—63-tf.

The High Commissioner Lauds
His Adopted Country.

London, Nov. 20 -Sir Donald A. Smith, Canadian high commissioner in London, delivered an address before the Newcastle geographical sciety to night upon the resources of the Daminion of Canada. The address embodied a comprehensive view of the progress of Canada since the landing of John Cabot on the coast of Newfoundland in 1497. and described the growth of her internal and nternational water and railway communicaions, her industries, agriculture, mining and

In conclusion Sir Donald said; "More advantages can be obtained by emigrants of the right class in Canada than in any other quarter of the world. Canada does not want anybody unless he has a capacity for hard work, energy and enterprise. Given these, nowhere can one realize so rapidly such great results. The Canadians are proud of their country and believe in it. They are proud of their connection with the mother country and constantly endeavoring to make their beloved Dominion not the least important in a family of nations all under one flag, which seems to be the ultimate destiny of the Empire.

A large audience was present and listened closely to Sir Donald's very interesting deecription of the Dominion and the work that has been done there. He was frequently Principal Gurney, who presided at the meeting, lauded Sir Donald's generosity, and a vote of thanks to the high commissioner was

Concerning Siates.

Perhaps the following may commend itself to the Lindsay school board:—The Indiana state board of health has prohibited the use of slates in its public schools. The reason advanced for this was that the slate, the saliva of the pupil and the slate pencil aided in conducting microbes. bacteria, microcosms, and animalcuit from one child to another. Hence the prevailance of contagious diseases in Indiana. Diptheria is apreading there and typhoid fever has its way in certain northern sections of that state. Whooping cough is also heard of. The slate and the slate pencil are said to be responsible for this. In Chicago the slate has been banished for a different reason; paper has taken its place. Paper is clean: pencile are cheap. Slates are expensive and awkward in handling. This is why they have been tabooed in Chicago. Thus a cherished necessity of childhood days gone by has commenced to go.

HEART'S HEALER.

Mrs. Mugger, Wife of Capt. Charles Mugger of Sydney, C.B., Got Relief in 30 Minutes From Heart Disease of Four Years' Standing, and Declares She Owes Her Life to Dr. Agnew's Cure For the Heart, "It affords me great pleasure to commend Toronto general hospital when it was afflicted with heart trouble, accompanied with dizziness, palpitation and smothering tensations. For over four years I was treated by best physicians, and used all remedies known to man. I determined to try Dr. Agnew's Cure for the Heart. The first dose gave me great relief inside of thirty minutes. I used two bottles, and feel to-day I have been completely cured. Sold by P. Morgan.

The Potato Orop of 1896. A smaller acreage and a decreased rate of vield are resulting in a decidedi was the crushing crop of 1895. The crop now being harvested in the United States forced to take to his bed, and those who is placed by this authority at 245,480,000 vested approximates 2,865,000 acres, which in turn is 101 per cent. short of last year. This report makes the Canawith 1895. In view of the shortage on crop in Germany and England, the prices to farmers is certainly better than year ago.

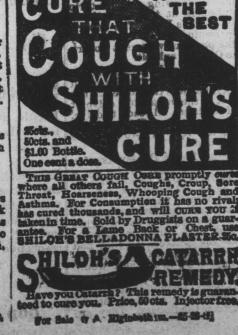

For Cuts, Burns, Sores, or Wounds, Victoria Carbolic Salve is the best healing and soothing ointment -- 69 4

Dr. Fowler's Extract of Wild Strawberry cures Diarrhoea, Dysentery, Cramps, Colic, Cholera Morbus, Cholera Infantum, and ail ooseness of the bowels. Never travel without it. Price 35c -63 tf.

Having made Victoria and Esquimalt barbors impregnable the British war office is now taking another step in making Esquimalt one of the strongest strategic points in the Empire. In a letter from Admiral Stephenson just received, it was stated that the ships in the North Pacific quadron would be soon replaced by odern warships, among them being at least one of the first class like the Powertul or Terrible. Not only that, but it is intended to fortity every pregnable point along the line of the Canadian Pacific Railroad. The North Atlantic fleet is | 1 also to be greatly strengthened and the object of fortifying the railroad is to render co-operation between the two seaboards practically certain in case of war. When the changes are complete 5,000 men will be in service at the station.

Milburn's Beef, Iron and Wine restored strength and vitality, and makes rich red blood. -68 4.

The "Empress of India's" Chief Engineer Tells an Interesting Story.

Mr. Francis Somerville, one of the best known men in the steamboat traffic on the rivers and lakes of Ontario, having been engaged in this business for fifty years, and who resides at No. 195 Upper Colborne Street, Kingston, speaks as follows of his recovery from the sickness which has affected him for some time.

Said Mr. Somerville: "The grip left me with kidney troubles and gravel. I had severe pain over the kidneys and in the small of my back, also between the shoulders and in the bladder.

"The urine was very dark-colored with great deal of muddy sediment. I went to Mr. McLeod's drug store and bought two boxes of Doan's Kidney Pills. I have taken them with what people tell me is the usual good result.

"They have cleared the urine, removed the sediment, relieved me of distressing pain in the back and between the shoulders, and have built me up in a surprising manner. In fact, I am entirely free from the troubles which affected me before taking these remarkable pills, and I recommend them as a certain cure for all troubles arising from kidney disorders." -Whig, Kingston. For sale by E. GREGORX,

St. Paul's Church, 2 Gur The subjoined is an unsolicited testimonial which Dr. Poole kindly handed me a few days ago. "Nuff sed"

W. G. WOODS,

DRAR SIR.—I have much pleasure in stating that the Gurney Oxford Hot Water System which you set up in my house in the autumn of 1894 was fully what you represented it to be, and gave entire satisfaction. There was no dust, no smoke, no gas, no leakage, and the air seemed pleasant and agreeable to breathe, so that no one had a cough in my house during the entire winter. Notwithstanding the severity of last winter our house was so comfortable that we had to go outside to find if the day was cold, while the quantity of coal consumed was only a little more than we had burned in former winters in one large coal stove with less rooms to be heated. The Furnace was easily managed, and with ordinary care the temperature of the house could be kept at any degree desired. I can heatily recommend this system of heating to any one who during our Canadian winter desires to enjoy what I can best describe as "Solid Cemfort," (Sgd). THOS. W. POOLE. M.D., Lindsay.

Give W. G. WOODS the contract of making your life a comfort August 21st, 1895.—1889-ly.
