FRIDAY, MAY 28, 1897. eventh Annual Butter Diroular.

The following circular from D. Gunn Brothers & Co., pork packers, provisions and commission merchants, Toronto, will be of interest to the many readers of The are admittedly the world's best.

The Dominion and Provincial governmaking in Canada. They have sought to educate a class of butter makers who would be competent to produce an article second to none in quality, in order that Canadians should hold a position with their butter in the British market equal to that now held in cheese. It was further realized that after producing butter of the finest quality, and putting it up in suitable packages, it would be necessary to arrange for a proper cold storage and refrigerator transportation. Arrangements have been made to this end. It will no doubt, however, take a little time before the full benefit of this arrangement can be realized. The ninion dairy commissioner, and other authorities, have endeavored at all times to emphasize that all these arrangements were provided with the object of placing our butter on the British market in the esheet condition possible. They discourage, in all cases, the practice of athe British consumer is known to be very particular as to quality of his food, and a good reputation can be attained only by giving him our butter when it has the fresh aroma peculiar to new sweet buite . All this education and instruction has been with the view of producing butter at the factories or scale, and we believe properly so, as only

ducad. There are several unfortunate conditions that exist in our Canadian butter trade which have to be faced. We think we are within the mark when we state that notwithstanding the increase in the number of creameries recently, probably two thirds of the butter produced in Canada is made in the home dairy. This butter is usually brought to the local merchants in lumps of various sizes, varying from one to ten lbs. or more, and sold for cash, or more frequently traded for goods. In this way the merchant will receive butter from many customers having different facilities for butter making, and marketed in all kinds of weather. It is to these merchants that we especially address this circular. We know that a great deal of butter received by merchants is quite equal to the finest creamery. Taere is, however, quite enough of very inferior butter made, which, when mixed with the good butter, spoils the whole parcel. We have trequently been not a little amused, while visiting the different towns buying butter, to have each parent or guardian, expressed in writing merchant tell us that he himself is very to the master of the school." particular in buying butter, but that his thing of "Smith." and so it goes. Trade is so keen that the majority of merchants

in this way can a regular and uniform

quality of their butter. The bad and the good grades of butter are often bought without discrimination, into boxes, and there to remain possibly for weeks before finally packed in tubs. The cellars and other rooms in which butter is stored are often contaminated exist it is impossible to have good results.

handled by merchants:-

grades in color and quality. This will department or the trustees are responsible.

The regulations, however, provide that butter should be packed every day. In the clergyman of any denomination in the order to get a uniform color in each tub, section may either by himself or his the butter may be worked on any of the representative give such religious instrucordinary table mixers; but in no case should the hands be used for this process. None but experienced persons having good judgement should be allowed to do the mixing. Cate should be taken that the mixing. Care should be taken that the butter is not overworked, as in this way the grain is often destroyed.

There were the days of which care should be taken that have the opportunity to desired. No child is obliged to receive such instruction when the parent or guardian requests his THIRD.—The person who is working | whihdrawal.

over the butter from time to time as it is mixed. This will serve the purpose of washing the butter and freeing it from any buttermilk that may remain in the

FOURTH.—The fifty-six pound dove-tailed square box, the inside of which should be paraffined and lined with the best quality of parchment paper, is the proper package for butter intended for the British market. We do not, however, favor this package for the local trade, and as the majority of this class of butter is used locally, the ordinary fifty or sixty pound tub is usually preterable. Any of the ordinary woods, such as white ash or

white wood, will serve the purpose.
FIFTH.—Tubs should be soaked at least twelve hours before packing, and then rinced out with a strong salt pickle, after which a small quantity of fine salt may be rubbed over the sides of the tub. If the tubs are paraffined they are preferable, and do not require to be soaked.

Sixth.—Butter should be well packed into the tub by means of a hardwood masher. In filling leave about halt an

inch space at the top of each tup. so that a paste of fine salt may be applied, after covering the butter with a bleached cotton cloth. SEVENTH .- Market without delay, as butter will not keep fresh in ordinary cellars for any length of time during the

FAVORITES FOR LONG YEARS

For long years Diamond Dyes have been the favorite family dyes in the Dominion of Canada; and although imitation package dyes have been plentifully offered for sale, their great inferiority to the "Diamond Dyes" in strength, fest-ness, beauty of color and brilliancy was known to the great majority of women, and they were condemned and avoided by all who valued good and bright colors. No sensible women can afford to risk her goods with poor dyes when the "Diamond"

A most important point to remember is that the Diamond dyes cost no more than ments during the past few years have the crude and common dyes sold by done a great deal to encourage butter some dealers for the sake of large profits. Ask your dealer for the "Diamond;" if he values your trade he will be in a position to supply vou.

Education in Ontario.

The report of the minister of education for 1896 shows that in 1895 there was a school population of 600,615, as ascertained through the assessors. This is between the ages of 5 to 21; but the average attendance has only been 56 per cent. which, considering the compulsory and truancy part of the school law, is a very low average The number of public schools in the province is 5,660, and the number of roman catholic separate schools is 334 with 10 protestant separate schools, and 95 kindergartens. The total amount expended on public schools is \$3,900,537. And it appears that there are twice as many female teachers employed as males, as they stand 5,463 of the former and only holding the butter for a rise in the market, 2,695 of the latter. There are 129 high schools (including collegiate institutes), and these are run at an expense to the country of \$720,584.

With regard to religious instruction in public schools, the report goes on to say that ever since the establishment of our school system, the extent to which religlous instruction might be given in a state creameries, on a more or less extensive system of education has received the vince. As an expression of its views on this question the council of public instrucquality of butter to any extent be protion as far back as 1846 authorized for use in public schools the scripture extracts or readings sanctioned by the Irish national board for the schools of Ireland, and in addition it adopted the following recommendation:

"With a view to secure the divine blessing and to impress upon the pupils the importance of religious duties, and their entire dependence on their Maker, the council of public instruction recommends the daily exercises of each public school should be opened and closed by reading a portion of scripture and by prayer. The Lord's prayer alone, or the forms of prayer subscribed, may be used, or any other prayer preferred by the trustees or master of each school. But the Lord's prayer shall form part of the opening exercise, and the ten commandments shall be taught to all the pupils, and be repeated at least once a week. Any portion of scripture shall be read without comment or explanation, but no pupil shall be compelled to be present at these exercises against the wish of his

It will be observed, says the report, neighbor "Jones" will take anything that these regulations were not obligatory comes along. A little later we call on upon boards of trustees, but such was the neighbor "Jones" and he tells us the same | religious sentiment of the country that the majority of schools either opened or closed the work of the day with the readare afraid of giving offence to a customer, ing of Scripture and devotional exercises and it is a well known fact that the as recommended by the council of public farmers' wives are very sensitive as to the instruction. From time to time appeals were made to the government by leading clergymen and by deputations represent-ing the most active protestant denomiand then all are mixed together, and nations of the province for such a change allowed to stand on tables, or dumped in the regulations of the department as would give positive sanction to religious instruction. As a consequence, the education department in 1884 directed that the devotional exercises which were by foul odors, and where these conditions | vouluntary theretofore should be obligatory, and in order that the lessons read We suggest the following methods, which, by the teacher should be better adapted if edhered to, we think will help to to the capacities and needs of the pupils, materially improve the quality of butter the department authorized a series of Scripture readings for his guidance. The First.—Prepare a special room in the regulations at present in force require (1) cellar in which only buiter is stored; the taht every school should be opened with room if possible should be chilled with prayer and (2) closed with the reading of ice. This room should be thoroughly the Scripture and prayer. The Scripture whitewashed once or twice during the lesson, however, may be taken either season; it is best to add to the whitewash from the Bible or the Scripture readings a small quantity of common salt. The salt will assist in making the whitewash as the trustees may order. The trustees may also order the teaching of the ten adherent to the whitewash as the trustees may also order the teaching of the ten adherent to the whitewash as the trustees may also order the teaching of the ten adherent to the whitewash as the trustees may order. adhere to the walls or partitions better commandments once a week, and the joint than if the lime is used alone in the reading of the Scriptures by pupils and teachers, but these exercises are optional. SECOND. - When received care should unless ordered by the trustees. This is be taken to class the butter according to all the religious instruction for which the

of this masteria and the state of this masteria and the state of the most alegasting and diagraceful exhibitions of the fascination of drink took place at Chorley last week. On Friday, April 23, a bottle containing six gallons of whisky fell to the ground from a spirit merchant's cart. It was broken, and the contents ran down the gutter. A number of men containing damaged up the channel, and began tents ran down the gutter. A number of men quickly damned up the channel, and began to accop up the liquor and drink it 'heat'. One, a man named Pendlebury, aged 36, having possessed himself of a can lid, drank from it twenty or thirty times. He speedly became speechless and senseless, and had to be wheeled home in a barrow. A doctor was summoned and emetics were administered, but nothing could be done for him. His tongue was burned quite black, and no doubt his throat and the coating of his stomach were throat and the coating of his stomach were in the same dreadful condition. The man

DOCTORS COULD NOT AGREE AS TO THE TROUBLE.

New Brunswick Lady the Victim-Suffered for Thirty Years-The Attack Caused Partial Blindness and a Feeling of Semi Paralysis.

From the Woodstock, N.S., Sentinel, Mrs. E. P. Ross, of Riley Brook, N.B.

avs:-"I have been a sufferer for thirty years, and I am sure I would still be in the same lamentable condition had it not been for Dr. Williams' Pink Pills. I was married at the age of twenty and am now fifty-one years old. I had always enjoyed good health until after my first enild was born. About a month later the illness attacked me which has since made my life miserable. I consulted different doctors, but they did not agree as to the nature of my trouble. One said it was a The merchants all said it would fine of fits. I would be feeling very well when I would suddenly have a seneation of partial blindness, and everything before me would sparkle. Then my hand and arm on one side would become numb and after about ten minutes this sensation would pass to my lower limbs, then my tongue would become affected, as would also my hearing. Voices, no matter how close to me, would seem dim and far away. These symptoms would last for about forty minutes, I would have a violent pain over the eyes, which would continue for twelve hours or more. Not-

withstanding all that was done for me, these spells were coming more frequently and at last I would sometimes have two attacks a day. I was also troubled with bronchitis, which added to my misery. I could not sew or knit, or do any work that required close attention to it. All this trouble had never left me for years, and at the age of 48 I conculted another doctor. The medicine he gave me, how-ever, made me worse instead of better. Then I was advised to try Dr. Williams' Pink Pill. I was using the third box before I found any benefit, but then there was a decided change. By the time I used twelve boxes I felt as well as I did in my young days. Every symptom of the trouble that had so long made my life miserable had disappeared. For eighteen months I did not use the pills and was as well as ever I had been in my life. Then one morning I felt a slight attack of the old trouble and determined to try Dr. Williams' Pink Pills again, I got a box and took an occasional pill and have never since had a symptom of the trouble. To say that Dr. Williams' Pink Pills have done wonders for me is putting it mildly, and I strongly urge their use on all who may be ill. Pink Pills were also of great benefit to a niece of mine, Miss Effie J. Everett. Her mother died when she was quite young, and naturally much of the care of the household devel oped upon her, and as she grew up she became weak, easily tired, subject to headaches and her complexion pale and wax like. A young lady teacher who was boarding with the family, and who had used Pink Pills with great success urged her to try them. The result was that she soon was enjoying the best of health and is a fine robust young lady who shows no traces of her former illness. Dr. Williams' Pink Pills cure by going to the root of the disease. They renew To it I've added this much of my life. and build up the blood, and strengthen Ohristians may pray and preachers may the nerves, thus driving disease from the system. Avoid imitations by insisting that every box you purchase is enclosed prevail
So long as for dollars we license foul mark, Dr. Williams' Pink Pills for Pale People.

Undoubtedly the Best.

GENTLEMEN,-I wish to say that Dr. Fowler's Extract of Wild Strawberry has proved a wonderful remedy in my family. We would not be without it for twice its price. I say it is THE BEST (not merely one of the best-but the best) medicine ever brought before the public for summer complaint or diarrhoes, either in children or adults. W. G. WOODS,

DEAR SIR,—I have much pleasure in stating that the Gurney Oxford Hot Water System which you set up in my house in the autumn of 1894 was fully what you represented it to be, and gave entire sakesocion. There was no dust, no smoke, no gas, no leakage, and the air seemed pleasant and agreeable to breathe, so that no one had a cough is my house during the entire winter. Notwithstanding the severity of clast winter our house was so comfortable that we had to go outside to find it the day was coid, while the quantity of coal consumed was only a little more than we had burned in former winters in one large coal atove with less rooms to be heated. The Furnace was easily managed, and with ordinary care the temperature of the house could be kept at any degree desired. I can heastly recommend this system of heating to any one who during our Canadian winter desires to enjoy what I can best describe as "Solid Cemfort."

(Sgd). THOS. W. POOLE. M.D., Lindsay.

Give W. G. WOODS the contract of making your life a comfort
