FRIDAY, AUGUST 20, 1897. A Canceing Cruise.

The two or three miles samp put us in great fettle for dinner. which surpassed anything in Harry Nebb's as far as the relish with which it as stowed away is concerned. The trip through the next four lakes was very joyable. and the Burnt river; these unite at Cameron lake just above Fenelon Falls, and flow on through Sturgeon, Pigeon, Buckhorn, Stoney, Rice, and other lakes down past Campbellford and other places into Lake Ontario. The river bears a good many different names, and drains probably 150 or more lakes of all sizes. As I said, Boskung is the natural reservoir of the Gull river branch of this great stream. Bookung lake is about three miles long by about two miles wide and must be very deep. It has three main feeders. Away to the northeast is a very fine chain of lakes, up four of which we paddled with only one portage. These four—Beech, Maple, Green, and Pine lakes—are worth all the labor of the trip

to see. Maple lake is a gem; it is, as the girls say, just perfectly lovely. It nesties down at the foot of its crown of hills in a most delightful way and quite fascinated has been under arrest seven hundred our party. Pine lake is the same story of charm over again, and at its head we found about the last seitler up this route. On his farm we saw as fine a crop of oats as our eyes had ever seen, and his collection of children couldn't be beaten anywhere. I didn's count them, but they were many, -say fifteen, and they were glorious specimens of Canadian saxons. I have never seen their superiors (i.e., taken

We were informed that above Pine lake central stream that flows into Boskung drains Hall lake, the Kenese lakes, and a group of about forty more. The third feeder enters Boskung at its

south-western corner and drains only some fifteen or twenty lakes. There is a heavy portage here into the first lake, which enjoys the name of Kachagawigamog, or, to put it more briefly, Kuehog. This is about seven miles long, and from it you pass into a very beautiful lake called St. Nora's or Senora, or Sonora, I am not sure which. It is pronounced S'Nors, and you can spell it any way you like. It is the wildest bit of scenery in this region; not a soul dwells on its borders. Here you have nature and nature and nature only. A solitary grave is found at the head of the lake, adding pathos to the wilderness and deepening the impressiveness of the scene. The fish in this lake are very plentiful and of for it all. "Of the making of books there is no end," it has been said, and the same hair is now silvery white. It is estimated that during the last twenty five years she has been under arrest seven hundred Williams' Pink Pills. Wonderful as are some of the statements published in the newspapers as to the cures effected in all parts of the country, fresh evidence proves the half has not been told. Were it not for a false sense of delicacy which a great many people entertain in regard to such matters, the columns of the press would be literally teeming with grateful acknowledgements of benefit derived from and permanent cares effected by the use of Dr. Williams' Pink Pills for Pale whiskey; the city would not allow her to People. PIANOS AND ORGANS.

Pianos and Organs, manufactured by the Dominion Organ and Piano Company, Bowmanville, are still having a wide sale. A few weeks ago two very important sales were made, which are worth recording, although the instruments were placed 3000 miles apart. They had the special honor of placing one of their Cabinet Grand Pianos in the Crystal Palace at London, Eng., and another beautiful Cabinet Grand in Italian walnut was sold by their agent, Mr. Fleming of Markham, to Mr. George Parker, ex-Reeve of Pickering township. This alone is sufficient, if it were necessary, to convince the musical public how highly these instruments are appreciated at home and abroad, and speaks volumes for the energy displayed in the management of this company.

W. G. WOODS,

DRAB SIR,—I have much pleasure in stating that the Gurney Oxford Hot Water System which you set up in my house in the autumn of 1894 was fully what you represented it to be, and gave outire satisfaction. There was no dust, no smoke, no gas, no leakage, and the air seemed pleasant and agreeable to breathe, so that no one had a cough in my house during the entire winter. Notwithstanding the severity of last winter our house was so comfortable that we had to go outside to find if the day was cold, while the quantity of coal consumed was only a little more than we had burned in former winters in one large each above with less rooms to be heated. The Furnace was easily managed, and with ordinary care the temperature of the house could be kept at any degree desired. I can heatily recommend this system of heating to any one who during our Canadian winter desires to enjoy what I can best describe as "Solid Comfort," (Sgd). THOS. W. POOLE, M.D., Lindsay.

Give W. G. WOODS the contract of making your life a comfort this winter. August 21st, 1895 .- 1889-1v.
