The bill to the government arising cut of hog cholera in Western Ontario has now reached \$30,000. Of this \$20,000 has been expended by the department of agriculture in the slaughter of hogs. The quarantine has

The lengthening of the runs on the Grand frunk system for the train crews is not meeting with the approval of the men, the chief objection being the strain on their nerves. especially those of their engineers and firemen from the constant shaking up they get while travelling over the rails.

Experts in insanity tell us that when anyone goes insane, frequently their whole nature is re versed. They do and say exactly the opposite things to what they would do in their sane minds. A mother whose mind breaks down under extreme nervous tension may turn upon the one object in all the world most precious to her—her baby. The terrible nervous tension under which many women live and suffer because of some weakness or disease of their sex

many women live and suffer because of some weakness or disease of their sex keeps them on the very verge of insanity. The constant drag and drain upon the complicated and delicate organism affects the whole nervous system and works upon the brain with an almost irresistible madness. Thousands of suffering women have been literally saved from the insane asylum by the timely influence of Dr. Pierce's Favorit Prescription. itive specific for every derangement of wo man's special organism. It is a scientific and permanent cure for those severe chronic, complicated cases which docton usually consider hopeless. It is the only medicine of its kind devised by an educated and skilled physician.

Mrs. Sarah E. Rains, of Dayton, Cass Co., Mo. in a letter to Dr. Pierce, writes: "It was in the winter of 1890 that my sufferings commenced. I was close to my time of confinement. I took the grip, and that with the labor pains all went to my head. I suffered dreadfully, and when I gaw birth to my little boy I kept getting worse, doctored but nothing did me any good. I had nervous spasms and was delifous—Oh, no tongue can express my sufferings. I was advised by a lady to try your medicine and I did. I got on bottle of the 'Favorite Prescription' and one of the 'Golden Medical Discovery.' I had taken two-thirds of the medicine when it commenced its work. I began to feel better, and still continued getting better. In a short time I feet like another woman. I gained strength and flesh. I am now forty-one years of age. This is true, and it was your medicine that saved my life."

Many an amateur photographer would be glad to add a stereopticon to his outfit, if it were not for the heavy expense of the instrument. It appears, however, that any boy of average ingenuity can make one for himself, and at small cost. How it may be done is described by J. Harry Adams, in Harper's Round Table of August Slst, "The Battle of the Hook," which appears in the same number, is a vivid account by Ensign Yates Sterling. Jr., U.S.N., of a great sea fight off Sandy Hoek, in which the United States fleet Sandy Hoek, in which the United States fleet engages that of a first-class power. The date is tantalizingly vague, the identity of the enemy only hinted, but the issue of the battle is what every patriotic American boy will anticipate. Among many other interesting features may be mentioned a paper on "Hunting the Wapiti," by the Hon. Theodore Rocseyelt, and a full "first part" for young minsteris consisting of dialogues, songs, and jokes, prepared by John Kendrick Bangs.
