A SEA SERPENT.—The Allsaw correspondent of the Minden Echo gets off the following:—"While Mr. and Mrs. Geo. Hope, of Alkaw, were crossing Lake Kushog-a-wig-a-mog at Dauneey's Point, in a punt on Friday last, they were surprised by a strange noise near them like prised by a strange noise near them like the rushing along of a small steamboat. Glancing in the direction from which the sound appeared to come they saw something like a saw-log rushing along on top thing like a saw log rushing along on top of the water, but on closer inspection they discovered that it was a living monster of the deep; being within four or monster of the deep; being within four or five rods of the strange object they had a good chance for quite a few seconds to see it thoroughly. Mr. Hope says it was as big around as a seven inch stove pipe and not less than 12 to 15 feet in length. During the time it was on the surface of the lake both its head and tail were plainly visible, and its body moved along the water in an undulating manner, the curves shortening up the appearance of the body somewhat. It appears that such aquatic monsters have been seen by various settlers frequently and lumbermen working on these waters, but hitherto it has been difficult to make people believe the reports. There is not the slightest doubt about the matter this time as Mr. and Mrs. Hope are most reliable

Nine Terrible Years.

MISERY DAND SUFFERING DAY AND NIGHT.

Paine's Celery Compound is Victorious Over Liver Troubles.

A Mighty Work After the Doctor Failed.

If proper treatment is not resorted to in

time, the results of liver complaint are terrible, often ending in death.

Mrs. McRae, of Guelph, Ont., suffered for nine long years from liver complaint. Her case beffied the skill of the physician she employed; he could do no more, and the sufferer was left almost hopeless. Hearing of Paine's Celery Compound she secured a supply and soon experienced returning health and vigor. The second bottle completely cured her. Mrs. McRae writes for the benefit of all

in misery and affliction; she says: "It gives me great pleasure to add my testimony to the value of Paine's Celery Compound. For nine years I had been troubled with liver complaint, and often had very bad spells from it. Two years ago this spring I had a very bad attack of it, and called in a used I could eat and sleep well, and the pain in my head was completely gone. I took the second bottle and have never been troubled with liver complaint since. Your compound has banished constipation which troubled me for many years, and has built me up and completely cured me. I am now 64 years old and from what I know I consider your medicine the best on the market. Hoping that your valuable medicine will do for others | get some of their meat there. what it has done for me is my sincere wish."

PETERBORO

Fergus, the young son of Mr. John L O'Brien, London st., died very suddenly Thursday night. The boy, who was eight years of age, was at school yesterday in his usual spirits, and after school showed no signs of illness. At the evening meal, however, he said he did not feel well and ate little. He then went and laid down on a sofa, and was covered up by his mother who thought him sleeping. About nine o'clock his mother went to rouse him to prepare for bed, when to her awful surprise she found that he was apparently dead. Medical aid was called, but the young life was

The C.P.R. have issued a circular to their employees making it necessary for trainmen and engineers to take sufficient rest at divisional points. They must not start out from the divisional point to cround for partridges. The which they belong unless they are perfectly fresh and fit to make the round without rest, if necessary; but in no case re sitting in a tree right be- must they leave any divisional point unless prepared for at least twelve hours service. This step has been taken in order that the trainmen and enginemen may not be too fatigued to attend to their

Some weeks ago the quarterly board of the Sydenham street methodist church, Kingston, met and decided to call Rev. E. B. Lancely, of London, Ont., to succeed the present incumbent, Rev. Mr. line giving connection with any other Starr. The majority of the church members was not wanted, the right thing bers were against this diction, and in the being a sort of belt line, starting from meantime a new quartely board was elected. It met on Tuesday evening and That would compel the travellers rescinded the business of the old board, on the line to truck their butter and eggs and decided to keep Rev. Mr. Starr To terson and hair pins, right here. A another year. Those in opposition will make inquiries present their case at the methodist (con-

ference in June. Two insurance agents took a long stroll Thursday afternoon, and as The edge of the canal will run

twelve pounds. They are not such good eating as the trout, which go two or three pounds in weight.

strikes a fish, when, with a flop, it is landed in the bottom of the canoe. One cannot see a foot in the milky glacial water, so that spearing is out of the question. Sometimes they surprise the fish in the shallow places. I shot a two-and-a-half pounder at a ford, grazing and stunning it with a revolver-shot. The Indians do not use a hook and line. There could be no finer place to fish for trout than along this Dyea River; there are deep pools, narrow, a rod across, against the sides of the steep mountains, while on the other side it is open, flat and gravelly, free from bushes. But none have time to try. More important things weigh on our minds-the ever present dread that we may never get over.

The slowness of the pack-trains is disbeartening, horses being put out of use from loss of shoes, and no shoes or nails to put on them. They are getting sore, and the poor ones are getting played out. Men do not know how to pack. As a Montana man said: "Some of these people think that so long as it is a horse, anything is all right. If it is a piece of machinery they will have to take care of it, but they think a horse can stand anything." They do not seem to use even common sense—those, too, who hire as deep, 100 feet wide at the bottom, and "experienced" packers. The packing rate 160 feet wide at the surface of the water. to Sheep Camp is twelve cents per pound. I get the boat lumber out, separate the two boats, and start my own in charge of for each foot of fall, thus producing about two men for Sheep Camp. The lumber weighs 165 pounds and I pay them twenty-five dollars. The grumbling still if the total head of 320 feet be utilized. goes on. The men with the pack report This power will be transmitted wherever that they were threatened up the line,

that the train would be besieged by those whose contracts are about expiring, unless their stuff is taken ahead. My stuff, to the weight of 1400 pounds, went up to-day on the backs of nine horses. The sun is merely a plan to harness the falls and coming out clear, I went down to Dyea to rapids of the Niagara river by removing make some photographs. It was an un- them to a point about six miles southwest doctor who relieved me of the trouble, but I lucky move. The customs officer from of the present cataract. Would Any Sane Housekeeper Use Oleomargarine?

DANGER IN ANOTHER DIRECTION.

Would any sane housekeeper in Canada buy oleomargarine or imitation butter in creamery or dairy? We think our Cana- gains, but the losses make much too big dian women are too wise to be deceived in this important matter. Lard colored to resemble good butter will never be acceptable to our people.

There are, however, other deceptive agents that sometimes find their way into our homes; we refer to imitation and adulterated package dyes for home dyeing. Some dealers sell imitations of the celebrated Diamond Dyes. The contents started to use B. B. B. 22 2. of these imitation packages carry ruin and disappointment to every user,

A few dealers, for the sake of long proof a very large amount of common grease | be cured. -20.4. and an infinitesimal quantity of coloring matter. Such dyes, after trial, have been found weak and uncleanly, giving dull the worst headache in from five to twenty and muddy colors, fading quickly in wash- minutes, and have no bad after effects. One ing and sunlight.

As millions of thrifty and experienced women already knew, the Diamond Dyes |= are the only reliable home package dyes, having stood the tests of long years.
Diamond Dyes are easy to use, and give
brilliant and lasting colors that cannot be equalled by any other make.

A Beauty of the Wildwood.

One of the finest deer that ever bounded over the rooks where these beautiful creatures are found, was brought here last week by the hunting party composed of R. H. Bonnycastle, John Given, T. S. Tait. Thos. Rainie, Frank Bonnycastle, jr., and Chas. Keller, says the Campbell ford Herald. It is a magnificent buck weighing 351 pounds, and measuring six feet from the root of its tail to the nose, and its head is ornamented with a set of tour pronged antiers. It was laid low by tour pronged antiers. It was laid low by young Bennycastle, who from a favorable point as the animal was running towards him, put two bullets into him, one in the nose, and the other in the forehead, just above the eyes. The third time he fired, the bullet entered the hind quarter and penetrated the body till it lodged near the shoulder. It is the largest deer that has been seen by the hunters of this locality except one that was on exhibition locality except one that was on exhibition at the Rathbun Co's storehouse three years ago, which for size and weight Substitution seemed to be the king of the forest.

saloon here. At the hotel a full meal of beans and bacon, bread and butter, dried peaches, and coffee, is served for six bits, or seventy five cents. It is in charge of two young women from Seattle. One of two young women from Seattle. One of them is preparing to start for Sheep Camp with her younger brother, and a two-hundred-pound cooking-range. The Indians bring in salmon and trout, and sell them for two-bits, or twenty five cents. The salmon run up to ten and twelve pounds. They are not such good the trout, which go two or three by its charter has practical control of the water supply that now feeds Niagara Falls. In 1894 the Welland Power and Supply Canal Company was incorporated under special act of the Dominion of Canala for the purpose of utilizing the water supply of the Welland Power and Supply Canal Company was incorporated under special act of the Dominion of Canala for the purpose of utilizing the water supply of the Welland and Niagara rivers for promoting manutacturing industries. The company is composed chiefly of citizens of St. Catharines, Ont., who will require \$5,000,000 capital to put the plan in operation, and the promoters are anxious to have the full amount subscribed before the work is begun. Therefore, The Indians go, two in a smallish cance, one with a paddle, while the man in the bow sits facing the other, armed with an iron gaff, and as the cance is slowly worked along the pools the gaffer feels up and down with his gaff until he strikes a fish when with a flor it is they have delayed action until the English capitalists should be more favourably that English money will soon enable this power company to begin the construction of its canal.

At Chippewa, about two miles above Niagara Falls, the Welland river or Chip pewa creek, empties into the Niagara. This tributary has so slight a descent that the deepening of its bed would cause the water to flow in the opposite direction. Thus by enlarging its channel it can be made the outlet for all the waters that the Niagara river receives from Lake Erie. This work of enlargement the Power company proposes to undertake. At Montrose, five miles the mouth of the Welland river, this body of water will be emptied into a canal which will flow north to a point on the Niagara escarpment, about three miles east of the town of Thorold. Here a fall of 150 feet will be made, the water being carried through great steel pipes to the wheels below. Then if there be a demand for a greater amount of power, other descents aggregating 170 feet can be made, while the Lindsay. waters of the canal will be emptied into F. D. MOORE.

lake Ontario. The company proposes making an artificial channel of the same dimensions as the new Welland canal, which is 14 feet deep, 100 feet wide at the bottom, and peace, County of Victoria. Office, Keenan's block, over Weese's store Lindsay. Such a watercourse, at a flow of three miles an hour, will give 975 horse-power necessary, by means of electricity, while the company hopes also to furnish a water supply to the fruit growers of the Niagara district for irrigation purposes.

It will be seen that the whole scheme boundary may yet prove to be an interesting international question between the company and the United States govern-

Revenue-Raising in France.

France, like the United States, is studying the results of new contrivances for raising revenue. Her receipts for the last eight months are unsatisfactory in several particulars. The receipts from the tax on operations in the Bourse and financial transactions have tallen off 2,800,000 francs. The excessively high Arrive Carleton jot., 4.95 p.m. tax on playing cards has diminished the revenue by 600,000 francs, and up to August 1 receipts from the inheritance tax were 10,000,000 france short. The tax on religious societies (which resent the impost and are very loath to pay it) yielded only 364,000 francs.

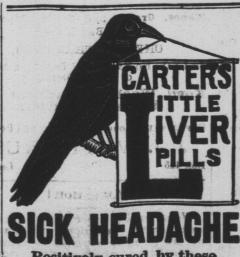

On the other hand, railways pay 3,000,-000 france more than they did; alcohol, 8,000,000 france more; tobacco, 9,000,000 francs more, and the telephone 1,000,000 france more. These are considerable
