This week's weather was probably intended by the authorities for Indian summer, but through some mismanagement — possibly some of the hands were on their holidays, they put too much water in the mixture. The prophets all say now that we will have a "green Christmas" in "Our Lady of the Snows," although a short time since they protested it would be decidedly wintry about that time. We now avail ourself of this opportunity to predict that the weather may, and probably will, be colder in the middle of winter than at either the commencement or

and "friend" by our foot-of-the-street fellowsoribbler, yet we cannot condone the statements
made in a recent effusion of his. It is quite
evident to us that some of his gossipling friends
have again led his pen astray. He has in the
first place been misinformed—for we do not
for an instant presume that the article is the
product of his own brain, however imaginative,
in the primary details of the case—for it, as a
matter of fact, never took place, but we will
explain what we suppose is the origin of the
whole affair. A young gentleman engaged in
the egg business while, in company of a friend,
passing the laundry of Ah Choung Fong—the
Post has has made a mistake in fhe gentleman's name—made the remark that the
dropping of a flat fron from one of the windows
of the celestial's residence would be quite
feasible and very annoying to any passer-by. A meeting of the town council was held on the reporters of the local papers. Owing to the pressure on our columns we have to defer until next week a fuller report of the proceed ings. A scheme that was being worked up to vote \$25 to each of the councillors as compensation for their servicers was not brought forward, probably it being found that a two-thirds vote could not be obtained which would be necessary according to the rules of the council. Another contradiction to Rudyard Kipling's isapplication of the name "Our Lady of the Snows"—several farmers of Emily who had delayed their ploughing till the winter set in, found an opportunity last week and in the middle of December did their fall ploughing.

The weather on Tuesday evening was certainly very unfavorable for the success of any undertaking, excepting perhaps train robbing or some similar undertaking, but nevertheless a large audience saw the curtain rise at the Academy of Music for the Charity Concert. Although as far as the arrangement of the programme was concerned there was The lecture on "Rome" by Rev. Prof.
Teefy in the collegiate institute last Friday
was decidedly well worth hearing. Interest
was added by the magnificent limelight views
of the "eternal city" with which the lecture
was illustrated and by which means the
reverend gentleman's descriptions were made,
if possible, more realistic. Prof. Teefy was
thoroughly conversant with his subject, having
visited Rome for some time, although, as he
said, he had not really lived there as had been
announced. The collegiate institute management is to be congratulated on the excellent
opportunities they are affording to our citizens
of hearing the great men of our country and Concert. Although as far as the arrangement of the programme was concerned there was room for improvement and although there might have been fewer members of a musical character, still Lindsay surpassed even herself as an entertainer. To go into details of the programme would be superfluous—it is sufficient to say that a fastidious Lindsay audience expressed itself as delighted. The cause of awest charity received ample support financially and the charity committee deserves great credit for the successful out-come of its efforts. opportunities they are affording to our citizens of hearing the great men of our country and certainly deserved the patronage which they received on Friday night. In the afternoon previous to the lecture Prof Teety gave a short talk to the students, in which he imparted much good advice, which was highly appreciated, coming as it did from a gentleman who had spent his life in school and college work. While in town Prof. Teefy was the guest of Vicar-General Laurent.

plagues kill in fifty. Tens of thousands of intelligent people recognize that they are threatened by this deadly disease, but take

no precautions against it.

Consumption approaches its victim step by step. First there is a little "out of sorts" feeling, the digestion isn't just right, the appetite falls off, the liver is inactive, the assimilation of the life-giving elements of the food is imperfect, the blood gets impure and the body is improperly nourished. These conditions get worse and worse. The heart through the arterial system is pumping thin, poisonous blood into every organ of the body. The organs that are inherently weakest break down first. Ordinarily the lungs. As the last stray that breaks the camel's back comes a cold, however slight. This, with the accompanying cough, completes the work and an invasion of the germs of eonsumption follows. Dr. Pierce's Gold. of consumption follows. Dr. Pierce's Gold-en Medical Discovery cures 98 per cent. of all cases of consumption. It corrects the conditions that lead up toit. It is the great-est blood-maker and flesh-builder known.

E. C. McLin, Rsq., of Kempsville, Princess Anne Co., Va., writes: "When I commenced taking your 'Discovery' I was very low with a cough, and at times spit up much blood. I was got able to do the least work, but most of the time was in bed. I was all rin-down, very weak, my head was dizzy, and I was extremely despondent. The first bottle I look did not seem to do me much good, but I had faith in it and continued using it until I had taken afteen bottles, and now I do not look nor feel like the same man I was one year ago. People'are astonished, and I was one year ago. People are astonished, and say, 'well, last year this time I would not have thought that you would be living now.' I can thankfully say I am entirely cured of a disease which, but for your wonderful 'Discovery,' would have resulted in my death.'

EDITORIAL NOTES.

A few weeks ago the grit press were oud in their praise of Mr. White, a government official whom they called the Canadian Du Barry. It seems Mr. White was credited with clearing out the lumber camps on the north shore of all Americans who were employed in those camps and deporting them home to Uncle Sam. This was a good move on the eve of the elections, but Mr. White, we presume, acting under instructions, permitted his eargo of lumbermen to disembark at Manitowaning and quietly made their way back to the camps. This is in keeping with the inspector who permitted a Michigan firm to make false returns of the number of logs cut, whereby the province was defrauded of bundreds of thousands at a superior was defrauded of thousands.
