WRIDAY, DECEMBER 24, 1897.

To the Farmers of Canada.

The annual distribution of samples of some of the best varieties of seed grain to farmers, for test in different parts of the Dominion, has, during the past ten years done much to direct attention to the importance of sowing the best sorts of seeds, and in many sections of the country this introduction of new sorts has resulted in a decided improvement in the yield and quality of the grain produced. Nearly all the varieties sent out are grown on the experimental Farms and are selected from among those which and are selected from among those which, after being submitted to careful and repeated tests, have produced the largest average crops of grain of good quality.

Having received instructions from the honorable minister of agriculture to con-

tinue this useful work and make another distribution during the coming season, I shall be pleased to receive applications from all who desire samples. As heretofore, one sample of one variety only can be sent to each applicant, and the dis-tribution will be confined to samples of wheat, oats, barley, field pease, indian

A business, therefore, which has for its onief aim the object of enabling men, youths and boys to dress well at a low cost, is deserving of special attention.
