D. A. DORGER.

A FRW OF THE ESCAPED HATDERS. The cight men who got away from the immediate vicinity of the prison traveled in complex, taking different routes and meeting with a great variety of stirring adventures. Porter and Wollam went westward and reached the Tennessee gives, down which they floated in a boat, making a land organic to avoid mused shouls, till they reached Corinth, in Missteetppl, on the 18th of November, having been a month and two days on their peril-

OTHE POTHERS. Porsey and Hawkins pursued a route. similar in general direction to the last. but keeping a little further west. They were entangled in the outposts of Bragg's army, then on its retreat from Kentucky, and very narrowly escaped capture. They also were greatly helped by the Union people of Kast Tonnesses, and without such aid would very probably have died with end and hunger in the mountains. They and all the others were received by their grmy compades and relatives as men risen From the dead.

that the most surprising and longest but easiest route was that taken by Wood and Wilson. The former was so sick that it is not probable he could in any other way west fill they encountered the Chatta-hooches river, when, seizing a boat, they paddled down the stream night after night, hiding by day, fill they reached the Craft hocked fiver, when, solding a boat, they pulled down the stream hight after night, hilling by day, till they reached the Cult of Mexica, when they stood boldly out to sea it was so rough that we were constituted to the teath. We also beside a river we in armed to the teath. We also beside a river we in armed to the teath. We all stooped in the river shot, but guidely moved on a much to the teath. We all stooped in the first in the least to specify all who were strongly stoke when we may have an all the new the first in the least to specify it is not been a will independent the first of the first of the river which was fast. We wanted a small loss for the river the first of the payly to send home a full account of their party to wond home a full account of their adventures, which is still on file in the

war department A few words will finish the story of the six of ne who were so unfortunate as to be recaptured. We expected nothing less than instant death; but instead of that we were taken to the Atlanta barracks, then under charge of an officer who had been in the regular United states army, from whom we received more humane treatment than had been before accorded as within the limits of the Confederacy, there we remained two months, and were then forwarded to Richmond, Va. We spent only about two hours in Libby prison, but were more than three months in Castle Thunder, where our sufferings were often very great. Food was but be recaptured. We expected nothing less in Castle Thunder, where our sufferings were often very great. Food was but little above the starvation point. No clothes were given us by the Confederacy, and we were almost naked. Many died around us, and in the very rooms with us, of smallpox and other deadly diseases, but our lives were strangely preserved, though several of our aumber were very lick. We never were called on to face

another court martial. There was much talk of exchange, but our hopes in that direction were so often disappointed that

We almost ceased to hope.
At length, on the 17th of March, 1868, we received the joyful tidings that a special political exchange had been conduded, which hy the insistance of Secretary Stanton, had been made to include us. No words can describe our joy when we at last found that it was accountly true, and that our year of horror was over and we once more under the old flag-

The his park he was exposed to the war. We were too his park to some water and some soar, which improved out or preference a sold that and finally dimer was ready. We remembered all the sufferings through The devotion to their stek commute, who which we had passed it seemed as if we was, in spite of all, returned to us in could never cease to be grateful. We prison, and gave an account of their ad-ventifies that far, led to their singular but we also implored with a fervor and famine had made us terribly hungry, and battle with the bounds and the still more stucerity which few can realize, that he would not allow our bright and vivid hepes to be disappointed and us to be dashed back from the paradise of liberty. And we asked with no little solicitude for no longer confined within prison walls, so that the precious possession we had found in the darkness might not pass away in the light; thus composed we lay down to

await the event. The commanding officer, who stepped into the door long before the morning light gave the thrilling order, "Get up. and prepare for your journey!"

At his call we hurriedly thronged to our feet. All doubts and fears vanished. It was true! Freedom once more! Our terrible activity was passed. O joy! Joy! doy inexpressible; almost foo wild and delirious for earth!

There was a hurrying around in the partial darkness left by the glimmering of lights; discordant calling of names, a eareful inspection of each man to see that none went but those intended; and then we formed in the courtyard for the march foward freedom. We fell into two lines and when all was ready we passed again into the office, were carefully counted, and with bounding hearts passed ontward through the dreaded portals of Castle Thunder-the same portal through Which we had passed invard more than three months before. There was all the hope of the moratug in this coming out!

We halted on the pavement until perfectly formed, and then, with the guard, marched through the muddy, unlighted streets for many squares. There were a number of sick in our company, but not one of them was willing to be left behind; and as the rebels had neglected to provide any conveyances, we helped them—each being supported between two stronger men, and thus with cheling arms they were able, at the expense of much suffering in some cases—to accompany us the

SACOS PARROPP

GROUP OF THE EXCHANGED PRISONERS. weary distance. Two or three had to be almost wholly carried, but the burden was cheerfully endured, upborne as we all were on the wings of hope and exultation. were on the wings of hope and exuitation. Seated in comparatively comfortable cars, with no ropes or irons upon us, and but a weak guard, and with deep peace and content in our hearts, we glided out of the rebel capital—to see it no more till all that had belonged to rebel power had passed away "Like the baseless fabric of a vision, and left not a wrack behind." The unwouted light dazzled our eyes. The motion of the cars was an intoxication. This was happiness indeed. The thoughts and visions of the night were lived over

French Method of Education. Our school system handicaps our young people at both ends of the social scale. The French, by the application of the process of elimination to their system, have thrown out whatever is superfluous, and have so reduced the programmes for both boys and girls that it is possible to save two years of the time which American pupils now consume in obtaining an education which is far less complete. The question, then, turns upon the adoption of the French method. Is it wise to shorten our school programmes, as the French have done? The answer is both Yes and No. President Eliot is not the first to perceive that our school system is loaded

presume it was the day after leaving Richmond, which would be Thursday, March 19. I made no memoranda at this down with too much detail. time, such as I had not failed to keep dur-The American principle is that of Davy Crockett, "Be sure you are right, then go ahead." We wish to be so sure of our ground ing the darkest parts of our history. In my own experience joy was more overthat we dig up the knowledge that has been planted in the minds of our youth by re-After supper we took our proposed walk, But once outside in the dark peated examinations in order to see if the street, with no place to go, no money to buy anything and nobody to care for us, it began to seem rather lonely. We had been objects of so much solicitude for so roots of education have sprouted; we are not willing to wait for nature to do her work, with the line upon line and the precept upon precept. The examinations are almost as long that we could scarcely help feeling a little neglected now that nobody prevent-ed us from wandening in any direction we much of a weight upon the American public schools as the details of the programmes. The two go together. The idea behind this plan is that the work of the school is to see that the pupil has been faithfully over a cerchose. Beside, we were not yet provided with new clothing. A regular requisition would have to be filled before our wants in that direction could be supplied; and the air was chilly. After wandering aimlessly for a few squares, looking in at the shop windows and staring at the great buildings, we turned and were soon back in the hamsely. The recent which were tain amount of ground, and has it well memorized. The French idea is that if the pupils get the fastery of the principles, and if the work is made hard all the way, but at the same time is like going up a staircase, lifting one up higher and higher in the mastery of his studies, the true end of an education is in the barracks. The room, which was well warmed, seemed very cozy. It was easy to consider the sentinels at the door as placed there to guard us from an enemy, a view of the case which greatly pleased the Tennesseeans. I really think we slept better than we would have done if at a first class batel. realized. - New York Times.

Wool is not peculiar to sheep; many quad-rupeds have wool or fur which, microscopi-cally, is identical in position and similar in appearance to that of the sheep. A great The next day, as I had expected, all re-strictions were removed from the other many animals are provided with wool or fur under the long hairs which are supposed to members of the party; but we were inconstitute the covering of the animal. The vited to make our home at the barracks, receiving regular soldiers' rations, as long long hair sheds the water, while the short fur keeps out the cold. In the case of the as convenient.

We did not remain long. A wealthy and patriotic lady, Mrs. Fales, had fitted up a pavilion in her yard in excellent style and kept it filled with convalescents from army hospitals, to whom she gave the attendance and most of the comforts of home life. Hearing our story, she applied to the Ohio state agent, Mr. J. C. Wetmore, to secure us as lodgers. He seal, the short fur is all that is known to
