WHAT IS CATARR Catarrh is a muco-purulent discharge caused y the presence and development of the vege-

table parasite anneba in the interest lining membrane of the soor. This parasite is only developed under inversible circumstances, and these are: morbid state of the blood, as the blighted corpuscle of tubercle, the germ poison of syphilis, mercury, toxeema, from retention of the effeted matter of the skin, suppressed perspiration, badly ventilated sleeping apartments, and other poisons that are germinated in the blood. These poisons keep the internal lin-ing membrane of the nose in a constant state of irritation, ever ready for the deposit of the seeds of these germs, which spread up the nostrils and down the fauces or back part of the mouth, causing ulceration of the throat; up the eustachian tubes, causing deafness; burrowing in

the vocal cords, causing boarseness, usurping the proper structure of the bronchial tubes ending in pulmonary consumption and death. To effect a cure the parasite must be removed or destroyed, hence inhalants and snuffs are werthless. Some time since a well known physician of 40 years standing, after much experimenting, suc eceded in discovering the necessary combination of ingredients, which never fails in absolutely and permanently eradicating this horrible disease whether standing for one year or forty years. Sufferers should, without delay. communicate with the business manager, Mr A. H. Dixon, 307 King St. West, Toronto, and
