A boy foiled two burgiars at Johnston, R. They had stolen \$1,500 in a box from a house, and were making off when Willie Page, aged 14, gave chase. They separated, and he overtook the one with the swag. Then he boldly aimed his umbrella, and cried: "Drop it, or I'll shoot." It was too dark to tell an umbrella from a gun, and the | See the wheeler with his wheel, command was obeyed.

The Supreme Court of Pensylvania holds . that a ticket is not invalidated, as a title to a ride, by having been purchased from a person not an authorized agent of the railroad nor can a theatre manager legally refuse admission on a ticket because it has passed through the hands of a speculator. Stipulations to the contrary, as printed on tickets, are of no account.

and four square miles, and contains at the | On his wheel, wheel, wheel, wheel, wheel, present day not less than 400,000 inhabitants. The Citadel affords pleasant as well as historic and dignified quarters to the Hear the tinkling of his bell. victors of Tel-El-Kebir. Even in the hottest part of the year it is cool among the alabaster columns and upon the marbled courts and galleries of the Mehemet Ali Mosque which is the chapel of the fortress. The reason given for killing wounded men

at the battle of Tel el-Kebir is that in that country people do not cease fighting when they are wounded but shoot a man when they can. This is called treachery, and so it would be in Europe where the lives of the wounded that the battle is to be fought to the death without mercy, the conduct of these barbarians shows pluck rather than treachery.

Mr. Hammond, engineer and general manager of an important Brazilian railroad, bears strong testimony to the value of coffee as a preventive against miasmatic fevers. He instances the case of Father Vaughan, who, on a journey through a most unhealthy country from Panama to the River Platte, considered that he owed his health to taking en considerably.

A movement is on foot in Cairo to have Egypt declared independent of Turkey. All the Powers but Russia and France are said to approve the plan to do away with joint control in Egypt. The breach between the Sultan and the Khedive is widening, and recruiting for the Khedive's Body Guard at Constantinople has been stopped. Turkey is intriguing against continued British occupancy of Egypt. Arabi's counsel has demanded trial by a mixed English and Egyptian tribunal or by an Ottoman Court, as his life is not safe in an Egyptian prison. Another of those remorseless agents of

The Wheel.

BY A MAN WHO WAS NEVER ON A BICYCLE. Silent wheel, How many murd'rous thoughts pass through

our mind as past he steals. As he glides along the pave, With the silence of the grave, And the crystallinic glittering of his nickel plated steel

Bursts upon th' enraptured sight. As it flashes dazzling bright, Till the gamins with delight, (Which the ordinary mortal and pedestrian cannot feel).

Yell out "See the blooming hijit on his altitood'nous wheel. Cairo occupies an area of between three | On his lofty, and exalted and velocipadic wheel, wheel, wheel, On his lofty and velocipedic wheel."

As it warns the folks to give him room before he gives them—Tophet. And he dings it all the while,

With a feeble, vacant smile. As he works his number twelves in a rythmic kind of style, And the people, Ah! they think, When they hear that tinkle tink,

Here comes old Darwin's lost one! Here comes the missing link." And they positively feel Like smashing up his wheel, And implanting on his pantaloons some wounds

that wouldn't heal, are spared, but if their understanding is That would cause him to stand upright as he takes his mid-day meal, And would give him heaps of trouble as he sat upon his wheel, On his wheel, wheel, wheel, wheel, wheel,

wheel, wheel, On his nickel-plated, highly-polished wheel.

MY FIRST FEE.

strong coffee, and mentions that since the original when I mention that my father was am afraid this is not in my line." try vicarage seems a marvel to me when I herit asthma or bronchitis. Fact." upon. My aunt's husband, a Scotchman he only laughed at my gratitude. and an-M. D. in a country town, said he would bring me up in his own profession,

At last I could bear it no longer, and one day I determined to come to an understanding with him. I am sorry to say this ended in a regular quarrel, and I declared I would seek my fortunes in London. My uncle called me all sorts of names, which, as they

"I should like to know, sir, how you are thought, and thus I left my uncle's house,

a penny of his money. next encountered; the applause of the other twelve as to my conduct, and the regrets of my father, who had fancied I, at least, was off his mind, and lastly, the difficulty of finding anyone to lend me some money wherewith to make a start. I meant to begin at once in good style; nothing venture, nothing have, and I was determined to have one of

the best practices in town. At last a part of my dream was realized. But yet it was all very well to be the occupant of a respectable-looking house in a quiet London square; to have gone to the expense of a brass plate on which was neatly engraved, "Dr. Arthur Merrifield;" furthere, why should not old girls adopt the ther to have engaged a worthy middle-aged same fashion?' She is advised by a lawyer female to answer the door, if the door-bell that California has no law under which she had ever been rung and the master inquired can be prevented from dressing in that fa- for. It was toward 4 o'clock on a winter's afternoon that a carriage and pair dashed up by, Herbert Lane, the lad thus injured, white slave, and repay, with hard labor, to my door; then a grand forman jumped down from the box and gave the correct anshot him has been put in prison, as he ought. considerably, but time went on and still my time to escape to my den before the front nouncement of my first patient; I had just The latest bit of legal sensational news is uncle never spoke a word about money door was opened. I heard voices, then a that Sergeant Ballantine has been asked to affairs. I was more than a partner as to loud cough, then doors being closed. Yes -my first patient had come. In another moment his card was handed to me, and on it was written:

"Mr. Jonathan Dillon."

I entered the room in my most profession al manner, and looking straight before me at once saw what was unmistakably "old Dillon," but, so much wrapped up that little more than a quarter of his face was visible. I can honestly say I never noticed Miss Dillon till her father himself waved a small fat hand in her direction, saving :

"My daughter, Dr. Mercifield; she always comes with me wherever I go, for I am so infirm I don't think it safe to be left alone -but she enjoys excellent health." This last remark was said in a most deplorable much more than 19 years old. Her fore- er-" "Where there's a will there's a way," I head was encircled with the most golden hair I had ever seen, and her face, though not what could be called extremely beauti-I will pass over the many difficulties I ful, was yet one of the sweetest I had ever gazed at. The expression was so simple, the large blue eyes were so innocent and shy, that for a moment I was completely lost in

> Miss Dillon was evidently very retiring, and at this moment also feeling de trop. "I dare say, Dr. Merrifield," she said hurriedly, blushing up to the roots of her hair, "that there is a room I might sit in while you hold your consultation. Papa rever likes me to leave him alone a minute, will do." I bowed, and rang the bell, say-

wondering how such a man as the one before

me had any right so possess such a daughter.

ing, in as cam a tode as possible: "Show Miss Dillon into the study." The vision of fair hair having disappeared, I gave myself up to the examination of my patient. After a careful inquiry I came to a conclusion which made me certain that this was the last time I should see Mr. Dillon. The truth being there was nothing much the matter with him, that the old man was a ailments were imaginary. But yet, come what might, I must speak the truth; even for the sake of further fees, I must not give a dishonest opinion. I would not be the first

of thirteen to act a lie. Mr. Dillon now began to give me a minute account of his ailments, and to repeat the

advice of various doctors. "And now, Dr. Merrifield, I feel sure you will agree with me in thinking it absolutely imperative that I should leave England at once, to cure this troublesome cough.' If only I could have agreed with him ; but

"Quite the contrary," I said, calmly. think you should stay in England, the finest and most healthy climate for a constitution " Bless me! Bless me!" ejaculated Mr.

Dillon, looking distress d. "Do you really "Without a shadow of a doubt, sir." Y "But about exercise? I ought to take

ery little of course ?" "Not at all; the more you take the better will be for you.' "You are quite unique, sir, in your opinion-remarkable! But about a prescription,

me, to allay this cough, for instance ?" "No." I answered, "any ordinary lozenge death warrant; or rather I thought I knew; tressed at her trouble. for what was my surprise when Mr. Dillon

Italians in South America.

The great current of Italian emigration has till now been directed to South America, and especially La Plata. In the republic of habitants, and there land at Montevideo The celebrated hygienist, Signor Paolo Mantegazza, wrote, not long ago, that on arriving there one seemed to be transported into an Italian colony. The boatman who landed you, the porter who carried your baggage, the hotel keepers, all were Italians. Italian emigration develops enormously on the other shore of the estuary of La Plata. It is calculated that from 1857 to 1875 more 1875 onward the average annual number of ling the bounty." emigrants is 40,000. Therefore, in a period | The Steamboat Inspectors at Toronto are of twenty-five years there is a total of 850,000 apparently determined to do all in their emigrants, of whom quite a third are of power to prevent an "Asia" sailing from Italian emigration to Buenos Ayres amounted steamboat to prevent her running they have to 1,000 persons a week. maritime canal running from the ocean to the Mediterranean. A commission appointed to examine this first project decided upon the urgency of studying it. M. Duclere's de Bearn's vast conception, because if it partments of France it would injure the avoids, like that of M. de Bearn, the passage will certainly never face this terrible gulf toget up a canal that will never be anything a seaport, we must study the question in a project is conceived in an exclusively French spirit. This vast conception ought to supplant all questions of local interest, for it makes Paris a great seaport of transit from east to west, and why should this project be impracticable, and why should they be unable to execute this canal, which would be supplied by the three largest rivers of France-the Seine, the Loire, and the Rhone? Indeed, it would be a chain a mountains to cross, but could there not be found on the higher point different terrents, the waters of which could be easily used for the supply of the canal? Besides, M. de Bearn gives us the solution

of the problem in a memoir which appeared two years ago. A glance at the map of

Rapid Photography. The practicability of photographing landscapes from the window of a train running at forty miles an hour has been recently proved by Dr. Caudeze, who uses what he calls a gyrograph for the purpose. The apparatus comprises a copper tube similar to that which carries the lenses in ordinary cameras. but the lenses are placed on opposite sides parallel to the axis. Within is a shutter similar to the box of a stopcock; it presents two quadrangular apertures, which, according to the position of the shutter, do or do not let pass the light rays in making a quarter of a turn. This rotatory movement is obtained by means of a spring liberated from a catch. An exposure of only 1-100th of a second may be had. With a little practice wonderfully distinct views can be obtained from the apparatus.
