the New York and Paris stock markets icas reas ed London. The Vienna police have discovered in the Losse of a unin named Howarth, in little Pesth, 600 cartridges, a number of hand

grenades and other explos ves. The Boers according to a Durban telsgram, attacked and completely defeated Montsiva and occupied his territory. Montsiva has retired to a small tract of country.

A Vienna despatch says: Baron Conard, who was unsuccessfully shot at on Thursday is Governor of Spalsto. It seems there have been difficulties with the Italian element of the population.

A letter dated Cairo has been received in London from Dr. Schweinfurth, in which he states that General Stone Pasha will probably be chief of staff in the army being organized for services in Soudan against the False Prophet.

M. Saint Paul has offered the French Academy the sum & 21,000 francs to found a prize for the discovery of a cure for diphtheria. The competition is open to all the world, and is not even confined to the medical profession.

The official report of Sir Henry Halford Captain of the British Rifle Team, which participated in the cont.st at Creedmoor in September, mentions the extreme kindness and hospitality shown to the team by every section of American society.

A deputation representing the Indian contingent lately serving in Egypt has arrived in England. It consists of fourteen native officers, seven non-commissioned officers, and more recent statistics from other sources, daily life in manhood's years. ten privates, who act as orderlies and ser- and we are bound to confess that facts as Spurgeon, in one of his sermons, remarks : railway competition as possible, in order to vants. They will be received by the Queen.

The Australian Medical Journal tells of a

man whose skull, measuring 31 inches by 1 inch, had been carried away by a circular | periods there would be an increase of 44 per saw. His wound healed easily in 27 days, and he put up with a bald head with much equanimity. The paper describes him as being of "a placid and unexcitable temperament," and the surgeons seem to think he was somewhat amused by the accident.

It is stated in Copenhagen on good authority, in consequence of the report of the loss of the Danish exploring vessel "Dymphna," the Minister of Marine has requested the Russian Government to co-operate in a search for the missing vessel. The organization is contemplated of a private search expedition under Larsen, who participated in the "Jeannette" expedition.

A man was caught by the hands in a bear dragged the trap a short distance toward a settlement, and unfortunately fell exhausted in a spot which those searching for the missing trap did not reach. There he died of starvation, and his skeleton, held fast by the wrist bones, has been found after the lapse of

According to the Medical Times and Gazette, the oyster contains fourteen per cent. of flesh-forming material, this amount b ing almost precisely the amount obtained from the egg. Lean beet contains but five per cent, more of muscle-making matter and but two per cent. more of fat than the oyster. Among the many thousand species of shell fish there are only two or three known to be poisonous; yet but few kinds, such as cockles, periwinkles, and mussels, are used besides clams and oysters. The consumption of periwinkles in London often amounts to 2,000 bushels weekly.

#### To Kata.

O you darling little Kata!
How I long to get a sight
Of my bright eyed little daisy. And to hold her fast and tight.

Little one, how much I miss you, How I long for your embrace, For your eyes that glance and sparkle,

How they dance about your eyes, love ; How they dimple round your lips; How they hide in every dimple Made by Cupid's finger tips!

And the kisses in your face!

I shall steal them everyone, love, So take care and keep a store In that cave of pearl and cora!

I shall want next time the more! C. F. L.

Does Vaccination avail against Small-
