The Resenc of Niagara.

The summer saw a vigorous revival in the press of the effort to arouse public attention to the necessity of an immediate effort to save Niagara Falls. The rocky precipice, indeed, is not giving way, a:d the volume of spectacle upon the continent. But it is and talked thus with the proprietor : Rock and water and rapid and cloud may be | married through your concern?" I asked | there unchanged. But they are practically him. they are not seen, and seen with due per-

prove the assertion that sanitary effort-

As the result of sanitary science he said the death rate in England has been decreased 12 per cent in urban and 84 in rural districts. The number who survive youth by reaching the age of twenty has been increased 12 percent during the last few years, while the number of those who pass from twenty to thirty-five years has been increased 12.2. 10 in the same period. Two hundred years ago in Eugland, small pox, when it became prevalent, killed 96 out of every 1,000, and 664 in Germany. Now the mortality from this cause is less than 1 in 1,000 in England. and 664 in Germany, and such a visitation be known again until sanitary science became a thing unknown. The number of deaths from typhus had been reduced in true of any other disease. Indeed it had, he said, come to be the belief of scientific and thoughtful men that preventable sickness unprevented is a crime against God. He regarded the outlook for the progress of sanitary reform as increasingly favorable and the grounds of encouragement he cited the discovery of remedies for splene fever in domestic animals, the prevention of disease by the extension of the method of inoculation tried successfully upon animals, to the human race, and the discovery of the bacillus, which is the cause of consumption, giving hope that this dreadful disease, from which one-seventh of the deaths in the homan family take place, may yet be found ourable. Another ground of enecuragement was that the question of public health was every where receiving attention, as was evidenced by the recent World's Sanitary Congress, where all the civilized nations of the earth were represented, and also the gen-ral organization of State Boards of Health. In alluding to discouragements, he spoke of the indifference to Congress and the Executive to the claims and importance of the National Board of Health, and argued that the present time when yellow fever and small pox were both liable to become epidemic, and a visitation of Asiatic cholera a fit occasion for neglecting any sanitary measure that had hitherto been found bene-

Where He Got Smith. One day several years ago, an Eastern man dropped into a village in this State and made known the fact that he was anxious to purchase a general store. There were several in the town, and all willing to sell, but the stranger said he would hang around for a few days to see how much business was being done. One of the dealers, named Smith, saw where a little extra work might count for a good deal, and he called in a fellow-townsman named Gilbert, and said "Now, Gilbert, I want to sell, and I want to give that Eastern chap an idea that am doing a staving cash business. Here is \$20 and I want you to come in about 4 o'-

clock and trade it out in sugar and tea, and say that you'll send for the stuff to-morrow." Gilbert pocketed the cash and was on and at the hour named. The stranger was in the store with his eyes wide open, and Gilbert walked in and called out:

"Say Smith, I'm coming in to-morrow to pay you that \$75." "That's all right," was the reply. "Want

anything to-day?" "Well, I might look at an overcoat." Smith winked and winked, but Gilbert ly found one to suit. Then he helped himself to a pair of boots and a hat, and laying for the first time. down the \$20 he remarked :

PEARLS OF TRUTH.

On every banner blazon bright "For work and truth and love we fight." Honor pledges us to morality, fame still more, and power most of all.

To do good which is really good, a man must act from the love of good, and not with "The world and all things in it are valu-

able, but the most valuable thing in the world is a virtuous woman."-MOHAMMED. Many a small man never ceases talking about the small sacrifices he makes; but he

The latest of the "Round Robin " series of novels published by James R. Osgood and Co., of Boston, deals with the subject, which though difficult to treat in this form, is discussed with skill and moderation. In "Doctor Ben" the author insists that insanity is simply sickness and nothing more; that, if a sickness, it is subject to remedy the same as all other diseases. and that slowly a few men are finding their went out on the platform and got acquaint- attention to this they would have escaped way to the causes and the cure. Time was when to be insane was to be branded like a horse-trading, buying and selling, and every. "How about cards? Do you ever play criminal, or what is worse, regarded as under some direct curse at the hand of God. These gross and superstitious views are passing away as men see that remedy for insanity is attainable. While the views of the author clearly appear, they are not put forward with such prominence as to detract from the interest in the book as a novel. The hero, just before his wedding, is stricken down by an accident, which results in insanity. The villa n of the story is a rival | which becomes pale and colorless as the disease for the hand of his affianced and yields to a temptation to spirit the afflicted young man away. He places him in a private asylum, supposing no more will be heard of him and that the possession of the heroine will tall to himself. Nature and science, however, triumph against the probabilities and the young man, long supposed to be dead, recovers, and is restored in spite of the mystification that is thrown round his case. The story is well worked out, and-to Canadian caders-not the least interesting feature of it is that the plot is altogether laid in Canada. The home of the hero is in a village u Western Ontario, and much of the plotting is appropriately carried out in Toronto. We are informed that a case very similar to the one forming the ground work of the story, actually occurred some years ago in the village of Fergus.

Kidney Complaints.

DISEASE OF THE KIDNEYS. The symptoms of an acute attack of inflammation of the kidneys are as follows: Fever, pain in the small of the back, and thence shooting downward; numbness of the thigh, vomiting, usually at first a deep red color of the urine, increases, and is discharged very often with pain and difficulty; costiveness, and some degree of colic. In chronic diseases of the Kidneys the sympto Es are pain in the back and limbs, dryness of the skin, frequent urinations (especially at night), general dropsy, headache, dizziness of sight, indigestion, and palpitation of the heart, gradual loss of strength, paleness and puffiness of the face cough and shortness of

In diseases of the Kidneys the VEGETINE gives immediate relief. It has never failed to cure when it is taken regularly and directions followed. In many cases it may take several bottles, especially cases of long standing. It acts directly upon the secretions, cleansing and strengthening, removing all obstructions and impurities .- A great many can testify to cases of long standing having been perfectly cured by the VEGRTINE, even after trying many of the known remedies which are said to be ex-

Zopesa. Zopesa was introduced in America two years ago. Large quantities have been used for Dys-

pepsia, and as a panacea for the Liver, and the manufacturers have yet to hear of a single case of Dyspepsia or Biliousness, when Zoresa was used as directed, in which it was not more than satisfactory. Many write that it is a won-derful remedy. We can show where as high as 40 pounds were gained by its use in break-ing up chronic Biliousness and Dyspepsia. Its friends increase very fast, and all who use as directed are surprised and gratified.

tions for money from farmers a specialty. Rents | by the presence and development of the vegetable parasite amceba in the internal lining membrane of the nose. This parasite is only de veloped under favorable circumstances, and these are : morbid state of the blood, as the blighted corpuscle of tubercle, the germ poison of syphilis, mercury, toxosmea, from retention of the effeted matter of the skin, suppressed perspiration, badly ventilated sleeping apartments, and other poisons that are germinated in the blood. These poisons keep the internal lining membrane of the nose in a constant state of irritation, ever ready for the deposit of the seeds of these germs, which spread up the nostrils and down the fauces or back part of the mouth causing ulceration of the throat; up the eustachian tubes, causing deafness; burrowing in the vocal cords, causing hoarseness, usurping the proper structure of the bronchial tubes ending in pulmonary consumption and death. To effect a cure the parasite must be removed

or destroyed, hence inhalants and snuffs are Some time since a well known physician of 40 years standing, after much experimenting, succeeded in discovering the necessary combination of ingredients, which never fails in absolutely and permanently cradicating this horri-ble disease whether standing for one year or forty years. Suiferers should, without delay communicate with the pusiness manager, Mr.

All the purposes of a Family Physic,

Dropsy, Tetter, Tumors and Salt Rheum, Worms, Gont, Neuralgia, as a Dinner Pill, and Purifying the Blood, are the most congenial purgative yet per-fected. Their effects abundantly show how much they excel all other Pills. They are safe and pleasant to take, but powerful to cure. They purge out the foul humors of the blood; they stimulate the sluggish or disorded organs into action; and they impart health and tone to the whole being. They cure not only the every day complaints of every body, but formidable and dangerous diseases. Most skilful physicians, most eminent elergymen, and our best citizens send certificates of cures performed, and regreat benefits derived from these Pills. They are the safest and best physic for children, because mild as well as effectual. Below coated, they are easy to sake; applies.

Vegetable, they are easy to sake; appliess.
