Immense demand for Vegetine

We are not at all surprised to learn that the demand of the people everywhere for that famous medicine, Vegetine, is constantly becoming more and more extended. It has long been in demand all over our own country, and had some time ago made its way into various foreign lands. At the present time the esteem-ed proprietor, Mr. H. R. Stevens, of Boston, is sending it to order to some of the remotest forthe judicious use of the Oil causing rapid growth."

In Signor Berti's plan for re-foresting Italy about \$9,000,000 is apportioned among ishing, and, at this day, world-renowned medicine, in speedily effecting cures of the very numerous diseases or ills for which it was de-clared to be a remedy, that people everywhere were open and decided in expressing their opinion that this "patent medicine" must not only be ranked equal with but altogether superior to, all the regular "doctors' stuff" that had ever been given in siekess.

There was and there could be no dispute medicine. The doctors could not deny themespecially as many of such cures had been effected in the most respectable, wealthy and well-known families, where the suffering invalids had obtained and taken the Vegetine as a last resort, after the regular physicians had utterly failed to do them any good. Moreover, testimonial letters from perfectly well-known persons in high standing and o undoubted character and veracity began to pour in upon Mr. H. R. Stevens, the proprie tor, in abundance, declaring, and often with the deepest gratitude, the surprising cures wrought by the great medicine. Such testimonials have continued to flow i

upon Mr. Stevens, from first to last, until he has enough to make volumes were he to print them all. But he don't publish even in the newspapers, only a small fraction of them. Is it any wonder, then, that the sale of Vegetine is now increasingly at a surprising rapid rate?— Providence (R. I.) Gazette.

KIDNEYS, LIVER AND URINARY ORGANS THE BEST BLOOD PURIFIER.

There is only one way by which any dis-case can be cared, and that is by removing the cause-wherever it may be. The great medical authorities of the day declare that nearly every disease is caused by deranged kidneys or liver. To restore these therefore is the only way by which health can be secured.
