Keep your eye on the place,-

The Fencion Falls Gazette Saturday, Nov'r 24th, 1883.

The Canal.

During the period of nearly two months that has elapsed since we last noticed the progress made upon the canal, work has apparently proceeded somewhat more slowly than usual; but a considerable addition has been made to the lock walls, a large supply of cut stone has been received and landed, and lock is already so full of stone that 1884 there is barely room left for the men to A Long Delay.- Last Monday we work, and the barges which have been went to Lindsay, intending to return in will be kept on through the winter second class car left promptly at the months, some of them excavating above | time appointed, but did not reach the Office next door to the MeArthur the locks and others working at the Falls until 9:25, having been detained ned his diving suit, in which he is a head-quarters. most terrific looking monster, and went no leakage. A good many persons were ning to the spot they were horrified to him in his novel costume should lose no of his death. time in doing so, as he is not likely to be here more than half of next week, and perhaps not leter than Tuesday.

The Pulp Mill.

The Pulp Manufacturing Co's block of buildings on the shore of Cameron Lake in this village is rapidly approaching completion and will be ready to commence operations in about a month. We have been endeavouring for some time past to give a description of it, and went down on Thursday for the purpose of taking notes; but found that have to be commenced earlier in the valve and allow the steam to escape. Office established in Lindsay nearly week. A great many men were busily The Imperial Insurance Company, of Lon | that the first carload of pulp has been | building that the whole will have the | metal. Mr. Swinton declares that it

REMOVAL .- We forgot to notice, as we ought to have done a week or two ago, that Mr. A. Laliberte, tailor, has removed to the shop lately occupied by Mr. Heeley, near the Mcchanics' Institute, where he will be happy to receive A PASSENGER COACH TELESCOPED BY A a call from all in need of his services.

VENISON .- Everybody says that deer are very plentiful out north this year. and persons who can spare time to go hunting are having fine sport. Last Tuesday morning Mr. John Schell, of Somerville, brought three to the Falls by train, and sold them to Austin Bros. butchers, who cut up two and sent the other to Mr. J. E. Dunham, hotel keeper at Cobourg.

EXTENDING HIS BUSINESS .- Mr. Jo eph Heard, who recently moved into his new shop on the east side of Colborne street, and who has hitherto dealt exclusively in tinware, stoves &c., has lately added a large and well assorted stock of hardware, and-like a wise man-doubled his advertising space in the Gazette, as will be seen by referring to the third page of this issue.

THE WEATHER .- As noticed in our last issue, winter set in on the 11th inst., but just a week later there came a change, and now the snow is all gone and the roads are covered with mud. So little rain had fallen before the sud den cold that many predicted a water famine, but the wells are beginning to fill again, and, it is to be hoped, will

contain a sufficient supply all winter. MUDDY CROSSINGS -The Colborne a good deal of what may be termed street crossings are frightfully muddy, aquatic labour has been done at the in consequence of being below the level lower end of the cut. The snowstorm of the roadway, which was raised last which set in during the night of the summer. It is not likely anything will 11th inst. put a sudden and effectual | be done to them this year, and the mud stop to the wall building, and some of will no doubt soon be frozen; but we the masons were sent to the Bobcaygeon | note their condition in order that ou quarry, where they will be engaged all | village authorities may include the cost winter, weather permitting. Railway Horror.

FREIGHT ENGINE.

OTTAWA, Ill., Nov. 16 .- A passenger train on the Chicago, Burlington & Quincy Railroad collided with a freight tiain this afternoon near Streator. The mail train was signalled three miles from Streator by a switchman who was unloading ballast from a train of flat cars. The passenger train stopped. The rear brakeman went back to flag anything that might be following, but he had not got more than one or two car lengths when the extra freight train rounded the curve, and was upon the mail train in an instant. The freight engine struck the rear passenger coach and completely telescoped it. Twenty persons were in the car, of whom several were crushed and scalded to death, and few escaped unhurt. The engine completely imbedded itself in the car, the passengers being thrown forward and then the boiler exploded, one piece of it being forced entirely through the car. The car was filled with steam and boiling water,

A Child's Head Blown to Pieces.

Belleville. Nov. 19 .- A shocking tragedy has occurred about four miles from Madoc. A young lad 14 years of age, son of the late James Moore, was playing in his mother's house with a neighbour's shot-gun when loaded. The boy put the end of the barrel in his mouth and began to blow, when a companion lighted a match and applied it to the nipple. The unfortunate boy's head was blown to pieges. The test applied to see if the gun was loaded probably consisted in their minds in seeing if blowing in a tube could extin-

Forests Laid Flat.

Bangor, Me., Nov. 15th. - The first reports of the damage by the gale gave but a slight idea of the havoc wrought. The calamity appears to be of great magnitude. The greatest damage appears to have been within a belt some miles wide crossing Piscatigins gounty and northern Penobscot into Aroostook. Great stretches of forest were levelled lions of valuable timber destroyed. Whole townships in some instances are said to be nearly flat. The loss is certainly several hundred thousand, and one well known lumberman estimates the total damage throughout the state at a round million.

The Transportation of Potatoes.

The problem of safely transporting potatoes in cars during the winter time, which has always been a serious one to many of the Northern railroads, is said to have been solved by the Eastern WHAT JACK FROST DID .- A few road. Hitherto the custom has been to evenings ago, after working hours, the place an ordinary stove in the car, and steam whistle on Sandford's carriage trust to luck for the maintenance of the works, suddenly commenced to blow so | fire during the journey. The Marquis of Lansdowne and the

Farmers.

OTTAWA, Nov. 15 .- In reply to the address which was presented to Lord Every one knows that when there is Lansdowne this forenoon, by the Coun-

Tortured By Robbers.

AN OLD MAN'S FEET PLACED IN A FIRE AND ROASTED.

DENVER, Col., Nov. 15th .- Peterson Olsen's house, at Peterburg Grove, seven miles from the city, last night was visited by four disguised men, who seized Olsen, threw him on the floor, and demanded to know where his money was concealed. He replied he had none. After thoroughly searching the house to no purpose the robbers got willow switches and whipped his bare feet and legs until covered with blood. Still refusing, they built a large fire in the back yard and carried Olsen out, and proceeded to execute their threat to roast him alive. They placed his feet in the fire and literally roasted them Even this terrible treatment would not open his mouth. The old man was then compelled to walk back to the house, where a scuffle ensued, during which the stove was overturned, disclosing the money box containing \$600, which the robbers took and decamped.

The Queen's Cattle.

The Queen has been very successful at local shows during the past summer with her polled cattle, reared at Abergeldie Mains, and she has given instructions to Dr. Profeit to select three of the best specimens of the herd for presentation at Smithfield. Her Majesty is anxious, says the World, to possess a | Spectacles in Lindsay, and it will pay you herd of "polls" second to none in the to buy what you want in these lines from country, and has given her commissioner carte blanche, whenever he sees a fa- | class of goods than any place in town. vourable opportunity of adding to the stock, on no account to neglect it. Abergeldie has already excited the envy of the Deeside farmers, and the personal interest the Queen takes in her cattle has led them to regard her almost as one of themseives.

A Useful Invention.

Mr. Copeman, the inventor of the raft upon which he and a party of adventurers crossed the channel from Dover to Calais, states that the raft he used can be carried on the deck of all large passenger steamers in the form of seats placed back to back with an interval between, and attached together with cross spar. In case of sudden emergency nothing remains but to cut away the lashings from the deck, and shoot it over the side, or cling to it as the ship goes down. The mast and oars will be found lashed behind at the back of the seats, and water and provisions sufficient for ten or twelve persons for a week are stowed away in the body of the seats. The raft is capable of support- Cloth Testers, &c. ing thirty persons on board, and more than twice that number clinging to it in the water, by means of life lines attached to the outermost side of the seats.

Scarlet Fever Origin.

A somewhat startling theory of the origin of searlet fever is propounded by among horses, and that each case of only reliable goods at this disease may be ultimately traced to these animals. The arguments, facts and data furnished to fortify the theory are formidable, and will go far to convince inquirers. Should this discovery be amply verified, the time may come when equine virus must be used for purposes of inoculation, and the scourge of childhood may be averted, as the small-pox now is, by skilful physicians
