FOR THE FARMER.

Wounds.

There are two principal methods by which wounds are repaired. The first of these, and the more favourable of the two, is the method termed by surgeons healing by the first intention. Under favourable circumstances this takes place in an incised wound when the cut surfaces are smile which could light up his dark counbrought carefully together and maintain-

method. Sutures are simply stitches used prevailing over France than he was at his to tie or sew the edges or surfaces of a own misfortunes; and that the communiwound together. They are used of vari- ists should have committed such horrors ous materials, such as thread, horse-hair, in the presence of their enemies, the cat-gut, and wire. Nothing further need Prussian armies, appeared to him the be said about the application of these, very acme of humiliation and of national since their insertion into a wound should infomy. On Jan. 9, 1874, he died, in the always be left to a veterinary surgeon.
