Will Prohibition Prohibit?

For some time after the Scott Act was passed in this county there was a good deal of argument as to whether, when the time should come for its enforcement, it could be enforced or not; its opponents vehemently declaring, and quoting alleged facts to prove, that prohibition, whether partial or total, had been a failure wherever tried. TOWN DEPRIVED OF DOCTORS, BUTCH-ER, BAKER, AND GRAVEDIGGER.

Here is a translation from a Valencian paper :- "In the Province of Valencia the place which has comparatively suffered most is Torres, situated about ten kilometres from Sagunto, containing about 800 inhabitants. In the place itself there are neither doctors nor dispensary, but medical assistance and medicines were supplied from Algimia, where the cholera was also raging-very soon the former also failed them, for of the two dectors one died of the disease, and the other, after losing his wife, was attacked by the terrible epidemic. As these towns and that of Alfara de Algimia were thus deprived of medical aid, the Mayor went to Valencia to lay the State of the case before the Governor and pray for help. On his return he fell a victim to the scourge. The panic was increasing. The butcher and his family died, and the town remained wasn't all. The Times makes public facts which have long been quietly known as follows: -A great blow has fallen upon English agricultural industry in the destruction of the profit hitherto realized from the manufacture of high quality cheese. American competition has at last ruined fatigable dairy farmers of Cheshire, prices having fallen from 15 to 20 shillings per hundredweight, bringing down the market to figures at which it would not be remunerative to continue business. What effect this may have upon husbandry and the great cheese-making centres in England cannot be calculated, but a great reduction in the value of dairy farms may be expected. It cannot be said that superior quality in the products is a remedy for unprofitable cheese-making, for the overwhelming fall has occurred in the price of the very best "Cheshire." Farmers are dismayed at the outlook for the very branch of husbandry which has been regarded as the mainstay of British agriculturists.
