Ignorance Regarding Hydrophobia

There is probably more ignorance abroad in the land relative to hpdrophobia than almost any other disease that man or beast is heir to. It is quite safe to say that on an average of fifty dogskilled as rabid not more than one had the real rables or hydrophobia. Most of the dogs killed as mad are simply afflicted with fits. A dog is seen running around aimlessly, snapping its jaws, from which foam is exuding, and immediately the cry of " mad dog" is raised, and the animal is killed. Should anyone be bitten visions of a horrible death from hydrophobis are conjured up, and for weeks and months the victim lives in a constant torture of fear. Now dogs are subject to fits, especially in certain stages of distemper, and from other canses, and the symptoms of the missile cutting his coachman's face open a disease are as above stated. Dogs never be little later. come mad suddenly. The disease progressce slowly, and the symptoms are readily discernible to one posted. The dog shows a great fear of light, hiding away in dark places, and comes out very reluctantly and only at the stern commands of its master. It develops an abnormal appetite, eating boards, and even pieces of old sheet iron, tin, &c. It shows great nervousness, starting suddenly in apparent great fear of something. Its cost becomes dull and rough. Finally, It shows a great horror for water. and then begins to wander around snapping at objects aimlessly. It seldom moves with much speed. Its head is generally held low, its tall carried well between its legs, and its back arched. One who has seen a real mad dog will never confound it with the animal charging around with fits. When three or four of the above symptoms develop themselves, it is the part of prudence to them all that they had been able to find. No. England will assuredly come to terms not been described.

and other roughs," says an Oxford paper. When Spain held despotic sway over South America, from Panama to Cape Horn, the men or their descendants who, after the "Pursue de study of pollytical economy, disastrous Cromwellian and Williamite

It lately came to light in the English probate Court that a man named Pound had lived with two wives for fifteen years. He divided his time between them, and each thought when he was absent that he was away on business. He was on the happlest terms with both. He passed with one wife as Mr. Jackson, and bequeathed her money under that name. It was agreed that the property he acquired under the name of Pound should go to wife Pound, and that under Jackson to wife Jackson. But for his testamentary dispositions, the women would

probably have been in ignorance of the real state of things to this hour. The other day there left Dublin for Galnomenon, viz. : a respectable young man to be accompanied everywhere by an interpreter. The young man is a native of the Island of Boffin, off the Connemara coast, where, out of some six or seven hundred inhabitants, only nine speak English. On this island they possess a rich treasure of traditional folk lore, old poems, &c. Fifty
