MANAGERIE.

INVALIDS' HOTEL SURGICAL INST

No. 663 Main Street, BUFFALO, N. Y.

Not a Hospital, but a pleasant Remedial Home, organized with

A FULL STAFF OF EIGHTEEN PHYSICIANS AND SURGEONS. And exclusively devoted to the treatment of all Chronic Diseases.

This imposing Establishment was designed and erected to accommodate the large number of invalids who visit Buffalo from

every State and Territory, as well as from many foreign lands, that they may avail themselves of the professional services of at of skilled specialists in medicine and surgery that compose the Faculty of this widely-celebrated institution. A FAIR AND BUSINESS-LIKE OFFER TO INVALIDS.

We earnestly invite you to come, see and examine for yourself, our institutions, appliances, advantages and success in curing chronic diseases. Have a mind of your own. Do not listen to or heed the counsel of skeptical friends or jealous physicians, who know nothing of us, our system of treatment, or means of cure, yet who never lose an opportunity to misrepresent and endeavor to prejudice people against us. We are responsible to you for what we represent, and if you come and visit us, and find that we have misrepresented, in any particular, our institutions, advantages or success, we will promptly refund to you all expenses of your trip. We court honest, sincere investigation, have no secrets, and are only too glad to show all interested and candid people what we are doing for suffering humanity.

NOT ALWAYS NECESSARY TO SEE PATIENTS.

By our original system of diagnosis, we can treat many chronic | examining our patients. In recognizing discuses without a become acquainted with them, show them cur institutions, and familiarize them with our system of treatment, yet we have not seen one person in five hundred whom we have cured. The perfect accuracy with which scientists are enabled to deduce the most minute particulars in their several departments, appears almost miraculous, if we view it in the light of the early ages. Take, for example, the electro-magnetic telegraph, the greatest fivention of the age. Is it not a marvelous degree of accuracy which enables an operator to cractly locate a fracture in a sub-marine cable nearly three thousand miles long? Our venerable "clerk of the weather" has become so thoroughly familiar with the most wayward elements of nature that he can accurately predict their movements. He can sit in Washington and foretell what the weather will be in Florida or New York as well as if several hundred miles did not intervene between him and the places named. And so in all departments of modern science. what is required is the knowledge of certain SIGNS OF signs. From these scientists deduce accurate conclusions regardless of distance. So, also, in medical science, diseases have certain unmistakable signs, or symptoms, and by reason of this fact, we have been enabled to originate and perfect a system of determining, with the greatest accuracy, the nature of chronic diseases, without seeing and personally

diseases fust as successfully without as with a personal con-sultation. While we are always glad to see our patients, and miraculous powers. We obtain our knowledge of the patient's disease by the practical application, to the practice of medi-cine, of well-established principles of modern science. And it is to the accuracy with which this system has endowed us that we owe our almost world-wide reputation of skillfully treating lingering or chronic affections. This system of practice, and the marvelous success which has been attained through it, demonstrate the fact that diseases SUCCESS. through it, demonstrate the fact that diseases display certain phenomena, which, being subjected to scientific analysis, furnish abundant and unmistakable data, to guide the judgment of the skillful practitioner tright in determining the nature of diseased conditions. The most ample resources for treating lingering or chronic diseases, and the greatest skill, are thus placed within the easy reach of every invalid, however distant he or she may reside from the physicians making the treatment of such affections a specialty. Full particulars of our original, scientific system of examining and t.eating patients at a dis-tance are contained in "The People's Common Sense Medical Adviser." By R. V. Pierce, M. D. 1000 pages and over 300 colored and other illustrations. Sent, post-paid, for \$1.50. Or write and describe your symptoms, inclosing ten cents in stamps, and a complete treatise, on your particular discuse, will be sent you, with our terms for treatment and all particulars.

COMMON SENSE AS APPLIED TO MEDICINE.

It is a well-known fact, and one that appeals to the judgment of every thinking person, that the physician who devotes his whole time to the study and investigation of a certain class of diseases, must become befter qualified to treat such diseases than he who attempts to treat every ill to which flesh is heir, without giving special attention to any class of diseases. Men, in all ages of the world, who have become famous, have devoted their lives to some special branch of science, art, or By thorough organization, and subdividing the practice of medicine and surgery in this institution, every invalid is treated

by a specialist—one who devotes his undivided attention to the particular class of diseases to which the case belongs. The advantage of this arrangement must be obvious. Medical science offers a vast field for investigation, and no physician can, within the brief limits of a life-time, achieve the highest degree of success in the treatment of crery malady incident to humanity. OUR FIELD OF SUCCESS.

tion dedicated exclusively to the treatment LUNG DISEASES. the most improved treatment of diseases rous wood-cuts and colored plates. itis, Bronchitis, Asthma, and Consumption, we have made this branch of our institution one of the leading Departments. We have every kind of useful instrument for examining the organs involved, such as rhinoscopes, laryngoscopes, stethoscopes, spirometers, etc., etc., as well as all of the most approved kinds of apparatus for the application of sprays, fungations, atomizations, pulverizations, inhalations, and all other forms of approved medicinal applications.

We publish three separate books on Nasal, Throat and Lung diseases, viz.: A Treatise on Consumption, Laryngitis and Bronchitis; price, postpaid, ten cents; A treatise on Asthma, or Phthisic, giving new and successful treatment; price, postpaid, ten cents; A treatise on Chronic Nasal Catarrh, price, postpaid,

Dyspepsia, "Liver Complaint," Ob-stinate Constipation, Chronic Diar-DISEASES OF Thea, Tape-worms, and kindred affections RICESTION are among those chronic diseases in the sucattained unparalleled success. Many of the distributing in their functions to the process of digestion, are very obscure, and are not infrequently mistaken by both laymen and physicians for other maladies, and treatment is employed directed to the removal of a disease which does not exist. Our Complete Treatise on diseases of the Digestive Organs will be sent to any BRIGHT'S DISEASE, DIABETES, and kindred maladies, have been very largely treated

been pronounced beyond hope. The study and practice of chemical analysis and microscopical which our institution long ago became famous, has naturally led case, and, hence, have been successful in nicely adapting their remedies for the cure of each individual case.

The treatment of diseases of the urinary organs having constituted a prominent branch, or specialty, of our practice at the Invalids' Hotel and Surgical Institute, and, being in constant receipt of numerous inquiries for a complete but concise work on

the nature and curability of these maladies, we have published a large illustrated treatise on these diseases, which will be sent to any address on receipt of ten cents in postage stamps. INFLAMMATION OF THE BLABDER, Gravel, Enlarged Pros-tate Gland, Retention of Urine, and in the cure of which our specialists have achieved n our illustrated pamphlet on Urinary Diseases.

TULE.—Hundreds of cases of the worst form ing false passages, urinary fistule, and other complications, annurefer with pride. To intrust this class of cases to physicians of small experience, is a dangerous proceeding. Many a man has Epileptic Convulsions, or Fits, Pa-

ralysis, or Palsy, Locomotor Ataxia, to, sleep, and threatened insanity, Nervous Debility, arising from overstudy, excesses, and other causes, and every variety of nervous affeceases with a measure of success heretofore regarded as impossible

on beds, and they go home well and strong. Every case consultmost eareful and considerate attention. Byery important case and we get few which have not already baffled the skill of all the

PILES, FISTULA IN ANO, and other diseases affecting the region of the lower bowel, are largely treated, and with marvelous success, by specialists, who give their whole time to the study and treatment of this class of affections. We never fail to cure pile tumors, however large. When the patient can come here for treatment, we will guarantee a cure.

Fortunately for suffering humanity, a method of treatment has been perfected and thoroughly tested in our institutions, by which in from six to fifteen days radical and perfect cures of the worst forms of piles are effected without causing any severe suffering. Send ten cents in stamps for our large illustrated Treatise on Piles. Hernia (Breach), or Rupture, no matter of how long standing, of what size, or what the age of the patient may be (if not under four years), is speedily and radically cured in every case undertaken by our specialists, without the knife, without dependence upon trusses, without pain, and without danger. Het

THROW AWAY awkward, chafing, old trusses, which, at best, give TRUSSES, only partial relief, which never cure, but often inflict TRUSSES, great injury and induce inflammation and strangula-NOT There is no safety in depending upon any kind of truss, though, no doubt, every man who has suffered the agonies SAFE. Both the rupture and the truss keep up a mental struin and induce nervous debility and various organic weaknesses of the

CURES GUARANTEED In every case undertaken. Can any sufferer ask for greater inducements than these?

Notwithstanding the great number of ruptures treated in the three years past, many of them of immense size and of such a character that no other plan of treatment could possibly have succeeded, every case to which this perfected system of treatment has been thoroughly applied, has been perfectly cured. Only a few days residence at the Invalids' Hotel and Surgical institute is

Abundant references, by permission of those whom we have cured, will be furnished to any one wishing to call upon or write An illustrated treatise on Rupture sent to any address uron receipt af ten cents.

DELICATE decline of the manly powers, involuntary wital losses, and kindred affections, are specify theroughly and permanently cured.

To those acquainted with our institutions it is hardly necessary to say that the Invalids' Hotel and Surgical Institute, with the branch establishment located at No. 3 New Oxford Street, London, England, have, for many years, enjoyed the distinction of being the most largely patronized and widely celebrated institutions in the world for the treatment and cure of those affections which arise from youthful indiscretions and pernicious, solitary practices.

We, many years ago, established a special Department for the treatment of these diseases, under the management of some of the most skillful physicians and surgeons on our Staff, in order that all who apply to us might receive all the advantages of a full Council of the most experienced medical men.

WE OFFER We offer no apology for devoting so much attentoo difficult for the skill of our specialists is proved by cures reported in our illustrated treatise on these maladies, to which we refer with pride. To intrust this class of cases to physicians of fession to which we belong. Many who suffer from these terrible diseases contract them innocently. Why any medical man-intent been rufned for life by so doing, while thousands annually lose on doing good, and alleviating suffering, should shun such cases, their lives through unskillful treatment. Send particulars of your | we cannot imagine. Why any one should consider it otherwise case and ten cents in postage stamps, for a large, illustrated trea- | than most bonorable to cure the worst cases of these diseases, we cannot understand; and yet of all the other maladies which afflict mankind there are probably none about which physicians in general practice know so little. We fully agree with the celebrated Dr. Bartholow, who says. " think it a reproach to our profession that this subject has been permitted, in a measure by our own indifference, to pass into the hands of unscrupulous pretenders. Because the subject is distgreeable competent physicians are loath to be concerned with a

We shall, therefore, continue, as beretofore, to treat with our best consideration, sympathy, and skill, all applicants who are suf fering from any of these delicate diseases.
