J. H. HARVEY,

Coboconk,  
Purchaser for H. D. McCaffrey,  
26-t.f. Oswego, N. Y.

#### INSURANCE.

THE ROYAL CANADIAN INSURANCE Co. issues by far the best Farm policy in Canada.

JOHN AUSTIN,

Agent,  
Fenelon Falls, June 12th, 1890. 17.

## —THE— ROYAL CANADIAN INSURANCE COMPANY,

vs.

## THE LONDON MUTUAL, FOR FARMERS.

The Royal Canadian offers the following advantages over the London Mutual:

1. If a building worth \$1200 is insured for say \$1000, the Royal Canadian is obliged to pay \$1000, if a loss occurs. In such a case the London Mutual is obliged to pay only two thirds of the cash value, or \$800.

2. If a horse worth \$90 is killed in the fields by lightning, the Royal Canadian is obliged to pay \$90. The London Mutual pays only \$60.

3. For a cow worth \$30 killed by lightning the Royal Canadian pays \$30. The London Mutual pays only \$20. For other animals the Royal Canadian pays the full value. The London Mutual pays not more than \$5, no matter how valuable the animal may be.

4. In the Royal Canadian animals are insured against lightning while at pasture anywhere. In the London Mutual they are insured while pasturing on the premises of the insured only.

5. When articles are insured specifically, such as musical instruments, the Royal Canadian is obliged to pay the full amount insured up to the cash value of the article. The London Mutual pays only two-thirds of the cash value, no matter what the insurance may be.

6. When "ordinary contents" of out buildings are insured by the Royal Canadian all implements are included. In the London Mutual only one reaper and one mower are included, no matter how good others may be.

7. When the outbuildings are not joined to each other the Royal Canadian insures under one sum the "ordinary contents" of all building not cut off by a distance greater than 40 ft., the same as if the contents were all under one roof. The London Mutual requires a separate sum on the contents of each building, if the distance is more than 12 ft. This is a very important difference in many cases.

8. In the Royal Canadian it is a part of the contract that standard STEAM THRESHERS may be used without a special permit and without any restriction as to the distance from stacks or buildings, caretakers, pails of water, kind of fuel or direction of the wind. Many of the policy holders in the London Mutual were obliged to run their own risk while threshing last season, because it was found to be impossible to comply with the conditions of their permit. When a farmer pays for insurance he should secure a policy which will hold him safe when it is most required.

9. The Royal Canadian is obliged to pay its losses within sixty days and usually takes much less. The London Mutual need not pay for ninety days, and since it has become so hard up as to be obliged to borrow money largely, it usually takes about the full time allowed.

10. The Royal Canadian policy is subject to the statutory conditions only. It has none of the numerous variations against the policy-holder printed in red ink on the back of the London Mutual policy.

11. As to security, the inspector of insurance reports that the Royal Canadian has \$202,758, the amount he estimates to be necessary to enable the company to carry out all its engagements with its policy holders. Besides this he reports that it has to the good the \$400,000 capital paid in cash by the shareholders, and a net surplus of \$117,607 making in all a total cash surplus of \$517,607 to protect its policy-holders against unexpected contingencies. In addition to these cash items it has a subscribed capital of \$100,000 not called up. Regarding the security of the London Mutual the inspector reports that the amount of unearned premium it should have on hand is \$290,309. To make up this amount in cash a second call would have to be made on the premium notes for a large amount, leaving a surplus of only \$74,218, even if there were no bad debts, and this surplus is made up wholly of the unpaid balance of premium notes already heavily assessed. The company reports the losses adjusted but unpaid at the close of the year at \$6,387, but the Inspector of Insurance finds that the liability for unpaid losses at the end of the year was \$20,286. The cash on hand to pay these losses only amounted to \$13,911.

In view of the foregoing facts farmers will have no difficulty in deciding as to the company in which they should be insured. For insurance apply to

**S. CORNELL,**

Agent, Lindsay. 17-3m.

Destructive fires have occurred at several places in Russia.

Sunday work has been discontinued on the St. Clair tunnel.

Smallpox is causing terrible havoc in the interior of Guatemala.

At Portage la Prairie, Manitoba, the wheat market has opened at 85 cents.

Rumors of the dissolution of Parliament in the near future still fly at Ottawa.

Another good vein of phosphate has been found at the Foxton mine, near Kingston.

Patrick O'Neil, who was probably the oldest man in Toronto, died last Sunday at the age of 108.

A hailstorm on Friday night caused great damage to the crops in the vicinity of Devil's Lake, North Dakota.

A wreck on the Missouri, Kansas and Texas railway on the night of the 4th inst. resulted in the killing of six cars of hogs and the burning of eighteen cars of grain. Some one disconnected a switch.

A woman factory inspector in Philadelphia has made four hundred inspections during her service of six months. In nine cases out of ten she found that the operatives did not know where the fire escapes were.

London (Eng.) consumes in a single year over five hundred thousand beef animals, two million sheep, two hundred thousand calves, three hundred thousand hogs, eight million fowls and all other kinds of food in proportion.

A case of feminine daring is related of a Shasta County belle, who rode to the edge of a precipice and defied any one of the party to follow her. Not a man accepted the challenge, but a tantalizing youth stood on his head in the saddle, and dared the lady to do that.

An Auburn, N. Y., woman is said to have hung up a calico wrapper, in the pocket of which was a potato, a year ago. She did not use the wrapper till one day last week, when she discovered a whole hill of potatoes in her pocket. There were seven or eight perfect little tubers.

Away up four thousand feet above the Columbia River, at the base of Mount Adam, six large ice caves have been found. One of these ice caves, the largest one, is used by the farmers as a cold storage warehouse for butter and milk, and answers the purpose admirably.

Bill Moore, a farmer of Atchison, Kansas, wanted to dig a well, so he ploughed a lot of land and planted it in oats. Every day he watched the oats, observing the spots that showed the greatest moisture. Finally he selected a spot and sank a well, and at 24 feet he had a fine stream of water. It is said to be the best well in the county.

Death has an odd way of picking out its victims. A traveller went quietly to bed in a Pennsylvania town a few nights ago, and before morning a loco motive, off the track, ran into the house and killed him as he slept. "Railroad" hotels are usually uncomfortable enough at the best, but it has been supposed that they were safer sleeping places than the track.

An eleven-year-old Montreal boy has had a temporary check put on his ambitious career. A few days ago he went forth on the highway, and with the aid of a loaded revolver and a threatening attitude he held up two good-sized boys. He compelled them to give up \$2 and such personal belongings as they owned. He was soon afterwards captured and sent to the reformatory.

On False Creek, Vancouver, is a tree cut into four 24-foot logs, which is one of the largest specimens of the Douglas fir that has ever been cut in British Columbia, whose record for giants of the forest is world-wide. These four logs were 84 inches, 70 inches and 60 inches respectively, and in none of them was there a knot or other defect. The total number of feet of timber to be cut out of this tree is 28,614.

Miss Amanda Anderson, of Georgia, is 60 years of age, and has never travelled more than a mile and a half from the spot where she was born. Though there is a railroad within three miles of her house she has never seen it. She has never seen a brick house, and has seen a painted house only once. Though her nearest neighbor lives within three hundred yards of her, she has never seen his house except once in her life. She has never been inside of a church or listened to a sermon or a prayer, and her ideas of religion are extremely vague. She is, nevertheless, an intelligent woman, with no eccentricity except that indicated in the above description of her.
