INSURANCE.

THE ROYAL CANADIAN INSURANCE
Co. issues by far the best Farm policy
in Canada.

JOHN AUSTIN,
Agent.
Fenelon Falls, June 12th, 1890. 17.

—THE—
ROYAL CANADIAN
INSURANCE COMPANY,

vs.
THE LONDON MUTUAL,
FOR FARMERS.

The Royal Canadian offers the following
advantages over the London Mutual:

1. If a building worth \$1200 is insured
for say \$1000, the Royal Canadian is oblig-
ed to pay \$1000, if a loss occurs. In such
a case the London Mutual is obliged to pay
only two thirds of the cash value, or \$800.

2. If a horse worth \$90 is killed in the
fields by lightning, the Royal Canadian is
obliged to pay \$90. The London Mutual
pays only \$60.

3. For a cow worth \$30 killed by light-
ning the Royal Canadian pays \$30. The
London Mutual pays only \$20. For other
animals the Royal Canadian pays the full
value. The London Mutual pays not more
than \$5, no matter how valuable the animal
may be.

4. In the Royal Canadian animals are
insured against lightning while at pasture
anywhere. In the London Mutual they are
insured while pasturing on the premises of
the insured only.

5. When articles are insured specifically,
such as musical instruments, the Royal
Canadian is obliged to pay the full amount
insured up to the cash value of the article.
The London Mutual pays only two-third
of the cash value, no matter what the in-
surance may be.

6. When "ordinary contents" of out-
buildings are insured by the Royal Canadian
ALL implements are included. In the Lon-
don Mutual only one reaper and one mower
are included, no matter how good others
may be.

7. When the outbuildings are not joined
to each other the Royal Canadian insures
under one sum the "ordinary contents" of
all building not cut off by a distance great-
er than 40 ft., the same as if the contents
were all under one roof. The London Mut-
ual requires a separate sum on the con-
tents of each building, if the distance is
more than 12 ft. This is a very important
difference in many cases.

8. In the Royal Canadian it is a part of
the contract that standard STEAM THRESHERS
may be used without a special permit and
without any restriction as to the distance
from stacks or buildings, caretakers, piles
of water, kind of fuel or direction of the
wind. Many of the policy holders in the
London Mutual were obliged to run their
own risk while threshing last season, be-
cause it was found to be impossible to com-
ply with the conditions of their permit.
When a farmer pays for insurance he should
secure a policy which will hold him safe
when it is most required.

9. The Royal Canadian is obliged to pay
its losses within sixty days and usually
takes much less. The London Mutual need
not pay for ninety days, and since it has
become so hard up as to be obliged to bor-
row money largely, it usually takes about
the full time allowed.

10. The Royal Canadian policy is subject
to the statutory conditions only. It has
none of the numerous variations against
the policy-holder printed in red ink on the
back of the London Mutual policy.

11. As to security, the inspector of in-
surance reports that the Royal Canadian has
\$202,758, the amount he estimates to be
necessary to enable the company to carry
out all its engagements with its policy
holders. Besides this he reports that it has
to the good the \$400,000 capital paid in
cash by the shareholders, and a net surplus
\$117,607 making in all a total cash surplus
of \$717,607 to protect its policy-holders
against unexpected contingencies. In ad-
dition to these cash items it has a subscrib-
ed capital of \$100,000 not called up. Re-
garding the security of the London Mutual
the inspector reports that the amount of
unearned premium it should have on hand
is \$290,309. To make up this amount in
cash a second call would have to be made
on the premium notes for a large amount,
leaving a surplus of only \$74,218, even if
there were no bad debts, and this surplus
is made up wholly of the unpaid balance
of premium notes already heavily assessed.
The company reports the losses adjusted
but unpaid at the close of the year at \$6-
387, but the Inspector of Insurance finds
that the liability for unpaid losses at the
end of the year was \$20,286. The cash on
hand to pay these losses only amounted to
\$13,911.

In view of the foregoing facts farmers
will have no difficulty in deciding as to the
company in which they should be insured.

Agent, Lindsay.

A Fierce Battle.

LOUISA, Ky., Sept. 20.—On Twelve
Pole creek, near Wayne court house,
Va., on Friday, a terrible fight occurred
between a sheriff's posse and a gang of
Italian railroad laborers. Several Ital-
ians were killed and a number wounded.
Some weeks ago a contractor on the
Norfolk and Western Railroad named
Keough went away, leaving numerous
creditors, among the number being the
Italians. A new contractor took pos-
session of the abandoned works and put
a number of laborers to work in a cut
formerly worked by the Italians. The
Italians refused to allow anyone to work
in the cut until they had received their
pay, and proceeded to oust the new
laborers. Three times the new laborers
were run out by the Italians, who used
stones, clubs, knives and pistols. The
contractor then applied to the court for
protection, and was furnished a posse
of a dozen men, headed by the sheriff
of Wayne County. On Friday the
sheriff attempted to arrest the Italians,
who fiercely resisted, and a combat re-
sulted with 40 or more Italians on one
side, armed with stones, knives and
revolvers, and the sheriff's men on the
other. The Italians fought from behind
trees and rocks. Firing became general
and lasted some minutes. When the
smoke had cleared away several Italians
were found in the last throes of death
and several more were wounded. The
sheriff's men escaped with a few severe
bruises. About twenty Italians were
arrested and jailed. The remainder
escaped.

The Trade in Canadian Logs.

SAGINAW, Mich., Sept. 20.—Lumber-
men estimate that as many logs will be
put in the coming winter in the Saginaw
District as last winter. The output of
the mills this season, it is estimated, will
exceed 700,000,000 feet, and if the
Canadian export duty on logs comes off,
as expected, the quantity of logs rafted
here from Canada will steadily increase.
Col. Bliss recently purchased the timber
on an Island in Georgian Bay for \$70-
000, and it will come to this river. The
Saginaw Lumber and Salt Company has
about 20,000,000 feet on Fitzwilliam
Island to come here. The Emily Lum-
ber Company will put in about 30,000,
600 feet on the Wahnapitae this winter,
a portion of which will come here, and
J. W. Howry & Sons and others are
lumbering on Georgian Bay. At Bay
City, Gates, Folsome & Arnold are op-
erating in Canada, and R. G. Peters of
Manitowish is also sending logs from Can-
ada to this river. The probable reduc-
tion of the duty on lumber and abolition
of the log duty is stimulating the de-
mand for Canadian timber, and prices
of stumpage are appreciated during the
past 60 days, with the possibility of a
still higher range of values. There is
at present a fair inquiry for men for the
woods, but the supply will be abundant
as soon as the mills are shut down. A
large number will go form here to Up-
per Michigan, Wisconsin and Minnesota
for the winter.

A Valuable New Invention.

Mr. Charles Davidson, Guelph, is the
happy possessor of a patent which he
secured only last May, which without
doubt is calculated to revolutionize the
entire system of threshing. He has
placed on the exhibition grounds imme-
diately in rear of the press bureau what
is called a "jack." This ingenious de-
vice is composed of a system of wheels
which, being operated by a rope and
belt, enables the farmer to place his
engine at any distance away from the
barn where his thresher is situated, by
this means avoiding all risk by fire and
thereby decreasing the cost of insurance.
The engine may be placed at any dis-
tance or at any angle from the barn or
stacks, and by this novel invention the
farmer finds that his thresher will work
smoother and with less friction. The
machine is simple, light and strongly
built. No mechanical skill is required
to operate it and it will outlive any other
machine made. The long list of disas-
terous fires caused by steam engines
when threshing was the incentive in the
inventing of this machine, which must
prove a great blessing to all farmers in
the future. Further information re-
garding the machine may be obtained
by addressing Charles Davidson, the
patentee, at Guelph, Ont.—Empire.

The authorities in British India are
inquiring into the question of early
marriages.
