

How to Get Rich.

Quite recently I met a man,
Rich, shrewd, and enterprising,
Who had succeeded on the plan
Of always advertising.
His business had grown very great,
His wealth was quite extensive,
And to maintain his rank and state
His habits were expensive.

I often used to wonder how
His wealth accumulated,
And, as the chance presented, now
My wonder to him stated.
"Oh, well," he answered in reply,
"Perhaps 'twill make you wiser,
'Tm rich, and here's the reason why—
I am an advertiser!"

Found Little Willie's Bones.

REGINA, June 6.—Some Indians a few days ago, while hunting for buffalo bones near Maricotte, came across the bones of little Willie McMillan, who was lost three years ago in the winter while attempting to walk from his home to a neighbor's, eight miles away. The snow was deep on the ground and the poor little fellow lost the road, walked past his destination and was never seen again, notwithstanding that a most careful search of the surrounding country was made by the people there, assisted by the Mounted Police. Curry McMillan, uncle of the boy, had his feet frozen during the search, having walked across Long Lake with his brother James, Willie's father, in the vain search for the wanderer. The bones were discovered about three miles north of the house which Willie had started out to reach, so that he had walked 11 miles through the deep snow before lying down to die. The bones will be gathered up and given Christian burial.

Advertising in the Sky.

The newest horror is not Deeming o. the Paris Anarchists. It is considerably worse than either. An esteemed scientific contemporary says that genuine sky-signs can now be installed for the enterprising advertiser. By a simple arrangement of mirrors and lights a sort of gigantic magic lantern can be set up, by which images can be thrown upon the clouds. You will be able to advertise your wares, in letters a hundred feet long, on the skies, so that they will be visible over a dozen counties.

As if this truly awful prospect were not enough, we are told that these sky-signs can be made luminous, so that they will blaze all night! Heine, in one of his rhapsodies, said that he would like to snatch a burning pine from its Norway mountains and write with it the name of "Agnes" in letters of fire on the skies. But he would probably not have cared to adorn the firmament with a blazing description of somebody's patent trouser stretcher, or a glowing picture of a lady wearing the latest thing in hygienic corsets.—*Newark Journal.*

Prevention of Rust in Guns.

There are several preparations used for this purpose by sportsmen and soldiers. In the German army oil of gutta percha is used. It is applied with a flannel rag, and will remain good for a long time. When it is to be removed some fresh oil is applied, and after it has remained on twenty-four hours it is wiped off, taking the old oil with it. A solution of gutta percha in benzine, to be made of the consistency of cream, is also used. It is applied with a brush, and may be removed by a rag wetted with benzine. Another preparation is made thus: Dissolve two ounces of camphor in a pound of lard, skim it and add black lead until it is black; apply it and after twenty-four hours wipe off with a soft cloth. This will keep the metal quite free from rust for months. Another is to melt one part of resin with seven parts of tallow, and add benzine or kerosine to thin it. For machinery the following is used with satisfaction: A piece of fresh lime is slacked with water enough to make it into a dry powder. This is mixed with tallow to a dough which is spread on the metal. For sheet iron and tools, the mixture of a small quantity of resin with melted tallow applied while it is warm is an excellent preservative against rust. It is especially useful for Russian sheet iron and for a stove.

Europe uses 60,000,000 matches daily.

Chinese tea growers are considering the advisability of growing cotton instead of tea, as the crop of the latter is poor.

The cholera epidemic at Serinagar, in the vale of Cashmere, India, continues its terrible course. In the last four days out of 1,731 persons attacked 990 have died.

The celebrated trotter, Rarus, for whom Robert Bonner in 1879 paid \$36,000, has just died of old age at Mr. Bonner's farm at Tarrytown. Rarus was king of the trotting turf in his day.

At Forest City, Mo., Stephen Shalor, aged sixteen, fell into a pond. His mother, sister and father jumped into the water to save him, and all four were drowned. Five other children are left orphaned by the accident.

Our agents have many advantages, such as selling home-grown, hardy Canadian stock. Choice New Specialties, which are of value, and which can only be secured from us.

We have given particular attention to the propagation of HARDY VARIETIES suitable to the Northern section of Canada.

For terms apply to STONE & WELLINGTON, Toronto, Ont.

For Sale—A Bargain.

Lot No. 6 north of Bond street, west of Colborne street, in the village of Fenelon Falls, with buildings, engine and boiler—formerly used as a carding mill.

Apply at once to G. H. HOPKINS, Barrister, Lindsay

—THE—
ROYAL CANADIAN INSURANCE COMPANY,
VS.
THE LONDON MUTUAL,
FOR FARMERS.

The Royal Canadian offers the following advantages over the London Mutual:

1. If a building worth \$1200 is insured for say \$1000, the Royal Canadian is obliged to pay \$1000, if a loss occurs. In such a case the London Mutual is obliged to pay only two thirds of the cash value, or \$800.

2. If a horse worth \$90 is killed in the fields by lightning, the Royal Canadian is obliged to pay \$90. The London Mutual pays only \$60.

3. For a cow worth \$30 killed by lightning the Royal Canadian pays \$30. The London Mutual pays only \$20. For other animals the Royal Canadian pays the full value. The London Mutual pays not more than \$5, no matter how valuable the animal may be.

4. In the Royal Canadian animals are insured against lightning while at pasture anywhere. In the London Mutual they are insured while pasturing on the premises of the insured only.

5. When articles are insured specifically, such as musical instruments, the Royal Canadian is obliged to pay the full amount insured up to the cash value of the article. The London Mutual pays only two thirds of the cash value, no matter what the insurance may be.

6. When "ordinary contents" of out buildings are insured by the Royal Canadian ALL implements are included. In the London Mutual only one reaper and one mower are included, no matter how good others may be.

7. When the outbuildings are not joined to each other the Royal Canadian insures under one sum the "ordinary contents" of all building not cut off by a distance greater than 40 ft., the same as if the contents were all under one roof. The London Mutual requires a separate sum on the contents of each building, if the distance is more than 12 ft. This is a very important difference in many cases.

8. In the Royal Canadian it is a part of the contract that standard STEAM THRESHERS may be used without a special permit and without any restriction as to the distance from stacks or buildings, caretakers, piles of water, kind of fuel or direction of the wind. Many of the policy holders in the London Mutual were obliged to run their own risk while threshing last season, because it was found to be impossible to comply with the conditions of their permit. When a farmer pays for insurance he should secure a policy which will hold him safe when it is most required.

9. The Royal Canadian is obliged to pay its losses within sixty days and usually takes much less. The London Mutual need not pay for ninety days, and since it has become so hard up as to be obliged to borrow money largely, it usually takes about the full time allowed.

10. The Royal Canadian policy is subject to the statutory conditions only. It has none of the numerous variations against the policy-holder printed in red ink on the back of the London Mutual policy.

11. As to security, the inspector of insurance reports that the Royal Canadian has \$202,758, the amount he estimates to be necessary to enable the company to carry out all its engagements with its policy holders. Besides this he reports that it has to the good the \$100,000 capital paid in cash by the shareholders, and a net surplus of \$117,697 making in all a total cash surplus of \$517,697 to protect its policy-holders against unexpected contingencies. In addition to these cash items it has a subscribed capital of \$100,000 not called up. Regarding the security of the London Mutual the inspector reports that the amount of unearned premium it should have on hand is \$290,300. To make up this amount in cash a second call would have to be made on the premium notes for a large amount, leaving a surplus of only \$74,218, even if there were no bad debts, and this surplus is made up wholly of the unpaid balance of premium notes already heavily assessed. The company reports the losses adjusted but unpaid at the close of the year at \$6,387, but the Inspector of Insurance finds that the liability for unpaid losses at the end of the year was \$20,286. The cash on hand to pay these losses only amounted to \$13,911.

In view of the foregoing facts farmers will have no difficulty in deciding as to the company in which they should be insured.

For insurance apply to S. CORNELL, Agent, Lindsay.

The "Fenelon Falls Gazette" is printed every Saturday at the office, on the corner of May & Francis streets.

SUBSCRIPTION \$1 A YEAR IN ADVANCE, or one cent per week will be added as long as it remains unpaid.

Advertising Rates.
