**MCCOLL'S CELEBRATED
LARDINE & CYLINDER OILS,**

used by the Largest Millmen in the Country, and manufactured solely by

MCCOLL BROTHERS & Co., TORONTO.

For Sale only by JOSEPH HEARD in Fenelon Falls.

The Amended Game Law.

Inquiries as to the recent changes in the game law are so frequent, we give here a summary of the amendments made at the last session of the Ontario Legislature:—The close season for deer, elk, reindeer, moose and cariboo is fixed at the 15th of November to the 1st of November of the following year. The killing of these animals, except deer, is prohibited until November, 1895. Dogs accustomed to pursue deer must not run at large during the hunting season, and such dogs found running may be killed on sight. The killing of deer by any one person is restricted to two each season. Hunting or killing deer by "crusting" or while "yarding" is declared unlawful. No fawn shall be hunted, killed, taken or possessed. Common carriers and others are prohibited from transporting any wild deer or the skin thereof, on any occasion, except between 1st and 22nd of November in each year, unless accompanied by an affidavit that the same was hunted and taken during the open season. The close season for grouse, pheasants, prairie fowl or partridge, woodcock, snipe, rail, plover, or any other water fowl, or other game birds or animals, (including black and gray squirrels and hares), not provided for, is fixed at 15th December to 15th September the following year. Quail and wild turkeys 15th December to 15th October following. Swan or geese, 1st May to 15th September following. Wild turkeys are preserved until 15th October, 1897, and beavers, otters or fisher, until 1st November, 1897. The killing of ducks is limited to 300 by one person in one season. Killing or shooting swans, geese or ducks from sailing boats or steam yachts is prohibited, and also killing or shooting any bird or wild fowl between sunset and sunrise. Also hunting or killing any game animals or birds on the Lord's day. The time for exposing for sale after close season is shortened from fifteen days to five days. The sale of quail, snipe, wild turkey, woodcock or partridge is prohibited for two years. Hunting on the lands of other persons is prohibited when without leave of owners. Notice of such prohibition can be put up for every forty acres of land. Non-residents of Ontario and Quebec must take out a licence at \$25 for each season, which must be produced on request. Guests of a resident free for one week. A board of three fish and game commissioners, and a secretary, is to be appointed, who can make regulations and appoint a chief warden and other fish and game wardens. Procedure is provided for the enforcement of the Act.

A New Motive Power.

Electricity is an agent so dangerous to life and property in its operation that any other perfectly harmless agent which could fully replace it as a locomotive power for street cars would probably be adopted with alacrity. That it will be so replaced appears not altogether out of the range of probabilities. The London correspondent of the St. Louis Globe Democrat describes a new motive power now in use on a short line of railway running between Manchester and Bolton, which its inventors claim will supersede both steam and electricity. It is said to be cheapness itself compared with either, and to be entirely free from danger. It is called the Anhydrous Ammonia motor, a name which, if it succeeds, will soon be euphoniously modified by popular usage. The estimated cost of running cars with it is a little less than three cents per mile. Ammonia, it is well known, has an irresistible tendency towards water. It is this chemical affinity which an English scientist, aided by a shrewd inventor, has turned to practical use as a motor power. The apparatus consists of a small box in which are placed in proper proximity jars of water and ammonia, so arranged as to accumulate and direct the energy generated as described. The result is a power sufficient to run a train of cars. The invention is not yet perfected, but its promoters are confident of success.—*Montreal Daily Witness.*

Owing to the extreme heat the schools and some factories in Berlin, Germany, have been closed at the Emperor's request.

The War Department at Washington has ordered 600 stand of arms and 39,000 rounds of ammunition to be sent to Knoxville, Tenn., from the arsenal at Indianapolis for use by the Tennessee authorities in suppressing the miner's riots.

The Queen Threatened.

AN INSANE MAN STOPS HER MAJESTY'S CARRIAGE.

LONDON, Aug. 20.—The Globe this afternoon reports an incident that occurred to-day to the Queen while she was driving near Osborne house, Isle of Wight. As the royal carriage was proceeding along the road a man making violent gestures advanced toward it. The carriage was stopped and the man approached the Queen. He told her that he was a foreign count, and that he and many others had sworn that if the Queen did not resign they would kill her.

Her Majesty listened in silence to the wild harangue, never once betraying any nervousness. She and her attendants at once saw that the man was mentally unbalanced, and, though she did not know but what he would attempt to suit his actions to his words, she retained her presence of mind and gazed calmly at him, never uttering a word. One of her attendants dismounted, and quietly talking to the man removed him from Her Majesty's presence. He was handed over to a constable and lodged in jail. There is no doubt that he is insane.

Hundred Miles an Hour.

AN ELECTRIC RAILWAY BETWEEN CHICAGO AND ST. LOUIS.

St. Louis, Aug. 18.—In spite of the fun that has been poked at the St. Louis-Chicago electric railway scheme, the preliminary work is going steadily on and the greater portion of the right of way has been secured. Yesterday a large tract of land was purchased at Edinburg, Christian County, Ill., upon which it is intended to erect the power house. There are 248 country roads and eighteen railroads to be crossed, the latter by bridges. The electric right of way will be closed throughout the route. Capital has not been lacking for the preliminary work, and the projectors, who are men of acknowledged professional standing, state that there will be no difficulty in completing the line throughout and having in operation 262 miles by the opening of the world's fair season. It is expected to attain a speed of 100 miles an hour when the machinery and rolling stock have been perfected. The company will at the outset handle passenger, mail and express business and later on give attention to freight traffic. The route between the two cities is practically a bee-line.

Stolen Goods Recovered.

In Sept. 1890 Mr. J. Strathearn of this place lost a parcel of watches and watch movements, the particulars of which were given in the Herald at the time the thieving occurred. During July 1891 Mr. J. Brown of Midland, who had been informed to keep a watch out for the thief, got a slight information of where the stolen goods were, and notwithstanding that a thorough search was made of the suspected premises, no trace could be found. Nothing was heard of them till Sunday, August 7th, when the children of Mr. Ed. Anderson, of Tiny, were picking berries on an adjoining farm of their father's and happened to go into an unoccupied house looking for bees' nests. There they saw, in a hole made by a ground hog, something shining, and to their surprise found a tin can filled with watches. On the following Monday their father reported their find to Mayor Horrell of Midland, who at once notified Brown of the whereabouts of some found watches. Brown telephoned to Strathearn to find out the number of his lost goods, and as soon as he received an answer, proceeded to Anderson's place and there found that the numbers corresponded. All the watches save one were returned, and this one, we suppose, the thief has with him. Brown expects to be able to find out the thief by this number.—*Pennsylvania Herald.*

Glanders is very prevalent among horses in London, England.

Atrocious cruelties practised by the Sultan's chief eunuch, Bubilai, have caused great excitement at Fez.

Her von Hasser, an equester to the Prince Regent of Bavaria, was fatally mangled in Munich by two mastiffs.

A New York despatch says the pneumatic gun carriage was thoroughly tested on Thursday and worked beautifully. A ten-inch rifle was used, with full service charges, 10 rounds being fired in an hour.
