McCOLL'S CELEBRATED  
LARDINE & CYLINDER OILS,

used by the Largest Millmen in the Country, and manufactured solely by

McCOLL BROTHERS & Co., TORONTO.

For Sale only by JOSEPH HEARD in Fenelon Falls.

### Mr. Blake's Movements.

The Hon. Edward Blake is announced to speak at a home rule meeting at Boston, Mass., on the 26th inst. The Irish citizens of the United States have been addressed by many of the leaders and orators of the Irish Parliamentary party, but it is a safe prediction that the Boston meeting will agree that no representative of the home rule cause who has ever visited that country had a greater grasp of that question, a more invincible logic or more splendid gifts of speech than the eminent Canadian who now represents South Longford in the Imperial Parliament. The result of his visit to Boston must be to re-awaken and intensify interest in the home rule movement throughout the United States, as his speech at the Pavilion a few weeks ago very sensibly stimulated the interest of Canadians in the Irish struggle. On Wednesday, November 2, Mr. Blake, accompanied by Mrs. Blake, sails for Liverpool by the Teutonic. He has accepted an invitation to attend the annual banquet of the Liberal Anchor Society in honor of Colston's Day, at Bristol, on November 14. On that occasion Sir George Trevelyan, the Secretary for Scotland, and Mr. Blake will be the chief speakers. This is one of the principal events during the Parliamentary recess. On this day there has been for a great many years a Liberal and also a Conservative banquet in memory of the Bristol philanthropist. Mr. Blake has also been asked to speak at many points in Great Britain during the winter. It is becoming very manifest that there has opened for Mr. Blake a great part in British politics; and while it is true that Canadians will follow his career in the old land with sympathetic interest and rejoice in his triumphs, no honor that he can receive in British politics will give as genuine satisfaction to the Canadian people as an early announcement that he has decided to withdraw from the Imperial Parliament to return to the Canadian House of Commons and dedicate afresh his high purposes and great talents to the service of his native land.—Globe.

### License in England.

It seems pretty generally understood that the new Gladstone Government will introduce some amendments to the liquor license laws in England, and that these will be in the direction of greater stringency. That public sentiment in England is far behind that in Canada is well known. What would be a considerable advance there would be behind what has been already attained with us.

The Toronto Mail gives the summary of a measure that is likely to be introduced at the next session of the Imperial Parliament. The Speaker, a leading organ of the Gladstone Government, is its authority. Such "amendments" here would not be thought much of, but they may be so considered in England.

The summary is as follows:—"Existing saloon licenses to be confirmed for three years, but in order to lessen the number within that period provision to be made for the surrender of licenses on a payment equivalent to one year's profit. Loans might be authorized for that purpose. At the end of three years all licenses should expire. The local authorities—the town, village, or county council—should then fix the number of licenses to be issued—in no case to exceed the proportion of one license for each 1,000 inhabitants. These licenses, which are to run five years, should be offered at public auction to the highest responsible and reputable bidder. Any profits to be derived from this plan should be applied for the compensation of those who surrendered their licenses during the three-year period. All licensed houses to be subject to the closest police supervision and subject to the regulation of the local authorities. A conviction of a license-holder to be followed, according to the gravity of the offence, by a forfeiture or by the endorsement of the offence on the back of the license, to be followed by forfeiture in the event of repetition."

The two-year-old colt G. W. Johnson, a full brother to Huron, was sold at auction for \$30,000.

It is estimated that 300,000 persons have died of cholera in Russia during the present epidemic.

Raymon Nunez has been arrested at Pueblo, Mex., charged with creating a cholera scare. He is an undertaker, and advertised cheap funerals in case of an outbreak of the plague.

### An Exciting Time.

WHICH THE BRITISH SCHOONER MAYBELLE HAD WITH A RUSSIAN CRUISER.

VICTORIA, Oct. 8.—The schooner Maybelle, just arrived from Copper Island, reports an exciting adventure on August 29. The schooner was anchored 70 miles north of Behring Island in a dense fog, which lifted suddenly, revealing a Russian cruiser a short distance away. The latter made no signals, lowered no boat, but sent a shot across the schooner's bows, which missed the rigging only by a few feet. The Indian crew in terror hoisted all sail, the captain's order being unheard or unheeded in the excitement. Then came a second shot, better aimed, from the Russian, which pierced the schooner above the water line, going completely through the fore-castle, owing to the short range at which it was directed. Still no boat left the cruiser, her commander apparently being satisfied with bombarding the helpless sealer. Luckily for the latter, the fog thickened, and in it she escaped. The damages were patched up at the nearest beach and the schooner came home.

### The Ravages of Cholera.

IT BREAKS OUT AMONG THE TROOPS STATIONED AT BERLIN.

LONDON, Oct. 10th.—The Times has published an article on the cholera prospects for this and next year. It says: "We are already in October, and still the epidemic keeps marching steadily westward, despite elaborate precautions and supposed sanitary perfection. Probably the general public does not gather a clear idea of the fact that cholera is doing just what it has always done formerly—creeping quietly onward, and sowing the autumnal seeds in new ground over a wide area, which will burst forth luxuriant with the advent of summer. It is a most mischievous delusion that after September nothing is to be feared. For individual towns and districts which have borne the brunt of a severe epidemic winter generally means delivery, but for the neighboring countries it means only the beginning of trouble."

### Depression in Great Britain.

WHILE IT IS CONSIDERABLE IT IS NOT UNPRECEDENTED.

LONDON, Oct. 10.—The sensational reports current of the prevalence of severe depression in the commercial and agricultural interests of Great Britain have caused the Association Press representative here to make special enquiries at the labor bureau and in other quarters. The officials of the labor bureau state that while the prevailing depression is considerable it is not unprecedented. Taking the returns of the whole of the trades unions reporting during September, five per cent. of the number of workmen are shown to be out of work. The reports embrace 1,250,000 union workmen. The shipbuilding trade is the worst affected. Next come the cotton, iron and steel industries. No signs of improvement in the shipbuilding trade are likely to be seen in the near future.

### Australia's Mineral Wealth.

LONDON, Oct. 10.—Extraordinary reports have reached here of new mineral discoveries, tin and coal, in Australia. Rich lodes of tin have been found in Victoria and immense beds of iron ore.

The assistant Government geologist in Victoria reports that besides black coal areas covering 306 square miles and containing 30,000,000 tons, there are strata of brown coal with seams averaging 130 feet in thickness, amounting to many billions of tons.

Government reports from New South Wales estimated enough coal within easy worked areas to permit an annual output of ten million for many years to come.

Miss Betsy Trumbell, who died recently at the almshouse in Showhegan, Me., at the age of 92, was supported by the town from the day of her birth to the day of her death, for although able to do considerable work, both indoors and out, she was of feeble intellect and unable to take care of herself. Ninety-two years on a poor farm is the longest time on record.
