Fenelon Falls, Aug. 16th, 1894.

The Fenelon Falls Gazette.

Friday, Sept. 21st, 1894.

A Fair Offer.

Last Wednesday Councillor Sandford, while on his way from Peterborough to Lindsay by rail, fell in with Mr. Matthews of the Canada Rubber Co. of St. Catharines, with whom he has done business in the past, and learning that the company had a good second-hand fire engine to sell at a bargain, persuaded Mr. Matthews to accompany him to the Falls and lay his proposal before a public meeting which he (Mr. Sandford) convened to hear it. The engine is a hand-engine, but is of the latest improved pattern, easily worked and practically as good as new. It was made in Rhode Island, U. S., cost \$1,300, and the company, who took it in part payment for hose, offer it for \$365, together with twenty feet of new five-inch suction-hose, worth \$85, on a year's credit without interest. Mr. Matthews will ship the engine as soon as he returns home, and will follow it to the Falls upon receipt of a post-card telling him that it has arrived, and he says that if it does not throw two streams of water from 2½ inch nozzles over any building in the village with only ten men at the brakes, he will not ask the corporation to purchase; and, if it prove to be as effective as he claims, we fancy that the great majority of our people will be in favor of keeping it. The little "man killer" that the late Joseph McArthur brought here several years ago (and that has saved thousands of dollars' worth of property from destruction) has created a prejudice against hand engines; but it must be remembered that it was not only built in the dim and distant past, when all sorts of machines were vastly inferior to those of to-day, but that it is afflicted with dyspepsia or heart disease, or has something else seriously the matter with one or another of its vital organs. The village ought to have a good fire engine, a first-class hand engine is all we can afford, and it will be a long time before we can get a better bargain than Mr. Matthews offers us.

Interviews With Bears.

Sunday last was a good day for items, as it not only gave us a rescue from drowning but three bear stories as well. Amongst the residents of Lindsay who have summer cottages at Sturgeon Point is Mr. D. J. McIntyre P. M., and as that gentleman was walking along the edge of the woods, near Judge Dean's cottage, about 2.30 on Sunday afternoon, he heard a noise, and, looking towards the direction from which it proceeded, he saw a good-sized bear approaching him with its mouth open and malice aforethought in its eyes. Now, it so happened that Mr. McIntyre had in one hand a stick and in the other a jack-knife with which he had cut it, and—as he told an admiring audience afterwards—he then and there made up his mind not to run away but to come the squaw game (as per Second Reader) on the bear; that is to say, he determined to plant his back against a tree, place the haft of the knife against his own breast, and, when the bear rose to embrace him, quietly but firmly force the blade into its heart. Mr. McIntyre's heroic intention deserves a certain amount of applause, but he was unfortunately prevented from carrying it out, as, just as he was on the point of doing it, and of having the bear on the point of his jack-knife, a lady and gentleman appeared upon the scene, and Bruin, probably thinking that the odds were against him, turned tail and disappeared in the woods.

About four hours later Mr. Wm. Lyle, who lives north of Bobcaygeon in the township of Verulam, went to the woods on his farm, accompanied by one of his dogs, to drive home the cows, and had not gone far when he heard ahead of him a noise that led him to infer that the dog had attacked a calf. Close to the spot were some pieces split from the heart of an elm tree that he had felled to make neck-yokes, etc.; and, snatching up one that was over a yard long, of considerable thickness and nearly square, he rushed forward, but had only taken a few steps when he almost ran against a big she-bear that was standing on her hind legs with one paw raised ready to strike. It was a crisis that called for prompt action, and Mr. Lyle, who is a tall, strong man, struck so quickly with his formidable weapon that the bear had not time to ward off the blow, and so furiously that she fell headlong to the ground. As she dropped, Mr. Lyle turned and ran towards home, while his opponent, upon whom the *argumentum baculinum* appeared to have a very discouraging effect, made off in the opposite direction, followed by two cubs, who could be heard, but not seen, as they scampered through the underbrush after their dam. Mr. Lyle returned as soon as possible with his gun and two dogs, but by that time it was too dark to get through the woods, and he reluctantly abandoned the chase.

The same evening, about 8 o'clock, Mr. Abbot, whose farm is north of Sandy Point, fired a charge of buckshot at a bear, but with what effect he could not learn, as it was too late to follow the trail. As Sandy Point and Sturgeon Point are only about two miles apart, the animal shot at by Mr. Abbot may be the one that so narrowly escaped impalement on Mr. McIntyre's jack-knife; but probably it wasn't, as bears appear to be very near together this year.

Served Them Right.

On Sunday last two Lindsay young men named Hall and O'Neill hired a skiff and rowed to Sturgeon Point, which they reached in the afternoon, and where they remained not much over half an hour. While on shore they drank, not wisely, of something that didn't come out of a well, and by the time they returned to the landing place their powers of navigation were so obviously impaired that some boys who were there tried to dissuade them from leaving for home, but in vain. They got into their boat with some difficulty and started, but had not gone more than a hundred yards when she upset and dumped them into about ten feet of water. The accident was witnessed by many persons on shore, and in a very short time Mr. Richard Hopkins and Ernest Neelands reached the spot in a boat and rescued O'Neill, and Squire McDonnell and his grandson, Lester Coulter, in another boat, picked up Hall, who, being able to swim, was paddling around, but O'Neill, who could not swim, had thrown himself across the skiff, which was submerged by his weight. The companions in misfortune, for whom but little sympathy was felt, were rolled up in sailcloth and stowed away in a boathouse, where, after a good long sleep, they woke up sadder and wetter, and, it is to be hoped wiser, men than they were when they left for the Sunday outing that ended unexpectedly in an inning, and that might have had a tragical termination if help had not been at hand.

The Red Mill.

Since the first log was cut on the 13th of July last, all the machinery in the red mill has been working full time, except when stoppages of parts of it have been caused by occasional small breakages, which are looked upon as so inevitable that their non-occurrence would occasion a good deal of agreeable surprise. Of course everything possible is done to prevent them, and as the snapping of the wire cables that draw the log carriages backwards and forwards was attributed to the smallness of the sheaves or drums around which they pass, Mr. Thomson and several assistants worked all last Monday night putting in larger ones. Four new Bain waggon wheels were added, on Monday, to the number then in use, and carpenters are busy on the woodwork of twenty new cars, the iron wheels and axles for which are being made in Hamilton. The thirty now on the tracks in the mill yard and piling-ground have, so far, been enough, but when darkness sets in early some of them will have to

be left unloaded until morning, and a much larger number will be required. A man is to be here next week to put up electric light wires through the mill, but it is not probable that the piling ground will be lighted by electricity until a year from now. The "buttings" hitherto sold around the village for fuel at a dollar per load contained fine large pieces of board that it seemed a sin to burn, and they are now being saved and will be put to a better use, as a machine that will convert them into shingles has been ordered, and it is, we are glad to hear, quite probable that a large box factory will be put up before long. There are now 75 hands, all told, working in or around the red mill, and on Saturday last 100 men left here to join the 300 already at work in Howry & Son's different camps out north.

Personals.

Miss Fitzgerald of Parry Harbor, eldest daughter of Mr. J. W. Fitzgerald, is visiting her relatives at the Falls.

Mrs. McQueerey of Winnipeg, Manitoba, has been at the Falls since Thursday of last week, and is staying with her daughters, the Misses Greco, at the old homestead on Francis street west.

Miss Walters, Miss Fee, the Misses Wilson, Miss Widdess, Mr. H. Gregory, Mr. George Matthie and two or three other gentlemen came to the Falls on Wednesday in the steam yacht *Nona Roy*, and spent a few hours calling upon friends or relatives.

Messrs. Edward Fitzgerald and E. R. Edwards left on Monday last for Algonquin Park, the Government reservation in northern Ontario, of which Mr. Fitzgerald is a duly commissioned ranger. They will remain at the park for a month or more and will then return as far as Senora lake, in the township of Sherborne, where they will be joined by a party of sports from the Falls and a few weeks will be spent in fishing and hunting.

Dr. Robert Lockhart, of Hespeler, Ont., was at the Falls from Saturday last until Monday. Dr. Lockhart is the eldest son of Mr. Thomas Lockhart, formerly of Fenelon and afterwards of Fenelon Falls, who left a good many years ago for the North-West and is now farming near Souris, Manitoba. The many old friends of the family will be glad to hear that the doctor has a good practice and that his father is doing well.

Hon. J. C. Patterson, Minister of Militia, Hon. Joseph A. Ouimet, Minister of Public Works, Charles Fairbairn, M. P., Major Samuel Hughes, M. P., and R. B. Rogers, Esq., of Peterborough, Superintendent Engineer of the Trent Canal Works, passed through the Fenelon Falls locks, yesterday forenoon, in the steamer *Empire*, which took them as far as West Bay, where the next section of the Trent Valley Canal strikes into Balsam Lake and on which the Dominion Government surveyors are now at work.

Mr. James Dickson, P. L. S., and Inspector of Surveys for the Province of Ontario, left on Monday morning for a professional trip that will probably keep him busy until near Christmas, as he has to inspect the work that has been done in three townships on the North Shore of Rainy Lake, a short distance north east of Fort Francis, one on the Neepegon river, two townships on the east branch and also two on the west branch of Sturgeon river, two north of Sudbury on the Vermillion river, and the Township of McKinnon on the Georgian Bay, south of Westwood; also the township of Dickens, (formerly Robinson,) in the Huron and Ottawa territory at the Little Opeongo lake.

Village Council Proceedings.

Fenelon Falls, Sept. 17th, 1894. Council met at the call of the reeve; all the members present. Minutes of last meeting read and approved.

Moved by Mr. Sandford, seconded by Mr. Golden, That the following accounts be paid and the reeve give his orders for the same: Mrs. Swanton, on account, ringing curfew, \$3; Thomas Robson, two grates, \$2; E. D. Hand, printing, \$29.50; Alfred Northey, account, \$3.45; John Quibell, drawing gravel, \$70; R. McGee, removing stump from street, \$1; Clerk, salary to July 1st, \$25; C. Wise, cleaning hose, \$1.—Carried.

Moved by Mr. Sandford, seconded by Mr. Martin, That the reeve and treasurer give Mr. John A. Ellis a three months' note for the amount of his lumber account, \$383.60.—Carried.

Moved by Mr. Brandon, seconded by Mr. Martin, That the following accounts be paid, and the reeve give his orders on the cemetery treasurer for the same: James Dickson, survey of cemetery, 14 days, \$68.40—plan, \$25; T. Northey, balance 4½ days' work, \$4.50; George Jakkett, 2½ days' work, \$2.50; Martin Sharpe, half day's work, 50c.—Carried. Bill from Electric Light Co. for \$69.45 laid on the table. Laid over till
