

I AM AHEAD

ON THE NEWEST IMPROVED

FARM IMPLEMENTS.

Percival & Son's new Steel Harrow. The bulls, clips, teeth and whiffle-trees are all steel, and not a bolt in the whole harrow—the only steel whiffle-tree made.

Peter Hamilton's new Spring-tooth Cultivator, with his new improved Seeder, is ahead of anything in the market. Seeing is believing. Come and have a look.

THOS. ROBSON.

Fenelon Falls, March 8th, 1893.

The Fenelon Falls Gazette.

Friday, April 21st, 1893.

The New Governor-General.

The Earl of Aberdeen has been appointed Governor-General of Canada and is now on the ocean, but will spend about four months at Chicago or on his ranch in British Columbia, coming to Ottawa in September, on the departure of Lord Stanley.

The World's Fair.

As the time for the opening of the World's Fair at Chicago approaches, more and more space is devoted to it in the public prints; but the comments of some of the papers are so unfavorable that if what they say be true, Chicago will be "a good place to stay away from" during the next few months. The election as mayor of the nominee of the liquor interest and the rowdy element, who has announced his intention of "running things wide open," has given rise to a fear that not only law and order but common decency will be but faintly observed, and that there will be a saturnalia of drunkenness, gambling and every species of immorality throughout the continuance of the fair. That there will be much to shock the feelings of staid and sober visitors is beyond a doubt, and there is reason to believe that the great city will be a hotbed of disease as well as of vice, as it will be filled with a seething mass of humanity of various nationalities during the hottest period of the year. At present the weather is wretchedly cold, and it is said that the natives of warm climates, who ought to be working at the exhibits of their respective countries, are all sick with la grippe or bronchitis, except the Arabs, who fill themselves full of beer, which seems to keep them warm. The Zulus, Egyptians, Japanese and other foreigners go shivering and growling in their native costumes; the disgusted Mussulmans would turn Turk if they weren't already of that nationality; and the unhappy Cingaleses from sunny Ceylon haven't had a single easy hour since they struck Chicago.

Verulam Council.

Council met according to adjournment in the town hall, Bobeaygeon, on Saturday, April 15th inst. The reeve, James Lithgow, Esq., was in the chair, and councillors Junkin, Maun and Robinson were present.

On motion of D. Robinson, seconded by Wm. Mann, a by-law to raise by way of loan the sum of \$1,200, for the purposes of school section No. 1, was duly passed.

Moved by D. Robinson, seconded by T. Junkin, That this council is of the opinion that no legislation should be taken by the Ontario Legislature with the object of moving the floating bridge over Pigeon Creek, and that a copy of this resolution be sent to the members for East Victoria and West Peterboro.—Carried.

Moved by Wm. Mann, seconded by T. Junkin, That the following accounts be passed, and orders drawn on the treasurer for the same:—Jas. Dickson, P. L. S., surveying roads, \$9; Richard Beck, assisting surveyor, \$1 50; Thos. Bell, deputy returning officer, railway by-law, \$4 50; James Junkin, do. do., \$4 50; C. E. Tiers, do. do., \$4 50; Wm. Davitt, do. do., \$4; John Johnston, do. do., \$4; J. A. Bell, use of hall, \$4; trustees S. S. No. 9, use of school house, \$4; do. No. 7, do., \$4; do. No. 4, do., \$4; do. Bethel church, use of church, \$4; Municipal World, 4 copies, \$3. Accounts from board of health: Richard Warren, sanitary attendance, \$5; A. Kennedy, attendance on Wm. Warren, \$5.25; G. W. Davy, supplies to Wm. Warren, \$1 75; R. Ventress, do. Warren and others, \$9 55; A. W. Tully, sanitary work, \$16; Dr. Boucher, consultation with medical health officer, \$5; J. Capstick, remuneration for loss in diphtheria, \$30.—Carried.

Council adjourned to meet as court of revision on May 29th.

Personals.

Mr. W. R. Madill of Toronto was at the Falls on Wednesday and Thursday, looking well and hearty.

Mrs. R. McDougall got home on Tuesday from Toronto, where she has been spending a few days.

Mr. Daniel Spry of Barrie, post-office inspector for this district, paid an official visit to the Falls yesterday—the first time he has been here since last summer.

Mr. James Cameron, who has been under a doctor's care in Toronto since the 4th inst., is, we are glad to hear, steadily improving, and will probably be home before long. He still experiences some difficulty and pain in swallowing, but his throat is a great deal better than it was when he went to the city.

The body of the late Norman Barnhart passed through the Falls by train last Friday morning on its way from Gelert to Peterborough for interment. The deceased was one of the oldest and most trusted employees of the firm of M. M. Boyd & Co. of Bobeaygeon, and was well and favorably known all along these waters.

Powles's Corners.

Correspondence of the Gazette.

Mr. John Byres is in a very low state of health at present. We learn it is from the effect of a bad cold. Our hopes are that Mr. Byres will soon be able to be around again.

Mr. Wm. Hamilton has the contract for the mason work on a new dwelling house for Mr. Thomas Moore, and Mr. James Wagar has the contract for the carpenter work. The Levely Bros. intend building a barn on the farm they have leased from Mr. Thomas Adams. Mr. John Braden intends putting up a large frame building this season. Mr. Eli Worsley intends having his barn raised and a stone foundation put under

Ploughing has started in this com-

munity, but the ground is hardly in a fit state and the weather keeps cold and unfavorable.

TWIN CALVES.—Last Tuesday Mr. W. H. Stevenson's thoroughbred Durham cow, Bella of Verulam, gave birth to twin heifer calves, one roan and the other red. They are by Earl Fame, Mr. Stevenson's bull, and consequently inherit blue blood from both parents.

ROUTE BILLS.—Horsemen! get your route bills printed at the Gazette office. Several handsome cuts to choose from. Work first-class. Prices right.—9-3w.

ANOTHER BUTCHER.—Mr. Wm. McIntosh commenced business as a butcher last Saturday in the second shop south of Mr. Heard's. He says that he has done fully as well, so far, as he expected, having receiving a very fair share of public patronage. We wish him success.

SEEDS! SEEDS!! SEEDS!!!—W. T. Junkin has a complete stock of Turnip Seed of all kinds, Ensilage and Horse-tooth Corn, Millet Seed and all kinds of Garden Seeds. Also, Flax Seed and Oil Cake for feeding purposes. Give him a call. Prices low.—3.

NEW ADVERTISEMENT.—In this issue of the Gazette will be found the advertisement of Kerr & Co., a new dry goods firm who recently commenced business in Lindsay. Their store is one door east of the Benson House, and their sign is very conspicuous and attractive, the raised, carved, wooden letters being bright red on a white ground.

BIG BLAZE IN VERULAM.—Yesterday (Thursday) afternoon Mr. John Junkin, of the red gate, Bobeaygeon road, lost his house, barn, stable and nearly all their contents by fire, which broke out about one o'clock, and is supposed to have been caused by a defect in or spark from the chimney. The live stock and implements were saved, but scarcely anything else. The loss will probably foot up to \$2,500, and the total insurance is about \$1,700.

QUICK WORK.—Last Tuesday two residents of the Falls, who are not carpenters, laid 4,500 shingles in three hours, and challenge any two amateur shinglers in the world to beat them, the stakes—a York shilling a side—to be deposited in the hands of the sporting editor of the Gazette. Our spy and active townsmen are justly proud of their performance; but have forbidden us to mention their names, as they are afraid no one will believe them.

A LATE SPRING.—The winter set in so much earlier than usual and was so severe and unbroken that many expected an early spring by way of offset, but we are having the very reverse; for as yet but little seeding has been done and many farmers have hardly commenced ploughing. We hope we are not going to have "a year without a summer," as they had in England (or something like it) a few generations ago; but here we are near the end of April, and there is frost every night and more or less snow every three or four days.

Canada's Cheese at Chicago.

The following was among the Globe's Ottawa correspondence on Monday last: A small special party from Ottawa went down to Perth yesterday in charge of Prof. Robertson to view the cheeses about to be shipped to Chicago, especially the big one. The huge truck of oak and iron, with tires eight inches wide, was designed and made by Mr. W. Stanley, of Perth. This truck, 6,500 pounds in weight, is fitted up to bear the exhibit. In the centre will be the mammoth cheese, the largest ever made. It weighs eleven tons and required 207,000 pounds of milk. It was made at the Dominion experimental dairy station at Perth under Prof. Robertson's supervision by Mr. J. A. Ruddock, who will accompany the exhibit to Chicago. It is being transported to Chicago encased in a mould of steel boiler plate. While we were gazing at the huge cheese, six feet high and nine feet in diameter, an onlooker, impressed with the size of it, exclaimed, "My, if skippers get into that they'll be as big as wood chucks." The cheese is already sold to an enterprising English dealer in provisions, Mr. Lipton, who has 90 stores in London, and intends shortly to extend his business to Canada. He will get the cheese at cost price, about \$4,000; and intends to cart it through England on the special truck after it leaves Chicago as an advertisement for his business. It will also serve as a good advertisement for Canadian cheese. A calculation shows that, according to the consumption per head of cheese in Canada, an average family to consume this cheese would have to begin at the time of Adam and would be dining on the last crumbs when the Chicago World's fair opens. The pyramid of Canadian products having this cheese for a centre piece, will be crowned with the smallest cheese ever manufactured. It is about the circumference of a half-dollar and three quarters of an inch.
