A Victim of Fate.

THE HAD TRIED VARIOUS THINGS, BUT LUCK WAS AGAINST HIM.

He wasn't a tramp exactly, but he was on the way there. He had struck the merchant for a dollar, and the merchant was rather interested in him.

"I don't see," he said, "why you go about asking for money or help. You are an intelligent man, and I should think you could get something better to

"I don't know about that," was the despondent rejoinder, "the Lord knows I tried hard enough to get along before I lost my heart entirely."

"What did you do?" "Well, a little of everything. I had some money, and I thought I'd go to raising rice in South Carolina and show the people down there how to do it right. I knew it all, of course, and one day a man came along selling a new brand of general public. seed rice. He was a nice looking man from New York and I liked his style. He liked my style, too, he said, and would sell me the exclusive right to handle his stuff in South Carolina. It was something new-a seed that could not be exposed to the light, but that would yield three times as much as the old varieties. That was what I was looking for, and very quietly I took it in, paying \$200 for the right and four sealed cans of seed. I did all the work at night, and when it was done I sat down to wait and chuckle over my enterprise. But I waited and waited, and nothing came, and one day I looked into the old caus and found I had been stuck with some mean little wheat grains, and you might as well try to raise icicles in the bad place as to raise wheat in a South Carolina rice swamp."

"That was bad luck," said the sym-

pathising merchant. "So I thought, and I left the state and went to raising cattle in Western Kansas. Hadn't more than got my herd set out before a cyclone came along and blew every horn of it clean over into the next county, and when I went after my stock a pious cowboy who had gathered them in with his own informed me that they had been sent to him by Providence, and he'd like to see any son of a gun try to take them away. As he had a Winchester and a lot of friends with him I didn't see my way clear to interfering with the ways of Providence,

and I left the country." "It's pretty hard when Providence goes against a man," ventured the merchant kindly. "Yes, but that isn't all, sighed the disconsolate one. "With what little I had left I went to Pennsylvania and bought a water power grist mill in the mining regions. I fixed it up with new machinery, and for a while it looked as if my luck had changed and I was going to come out on top at last. But one night a big mine lying under the stream that gave me my mill power caved in or sank down just enough to change the lay of the land, and, by gum, the water began to run the other way, and when I got to the mill in the morning the water gates were open, and my mill machinery had all been running backward until every blamed wheel was

wreck." The man wiped a tear from his eye. "Then it was" he went on, "that my heart broke and I laid right down and quit. Now, do you blame me for what I am doing?"

The merchant gave him \$2, and the man was in the police court next morning.

A Peculiar Freak.

A. C. Dulmage, South Marysburgh, exhibited a peculiar freak at the Royal hotel on Monday. It was a cake of newly made maple sugar, with the "photograph" of maple branches and limbs on the sides and bottom of the cake. The sugar was run in a new tin pail, which had been carefully cleaned, and by what process the imprint of the trees was made on the sugar is altogether a mystery. What makes the matter more singular is the fact that while other cakes of sugar were run in the same pail there were no such marks visible; and still another peculiarity is the fact that cakes that were run in the darkness contained "photographs" as above indicated. The pail bore no marks visible of any kind-only a plain, smooth surface. Can anyone explain by what pro cess this singular process was accomplished?-Napanee Express.

Carlyle W. Harris, the murderer of his wife, was electrocuted at Sing Sing prison on Monday. The killing was " a perfect success," as the despatch puts it.

The house of Eli Murray, at Anderson, Ind, was blown to pieces at 12 o'clock on Sunday night by a natural gas explosion. Mr. and Mrs. Murray,

it is thought, were fatally injured. Mr. Sam Grigg, of the Manitoba hotel, Chicago, arrived in London, Ont., on Sunday. He says there are ten times more applicants for positions of all kinds there than can be accommodated, and advises all scarchers after work to keep clear of the Windy City.

The Most Astonishing Medical Discovery of the Last One Hundred Years. It is Pleasant to the Taste as the Sweetest Nectar.

It is Safe and Harmless as the Purest Milk. This wonderful Nervine Tonic has only recently been introduced into this country by the proprietors and manufacturers of the Great South American Nervine Tonic, and yet its great value as a curative agent has long been known by a few of the most learned physicians, who have not brought its merits and value to the knowledge of the

This medicine has completely solved the problem of the cure of indigestion, dyspepsia, and diseases of the general nervous system. It is also of the greatest value in the cure of all forms of failing health from whatever cause. It performs this by the great nervine tonic qualities which it possesses, and by its great curative powers upon the digestive organs, the stomach, the liver and the bowels. No remedy compares with this wonderfully valuable Nervine Tonic as a builder and strengthener of the life forces of the human body, and as a great renewer of a broken-down constitution. It is also of more real permanent value in the treatment and cure of diseases of the lungs than any consumption remedy ever used on this continent. It is a marvelous cure for nervousness of females of all ages. Ladies who are approaching the critical period known as change in life, should not fail to use this great Nervine Tonic, almost constantly, for the space of two or three years. It will carry them safely over the danger. This great strengthener and curative is of inestimable value to the aged and infirm, because its great energizing properties will give them a new hold on life. It will add ten or fifteen years to the lives of many of those who will use a half dozen bottles of the remedy each year.

IT IS A GREAT REMEDY FOR THE CURE OF

NERVOUS DISEASES.

As a cure for every class of Nervous Diseases, no remedy has been able to compare with the Nervine Tonic, which is very pleasant and harmless in all its effects upon the youngest child or the oldest and most delicate individual. Nine-tenths of all the ailments to which the human family is heir are dependent on nervous exhaustion and impaired digestion. When there is an insufficient supply of nerve food in the blood, a general state of debility of the brain, spinal marrow, and nerves is the result. Starved nerves, like starved muscles, become strong when the right kind of food is supplied; and a thousand weaknesses and ailments disappear as the nerves recover. As the nervous system must supply all the power by which the vital forces of the body are carried on, it is the first to suffer for want of perfect nutrition. Ordinary food does not contain a sufficient quantity of the kind of nutriment necessary to repair the wear our present mode of living and labor imposes upon the nerves. For this reason it becomes necessary that a nerve food be supplied. This South American Nervine has been found by analysis to contain the essential elements out of which nerve tissue is formed. This accounts for its universal adaptability to the cure of all forms of nervous de-
