

The Horn Fly.

Mr. J. Fletcher, Dominion Entomologist, in a letter to the Orillia Packet says:—

The fly is now too well known to Canadian farmers. It is a recent importation from Europe, but has spread in a few years over a large portion of the United States and Canada. The widely spread supposition that it bores into the bodies of animals and breeds there, is erroneous, as it passes all its preparatory stages in the fresh droppings of horned stock, and only attacks the cattle themselves in the perfect state by biting them. It is, however, a serious pest, and causes much loss both in milk and in flesh of fattening stock. I would mention for the benefit of your readers that: As a preventive remedy, any grease or oil will keep the flies off cattle for five or six days or until the grease disappears, and if a small quantity of carbolic acid is mixed with the grease or oil the results will be better, as the carbolic acid will heal any sores that may have been formed. Tanner's oil or any cheap fish oil answers well; the easiest remedy to apply is kerosene emulsion, made up as follows: coal oil, two quarts; rain water, one quart; soap, two ounces. This is mixed in the following manner:—Boil the soap in the water until all is dissolved; then, while boiling hot, turn it into the coal oil, and churn it constantly and forcibly with a syringe or force pump for five minutes, when it will be of a smooth creamy nature. If the emulsion be perfect it will adhere to the surface of glass without oiliness. As it cools it thickens into a jelly-like mass. This gives the stock emulsion, which must be diluted before using with nine times its measure, that is, twenty-seven quarts of water. It will be found to mix much more easily if done at once, before it cools. The above proportions give three quarts of stock emulsion, which with twenty-seven quarts of water added make up thirty quarts of the mixture ready for use. This may be applied to the animals either by means of a sponge, or what will certainly be found most efficient, where there are many animals to treat, by means of a force pump and spray nozzle. The emulsion thus made and sprayed over the cattle kills all the flies it reaches, and prevents others coming as long as the odour lasts, which is from three to seven days. Another method of diluting the coal oil is to make the emulsion with milk instead of soap and water. Take sour milk, one part; coal oil, two parts. Mix the two thoroughly, as described above for the soap emulsion. Then dilute with water, so that one part in ten will be coal oil.

The Mosquito in England.

It will be new to many readers that the mosquito is now firmly established in London. It is to be found in certain large hotels which are the resort of visitors coming from the continent, and the supply seems to be maintained by constant importations from abroad. Visitors who are familiar with the noise and bite of the mosquito assert that it is the true pest in its worst form, and there is no reason for doubting their experiences.

A ludicrous mistake in identity on this point recently occurred at a large colliery in the north of England. The men in a distant part of a mine complained that the workings were full of "mosquitoes" and refused to enter the gallery. As it takes something worse than a mosquito to frighten a collier, the manager went down to explore and discovered, to his amazement, that the workings were full of huge, hornetlike, yellow-banded flies, whose larvae were hatched out from the wooden props which supported the roof in the warm atmosphere of the pit. The buzz and rustle of wings were indeed formidable, and the bite of the supposed "mosquitoes" would, by analogy, be something very terrible indeed.—London Spectator.

Sudden Death to Flies.

"Come inside a minute," said a Fourth Avenue dealer in pianos, yesterday afternoon. "I have discovered the greatest flytrap on earth and I want to show it to you." He led the way to an instrument at the rear of the store on which was a newspaper. On the paper had been placed a bunch of sweet peas. At least a thousand dead flies lay in the immediate vicinity of the bunch of flowers. "I threw these here by chance," he continued, "and in about ten minutes I happened to notice that every fly that alighted on the flowers died in a very short time." Even as he spoke a number of the insects which had stopped to suck the deadly sweet had toppled over dead. They alighted with their usual buzz, stopped momentarily, quivered in their legs, flapped their wings feebly several times, and then gave up the ghost.—Louisville Journal.

Canadian cattle breeders continue to flourish well in the prize list at the World's Fair.

THE GREAT SOUTH AMERICAN NERVINE TONIC AND Stomach and Liver Cure

The Most Astonishing Medical Discovery of the Last One Hundred Years.

It is Pleasant to the Taste as the Sweetest Nectar. It is Safe and Harmless as the Purest Milk.

This wonderful Nervine Tonic has only recently been introduced into this country by the proprietors and manufacturers of the Great South American Nervine Tonic, and yet its great value as a curative agent has long been known by a few of the most learned physicians, who have not brought its merits and value to the knowledge of the general public.

This medicine has completely solved the problem of the cure of indigestion, dyspepsia, and diseases of the general nervous system. It is also of the greatest value in the cure of all forms of failing health from whatever cause. It performs this by the great nerve tonic qualities which it possesses, and by its great curative powers upon the digestive organs, the stomach, the liver and the bowels. No remedy compares with this wonderfully valuable Nervine Tonic as a builder and strengthener of the life forces of the human body, and as a great renewer of a broken-down constitution. It is also of more real permanent value in the treatment and cure of diseases of the lungs than any consumption remedy ever used on this continent. It is a marvelous cure for nervousness of females of all ages. Ladies who are approaching the critical period known as change in life, should not fail to use this great Nervine Tonic, almost constantly, for the space of two or three years. It will carry them safely over the danger. This great strengthener and curative is of inestimable value to the aged and infirm, because its great energizing properties will give them a new hold on life. It will add ten or fifteen years to the lives of many of those who will use a half dozen bottles of the remedy each year.

IT IS A GREAT REMEDY FOR THE CURE OF

- Nervousness,
- Nervous Prostration,
- Nervous Headache,
- Sick Headache,
- Female Weakness,
- Nervous Chills,
- Paralysis,
- Nervous Paroxysms and Nervous Choking,
- Hot Flashes,
- Palpitation of the Heart,
- Mental Despondency,
- Sleeplessness,
- St. Vitus' Dance,
- Nervousness of Females,
- Nervousness of Old Age,
- Neuralgia,
- Pains in the Heart,
- Pains in the Back,
- Failing Health,
- Broken Constitution,
- Debility of Old Age,
- Indigestion and Dyspepsia,
- Heartburn and Sour Stomach,
- Weight and Tenderness in Stomach,
- Loss of Appetite,
- Frightful Dreams,
- Dizziness and Ringing in the Ears,
- Weakness of Extremities and Fainting,
- Impure and Impoverished Blood,
- Boils and Carbuncles,
- Scrofula,
- Scrofulous Swellings and Ulcers,
- Consumption of the Lungs,
- Catarrh of the Lungs,
- Bronchitis and Chronic Cough,
- Liver Complaint,
- Chronic Diarrhoea,
- Delicate and Scrofulous Children,
- Summer Complaint of Infants.

All these and many other complaints cured by this wonderful Nervine Tonic.

NERVOUS DISEASES.

As a cure for every class of Nervous Diseases, no remedy has been able to compare with the Nervine Tonic, which is very pleasant and harmless in all its effects upon the youngest child or the oldest and most delicate individual. Nine-tenths of all the ailments to which the human family is heir are dependent on nervous exhaustion and impaired digestion. When there is an insufficient supply of nerve food in the blood, a general state of debility of the brain, spinal marrow, and nerves is the result. Starved nerves, like starved muscles, become strong when the right kind of food is supplied; and a thousand weaknesses and ailments disappear as the nerves recover. As the nervous system must supply all the power by which the vital forces of the body are carried on, it is the first to suffer for want of perfect nutrition. Ordinary food does not contain a sufficient quantity of the kind of nutriment necessary to repair the wear our present mode of living and labor imposes upon the nerves. For this reason it becomes necessary that a nerve food be supplied. This South American Nervine has been found by analysis to contain the essential elements out of which nerve tissue is formed. This accounts for its universal adaptability to the cure of all forms of nervous derangement.

CRAWFORDSVILLE, IND., AUG. 20, '88.
To the Great South American Medicine Co.:
DEAR GENTS:—I desire to say to you that I have suffered for many years with a very serious disease of the stomach and nerves. I tried every medicine I could hear of, but nothing done me any appreciable good until I was advised to try your Great South American Nervine Tonic and Stomach and Liver Cure, and since using several bottles of it I must say that I am surprised at its wonderful powers to cure the stomach and general nervous system. If everyone knew the value of this remedy as I do you would not be able to supply the demand.
J. A. HARDEZ, Ex-Treas. Montgomery Co.

REBECCA WILKINSON, of Brownsvalley, Ind., says: "I had been in a distressed condition for three years from Nervousness, Weakness of the Stomach, Dyspepsia, and Indigestion, until my health was gone. I had been doctoring constantly, with no relief. I bought one bottle of South American Nervine, which did me more good than any \$50 worth of doctoring I ever did in my life. I would advise every weakly person to use this valuable and lovely remedy. A few bottles of it has cured me completely. I consider it the greatest medicine in the world."

INDIGESTION AND DYSPEPSIA. The Great South American Nervine Tonic

Which we now offer you, is the only absolutely unfailing remedy ever discovered for the cure of Indigestion, Dyspepsia, and the vast train of symptoms and horrors which are the result of disease and debility of the human stomach. No person can afford to pass by this jewel of incalculable value who is affected by disease of the stomach, because the experience and testimony of many go to prove that this is the ONE and ONLY ONE great cure in the world for this universal destroyer. There is no case of unmalignant disease of the stomach which can resist the wonderful curative powers of the South American Nervine Tonic.

HARRIET E. HALL, of Waynetown, Ind., says: "I owe my life to the Great South American Nervine. I had been in bed for five months from the effects of an exhausted stomach, indigestion, Nervous Prostration, and a general shattered condition of my whole system. Had given up all hopes of getting well. Had tried three doctors, with no relief. The first bottle of the Nervine Tonic improved me so much that I was able to walk about, and a few bottles cured me entirely. I believe it is the best medicine in the world. I can not recommend it too highly."

No remedy compares with SOUTH AMERICAN NERVINE as a cure for the Nerves. No remedy compares with South American Nervine as a wondrous cure for the Stomach. No remedy will at all compare with South American Nervine as a cure for all forms of failing health. It never fails to cure indigestion and dyspepsia. It never fails to cure Chorea or St. Vitus' Dance. Its powers to build up the whole system are wonderful in the extreme. It cures the old, the young, and the middle aged. It is a great friend to the aged and infirm. Do not neglect to use this precious boon; if you do, you may neglect the only remedy which will restore you to health. South American Nervine is perfectly safe, and very pleasant to the taste. Delicate ladies, do not fail to use this great cure, because it will put the bloom of freshness and beauty upon your lips and in your cheeks, and quickly drive away your disabilities and weaknesses.
