

A LAKEPORT MIRACLE.

An Experience Few Could Pass Through and Survive.

Broken Down by Congestion of the Lungs and La Grippe—Weariness of Sleepless Suffering—A Narrow Escape. From the Colborne Enterprise.

The village of Lakeport in the county of Northumberland is beautifully situated on the shores of Lake Ontario, two and a half miles from the town of Colborne. The location of the village is picturesque and healthy, and as a rule the inhabitants of Lakeport are a vigorous people, troubled with very little sickness. But there are exceptions, and even in this healthy locality occasional cases of suffering and long months of weary sickness are found. Among those thus unfortunate was Mrs. Milo Haight, who for nearly two years was a great sufferer, sickness having made such inroads in her constitution that she was almost a complete wreck physically. Although a young woman her system had run down until life had become almost a burden. She had consulted physicians and tried many remedies, but no relief was found. Her attention was finally directed to Dr. Williams' Pink Pills for Pale People, and having read of the many wonderful cures accomplished through the use of this great life-saving remedy, was induced to give them a trial. The result exceeded her fondest expectations, and before long she was restored to her former health and strength. Having heard of this case the Enterprise reporter called on Mrs. Haight, and enquired into the facts, which are given almost verbatim in the following statement: "I was ill for twelve weeks in the latter part of 1891, while at home with my father in Trenton. I came to Lakeport, but was here only a few weeks when I was taken with inflammation of the bowels. After I sufficiently recovered I returned to Trenton. I had not been at home long when I was attacked with la grippe, which nearly brought me to death's door. A physician was called who said my system was badly run down. This was in February, 1892, and I was under his care for some twelve weeks before I was able to get out of doors. When I was taken down congestion of the lungs and spine set in and then the trouble went to my throat, and lastly to my ear, causing an abscess which gathered and broke three times, leaving me quite deaf. I suffered the most excruciating pains, sleep left me and I could not rest. I suffered continually with cold chills and cold hands and feet and severe headaches. The doctors gave me no hope of recovery. As soon as I was able I returned to Lakeport, but did not improve in health and I felt that death would be a relief. In June, 1892, I began using Dr. Williams' Pink Pills and had not been taking them long when the chills left me, my appetite improved, and sleep returned, something I had not enjoyed for many long weary months. After using the Pink Pills for some weeks I began to feel as though I could stand almost anything. In the month of June, 1892, I weighed 114 pounds and in April, 1893, I weighed 151 pounds, my greatest weight. I took the Pink Pills for about four months, but I now resort to them for any trouble, even a slight headache. I truly believe that Dr. Williams' Pink Pills are worth their weight in gold, and I owe my health and strength, if not my life to them. My eyes were weak at the time I was sick, but I have had no such experience since I began the use of Pink Pills. I take great pleasure in this making known my case, hoping that some fellow creature may be benefited thereby. I allow no opportunity to pass without speaking well of Dr. Williams' Pink Pills, and I know of several persons who began their use on my recommendation and were greatly benefited by them. My father, who is some seventy years of age, is receiving great help from their use. I can truthfully say I cannot speak too highly of Pink Pills, and I would not be without them in the house under any circumstances."

Mrs. Haight's husband is also taking Pink Pills for rheumatism, and being present during the interview gave his testimony to their benefit to him. Mrs. Haight's present appearance indicates the best of health, and no one who did not know of her long suffering would imagine that she had ever been sick. Her case is one that cannot but give the strongest hope to other sufferers that they too may be cured by Dr. Williams' wonderful Pink Pills, whose action upon the human system seems almost magical.

Dr. Williams' Pink Pills for Pale People are manufactured by the Dr. Williams' Medicine Co. of Brockville, Ont., and Schenectady, N. Y. Pink Pills are not a patent medicine, but a prescription. An analysis of their properties shows that these pills are an unfailing specific for all diseases arising from an impoverished condition of the blood, or from an impairment of the nervous system such as loss of appetite, depression of spirits, anemia, chlorosis or green sickness, general muscular weakness, dizziness, loss of memory, locomotor ataxia, paralysis, sciatica, rheumatism, St. Vitus' dance, the after effects of la grippe, scrofula, chronic erysipelas, etc. They are also a specific for the troubles peculiar to the female system, correcting irregularities, suppressions and all forms of female weakness, building anew the blood and restoring the glow of health to pale and sallow cheeks. In the case of men they effect a radical cure in all cases arising from mental worry, overwork or excesses of any nature. These pills are not a purgative medicine. They contain only life giving properties, and nothing that could injure the most delicate system.

Dr. Williams' Pink Pills are sold only in boxes bearing the firm's trade mark and wrapper, (printed in red ink.) Bear in mind that Dr. Williams' Pink Pills are never sold in bulk, or by the dozen or hundred, and any dealer who offers substitutes in this form is trying to defraud you and should be avoided. Ask your dealers for Dr. Williams' Pink Pills for Pale People and refuse all imitations and substitutes. Dr. Williams' Pink Pills may be had of all druggists or direct by mail from Dr. Williams' Medicine Company from either address, at 50 cents a box, or six boxes for \$2.50. The price at which these pills are sold makes a course of treatment comparatively inexpensive as compared with other remedies or medical treatment.

The mean annual temperature of the Arctic regions is below 30 deg. Fahr.

Discovery of Gold in Morocco.

A correspondent writes:—"A few months ago the Moorish authorities in Fez received intelligence that parties of mountaineers had commenced to bring in quantities of gold dust to the city for the purpose of sale. These men were forthwith arrested, and they were compelled, though most unwillingly, to divulge the locality where the metal was found. It would appear that the Government took steps to keep the matter as secret as possible for the time; but during the present expedition of the Sultan to Taflet, the force under his command passed through a mountainous region lying between Fez and the latter town, and which turns out to be the precise locality indicated by the hillmen who had brought the gold dust to the capital. We now learn that His Shereefian Majesty has detached a strong guard to occupy the gold region, it is supposed with the intention of working the mines himself. It is difficult to over-estimate the importance of this discovery, if confirmed, or the effect it may have on the future of Morocco, as once it becomes known that the precious metal exists in large quantities through the country, it would be almost impossible for the native Government to keep up their Chinese-like policy of exclusion. An influx of Europeans attracted by the great natural wealth and magnificent climate of Western Barbary would ensue, and Morocco would be thrown open to the application of European capital and enterprise.

A Locomotive Race.

A Chicago despatch, received in New York, says: "The day for the great locomotive race between the English Queen Empress and the American 999, the tremendous machines now on exhibition in the World's Columbian Exposition, has been agreed upon. By reason of the secrecy maintained by the parties to the proposed event, it is impossible to learn the exact day on which the fight will be made. The nearest approach to exactness is contained in the information that it will take place early in November. Mr. Charles Hogan, travelling engineer of the New York Central, has been in the city, and has had several conferences with the Englishman. Mr. Hogan left for the east with a contract in his pocket signed by the owners of the locomotives. The terms of this contract are unknown, save that a large sum of money, presumably \$10,000, is wagered on the result of the race, and that it will be donated to charity work, no matter which side is winner. The American locomotive made several tests of speed while attached to the Empire State express, with Engineer Hogan's hand at the lever. The best records thus far posted are:—One mile in 0.35, or at the rate of 102 8-13 miles per hour, and a mile in 0.32, or at the rate of 112 miles an hour. The Queen Empress is a full sister of the famous Great Britain, which has a record of 80 miles an hour. The engines represent two distinct and separate classes of locomotive building.

A Year's Railway Fatalities.

The British Board of Trade on Wednesday issued a return for the six months ended June 30th, showing the fatalities and injuries connected with railway work and railway travelling during that period. The total number of fatalities was 524, but of these only 473 occurred actually upon railways, and this number includes suicides, level-crossing accidents, and all other fatalities upon the railroad of the United Kingdom. Of persons injured upon railways during the same period there were 1955. The number killed or injured by accidents to trains or permanent way was comparatively small, the fatalities being only six, while the total of those injured was 225. Of the six thus killed only one was a passenger, the remainder being companies' servants. Compared with the corresponding period of last year, the total deaths show a decrease, the persons killed being 72 less and those injured 49 less.

Phillips' Flying Machine.

A few evenings ago this machine was run, and completed a flight of over one and one-half turns round the track, or a little above 1,000 ft., without touching. The speed on this occasion was timed almost exactly at 40 miles an hour. There was a dead weight of 55 lbs., and the machine itself weighing 330 lbs.; the total weight lifted was 385 lbs. A new set of sustainer surfaces had been substituted for those originally used, and the pitch of the propeller was somewhat reduced in order to get a higher speed, for which the sustainer surfaces were suited. The slats in this case are not quite horizontal when the machine is at rest, but when in the flying position the surfaces are nearly horizontal. We understand that on another occasion three complete rounds of the track were made, the machine being in the air the whole time; that was on a perfectly calm evening. The difficulty of working what is practically a model machine will be appreciated by all those who have made experiments with very small steam engines and boilers. In the present case there is no more than two or three double handfuls of coal on the grate at one time. Another difficulty arises from the centrifugal action due to the machine being confined to the circular track. This is more especially apparent at the higher speeds, when the fire is apt to get all thrown to the outer side of the grate bars, thus letting cold air through and reducing the pressure.—[Engineering.

Balloon Manœuvres.

An interesting trial with dirigible balloons has just taken place at Paris. Five military balloons, with aeromats in charge, were sent up from the Esplanade des Invalides, with instructions to descend within an hour at Combs la Ville, after sailing over a radius of nearly 30 miles, supposed to be occupied by an enemy. As the balloons made their ascent, a contingent of cyclists were despatched from the same point, with orders to capture the balloons should they fail to alight beyond the boundary of territory agreed upon. Of the five balloons, two landed safely on friendly ground, a third pursued its obstinate career as far as Reaux; and the remaining two fell within the radius, and succumbed as prisoners to the cyclists.

The population of London increases at the rate of 200 souls a day.

FACTS ABOUT THE HEART.

Interesting Statistics Showing the Vast Amount of Work That Organ Does.

The human heart is a hollow muscle of a conical form placed between the two lungs and inclosed in the pericardium or heart sac. The ordinary size of the heart in the adult is about five inches in length, three and one-half inches in breadth at the broadest part, and two and one-half inches in thickness. Its weight is from ten to twelve ounces in men and from eight to ten ounces in women. Dr. Benecke, of Marburg, has made known his observations on the growth of the human heart, the fact appearing that the increase is greatest and most rapid during the first and second years of life, its bulk at the end of the second year being exactly double what it originally was. Between the second and seventh years it is again doubled in size. A slower rate of growth then sets in and continues during the period of maturity of other portions of the body. After the fifteenth year up to the fiftieth the annual growth of the heart is about .061 of a cubic inch, the increase ceasing about the fiftieth year. The heart, although so small, is a wonderful piece of mechanism, and of great power. With each stroke or beat it projects something like two and a half ounces of blood into the conduits or channels of the body, throwing it for a distance of nine feet. This it does sixty-nine or seventy times a minute. The number of its pulsations varies in the sexes and according to posture. In the male it beats 8 times a minute when standing, 71 when sitting and 66 when lying. In the female it is 91, 84, 80 in the similar positions respectively.

Those who believe that Dr. Sage's Catarrh Remedy will cure them are more liable to get well than those who don't.

If you happen to be one of those who don't believe, there's a matter of \$500 to help your faith. It's for you if the makers of Dr. Sage's remedy can't cure you, no matter how bad or of how long standing your catarrh in the head may be. The makers are the World's Dispensary Medical Association, of Buffalo, N. Y. They are known to every newspaper publisher and every druggist in the land, and you can easily ascertain that their word's as good as their bond.

You wind your watch once a day. Your liver and bowels should act as regularly. If they do not, use a key. The key is—Dr. Pierce's Pleasant Pellets. One a dose.

Horses With White Feet.

In France, and I believe in all European countries, it is a most ominous sign for a rider—especially a soldier—to want a horse with four white feet. The famous Gen. Lasalle, who was very superstitious on this point, never knowingly mounted such a horse. The day of his death, after several ominous events which had happened that day, such as a broken mirror, a broken pipe, the picture of his wife broken at the moment he went to look at it for the last time, he mounted a horse not his own, and without glancing at his feet. The horse had the unlucky signs. Mounted upon this horse, he was struck by a shot fired, at a moment when the firing had ceased, by a Croat among the prisoners just taken at the battle of Wagram.

On the other hand, these four white feet are a mark and token of consideration with Orientals, who do not fail to mention the fact in the pedigrees of their horses. I noticed a proof in the certified list made by elders of the countries which accompanies the present which Abd'el Kader has just (July, 1854,) made to the Emperor of a certain number of valuable horses. Thousands of such proofs might be cited.

She Was Saved.

From days of agony and discomfort, not by great interpositions, but by the use of the only sure-pop corn cure—Putnam's Painless Corn Extractor. Tender, painful corns are removed by its use in a few days, with not the slightest discomfort. Many substitutes in the market make it necessary that only "Putnam's" should be asked for and taken. Sure, safe, harmless.

Mrs. Mary E. O'Fallon

of Piqua, O., says the Physicians are Astonished, and look at her like one

Raised from the Dead

Long and Terrible Illness from Blood Poisoning

Completely Cured by Hood's Sarsaparilla.

Mrs. Mary E. O'Fallon, a very intelligent lady of Piqua, Ohio, was poisoned while assisting physicians at an autopsy 5 years ago and soon terrible ulcers broke out on her head, arms, tongue and throat. Her hair all came out. She weighed but 73 lbs., and saw no prospect of help. As she began to take Hood's Sarsaparilla and at once improved; could soon get out of bed and walk. She says: "I became perfectly cured by

Hood's Sarsaparilla

and am now a well woman. I weigh 128 lb., eat well and do the work for a large family. My case seems a wonderful recovery and physicians look at me in astonishment, as almost like one raised from the dead."

Hood's PILLS should be in every family medicine chest. Once used, always preferred.

Agricultural Electricity.

An interesting example of electricity applied to farm work is now in operation at a Scotch farm. The whole of the usual farm machinery, such as thrashing, sowing corn thrashing, and the like, is here driven by an electric motor. The electricity is generated by water power, the turbine wheel which drives the dynamo being about 1,000 yards from the farm. The electric current is conveyed by underground wires to the house and farm, in each of which a storage battery is placed. These supply the electric current for lighting and motive purposes when the machinery is not working. The whole of the mansion is illuminated by electric light, and an electric motor is provided for pumping the water for domestic purposes.

Spectator—"Why, the center-felder is singing while running." Stockholder—"Yes, that's a trick of his." Spectator—"What's he singing?" Stockholder—"After the ball." "Could you oblige me," said the colonel, "with a five dollar bill?" "I can," replied the major; "bill collector left one for you ten minutes ago!"

One Minute Cure for Toothache.

Toothache, the most common and one of the most painful affections, is instantly cured by the application of Polson's Nerviline. Polson's Nerviline is a combination of powerful anodynes, and it strikes at once to the nerves, soothing them and affording in one minute total relief from pain. Mothers, try it for your children's toothache. Nerviline is sold in 10 and 25 cent bottles by all druggists.

"HITS."

OLD, CHRONIC PAINS SUCCUMB TO ST. JACOBS OIL IT HITS THE SPOT AND CURES.
