DAVEY & SON.

SIDEWALKS.—The council will soon have men at work building new sidewalks and repairing those that may be made to last a few years longer, and among the latter are several that ought to be attended to without delay, or the corporation may be called upon to pay for damages to the boots or shoes, if not to the toes, of some of our villagers. The danger arises from projecting nails, many of which stick up for more than half their length out of the planks, and they should all be pulled out at once. We have extracted a good many of them with our fingers, but the majority of them have so strong a hold that it would a claw-hammer to draw them. As they are capable of causing a more than trifling accident, a man should be sent around to remove them.

FINE WEATHER.—Spring is here and the weather is becoming quite pleasant. Hundreds of all kinds of birds, except the late comers, have arrived, the frogs are making themselves heard in the marshes, mud turtles have been seen, and snakes are emerging from their holes. For the past two or three days the village cows have been trying to graze, and a heavy rain on Tuesday night gave the grass such a start that it is already almost long enough to afford a scanty mouthful. On Good Friday there was a light fall of snow and another on Saturday, after which the temperature rose steadily. We are glad to learn that the night frosts during the first part of the month did little, if any, damage to the fall wheat or clover, both of which are said to be looking well. On Wednesday, the 18th inst., the bees were carrying pollen into their hives—one day earlier than last year. Later.—More rain and a fall in the temperature.
