Graduate of Ontario Veterinary College.  
Office: Cambray, Ont.

### SURVEYORS.

JAMES DICKSON,  
P. L. Surveyor, Commissioner in the Q. B.,  
Conveyancer, &c. Residence, and ad-  
dress, Fenelon Falls.

### DENTAL.

DR. NEELANDS, DENTIST, LINDSAY,  
Extracts teeth without pain by gas (vital-  
ized air) administered by him for 27 years.  
He studied the gas under Dr. Colton, of  
New York, the originator of gas for extract-  
ing teeth. Dr. Colton writes Dr. Neelands  
that he has given the gas to 186,417 per-  
sons without an accident from the gas.  
Other pain obtunders used. A good set of  
teeth inserted for \$10. Dr. Neelands  
visits Fenelon Falls (McArthur House) the  
third Tuesday of every month. Call early  
and secure an appointment.

### W. H. GROSS, DENTIST.

The beautiful Crown and Bridge work  
practised with success. Gas and all other  
anesthetics for extracting teeth without  
pain. A set of Artificial Teeth, better than  
the average, for \$8 00. Rooms directly  
opposite Wood's stove depot, Lindsay.

### H. HART, L. D. S.

A SET OF GOOD TEETH FOR \$10. Gas  
and local anesthetics for painless ex-  
tracting. Satisfaction guaranteed in all  
branches of dentistry.  
Office over Fairweather & Co's store  
nearly opposite the post-office, Lindsay

### INSURANCE.

## To the Public.

THE ROYAL CANADIAN INSURANCE  
Co. has amalgamated with the Alliance  
of England, giving insurers the security of  
\$25,000,000 and the same good policy.

JOHN AUSTIN, Agent  
Also agent for the Queen of Eng-  
land and Caledonian of Edinburgh. Cap-  
ital combined, \$45,000,000.

## TORONTO FINANCIAL CORPORATION

Authorized Capital, \$2,500,000.  
Subscribed Capital, \$630,000.

J. K. Kerr, Q. C., President.  
E. J. Davis, M. P. P., Vice-President.  
Geo. Dunstan, General Manager.

## Fenelon Falls Branch.

Accounts opened and deposits received.  
Interest allowed at highest current  
rates in the

## THE McMULLEN FENCING —AND— POULTRY NETTING

ARE THE  
ever made or sold in Canada. You want  
only THE BEST for your money. Don't  
waste it on poor imitations and cheap sub-  
stitutes, but ask for and buy the McMullen  
goods. They are unequalled for FARM,  
LAWN or POULTRY fencings. No snow  
drifts with McMullen's fencing. For sale  
by hardware and general merchants.  
General Sales Agents: For Ontario and  
Western Provinces—The B. Greening Wire  
Co., Hamilton, Ont.  
For Quebec and Eastern Provinces—  
James Cooper, Montreal.

## New Perils for Hunters.

NONE OF THEM SAFE WHEN BULLETS  
FLY FOUR AND A HALF MILES.

Minneapolis, Minn., Oct. 30.—The deer season is already open in Wisconsin, and deer are being slaughtered by the hundred by sportsmen now in the woods. On November 1st the season will be open in Minnesota. Owing to the introduction of the modern, small-calibre, long-range firearms, old time hunters look forward with apprehension to the accidents that are likely to occur. In the window of a Minneapolis gun store hangs a harmless looking little rifle, to which is attached the significant placard: "Range four and a half miles." That simple little announcement means that many men who have heretofore spent most of the month of November in the woods of northern Minnesota will remain at home this year, and scan the newspapers for accounts of the deaths of unhappy hunters who have been killed by these terrible weapons. A number of these rifles have been sold, and it is apparent that no man within a radius of several miles of a hunter armed with one of them has any certain tenure of life. In Minneapolis alone at least a dozen men who haven't missed their annual deer hunt for several years, have given it out that this year they prefer the quiet business to the hazards of deer hunting with such dangerous weapons in use in the woods.

This is the first year that these rifles have been used generally in the United States for hunting purposes, and with those who haven't reflected on the possibilities of their long range they are exceedingly popular. The long, small-calibre bullets, steel coated, discharged from these rifles, carry 800 yards on a dead line. There is no need for adjustable sights with such a powerful rifle, and for that reason, as well as for their comparative cheapness, they are proving popular. A Minneapolis man who used one of these rifles last year says that he would like to see a law passed forbidding the use of such weapons. His change of heart was brought about by a little experience he had while in the woods last winter. He was sitting on a log smoking, waiting for his wagon to come up with the supplies, when there came the peculiar moaning sound of the small-calibre bullet. It struck a tree scarcely four feet from Mr. Johnston. He had hardly recovered from his surprise when another bullet passed near his head. The next moment Mr. Johnston was crouching behind the log. After he had recovered his equanimity he dug the ball out of the tree, and found that it belonged to one of his own men. He learned from them afterwards that the man was three miles away at the time the two shots were fired.

"You may think it a laughing matter," said W. W. Leonard, another well known hunter, "but let me point out a few facts. The rifles now being sold in Minneapolis and throughout the Northwest have the terrible carrying power of the formidable small-calibre now in use in the armies of Europe and in the regular army of the United States. These rifles are warranted to kill at three miles. The steel-incased bullet leaves the muzzle of the rifle with such a terrible velocity that it will penetrate fifty inches of pine. Now, imagine what may happen with a party of hunters, armed with such rifles, distributed over a comparatively small area of wooded country. One of the hunters may fire at a deer, miss his aim, and the bullet may go on and kill another member of the party two or three miles away. This is no idle fear; such accidents often occur with the rifles that have been used in hunting in previous years, and which have an extreme range of not more than 1,000 yards. It may be urged that no rifle bullet can proceed a great distance in a forest without imbedding itself in a tree trunk, but in the slashings, where deer are often hunted, one can sometimes see nothing but scattering trees and small underbrush for miles. I contend that there is no excuse for the use of such deadly weapons. In ordinary deer hunting he is a poor hunter who doesn't stalk his game within 150 yards. Of course in hunting mountain sheep and goats the range is much longer. But of what use is such an extreme range? A man can't see his game at two or three miles, and even if he could he couldn't aim within fifty feet of it. There is no use for such weapons except in warfare, and they ought to be forbidden in hunting.—Chicago Record.

## Most Important.

The discovery of what appears to be anthracite coal in the Sudbury district is of incalculable importance to Ontario should the deposit prove as large and the quality as excellent as reported. Our manufacturers have been continually demanding extra protection because they were at the disadvantage of having to import coal. Our enormous mineral deposits have been practically left undeveloped, because the mines would have to be worked at a disadvantage, owing to their remoteness from a fuel supply. Geologists have been continually telling us that there was no coal in Ontario, and we have been too easily discouraged by these reports. Instead of going on hunting for coal under new conditions, or using the peat, of which there is an unlimited supply, Canadians have abandoned many projects which would have enriched the country and brought us population.

With the great impulse given to mining operations by the gold and silver discoveries in British Columbia, we seem to be rediscovering ourselves and making a fresh examination of our resources. All the gold and silver that is taken out of the ground in British Columbia will be of less advantage to Canada than the feeling of confidence and the impulse to go on and make something out of our country, which seem to have been born with the mining boom. The enormous advantage to manufacturers of having coal near at hand will produce a different condition of affairs. Canada, in spite of all tariffs, will always be a cheap country to live in, if it has small coal bills to pay. There is no reason why this should not become one of the greatest manufacturing countries in the world if we find coal here, close to our centres of population, in sufficient quantities, and those who are engaged in industrial enterprises undertake not only to supply the little neighborhood in which they live, but to do an export trade.

Everything indicates an era of prospecting, discovery and advancement in Canada. It but for one brief year we can get the eyes of the world turned upon the richness of this country's resources, people will come here, and what we lack is people. We have politics, religion and race prejudice, and all that sort of thing, to sell, but we want people, and people, when they come, should find those free institutions and broad-minded laws which will not prove embarrassing to strangers when they arrive and try to live with us.—Toronto Star.

## Fell 250 Feet and Lives.

New York, Nov. 1.—Charles A. Heaganey of Bound Brook, N. J., fell from the rear of a Lehigh Valley passenger train on Thursday night as it was passing over Green's Bridge, N. J., and dropped to the tow-path of the canal below, a sheer fall of 250 feet. He is still alive in St. Luke's Hospital, South Bethlehem, Pa. Heaganey is a middle-aged man and railroad section boss. He went to Easton, Pa., on Thursday night and took part in the sound money parade. He started for his home on the special train, which left about midnight. It was crowded, and he stood on the rear platform of the train. As it was passing over Green's Bridge he lost his balance and fell. How he escaped instant death is marvelous. He lay on the bank until yesterday morning at 7 o'clock, when he was found by Conductor Bigley, who was returning from Perth Amboy with the empty coaches. One leg was broken, three ribs were fractured, one eye was cut, and Heaganey received internal injuries that may prove fatal.

The German Emperor, according to a member of the Imperial household, becomes more difficult to please every day. There has not been such a despot in Europe since the days of Emperor Nicholas I.

Contributory negligence does not appear to be an acceptable plea in French courts. A man dining in a Narbonne restaurant drew a 100-franc note from his pocket-book to pay for his dinner, while his soup was cooling. The bill flew into the soup, was fished out and laid upon the edge of the table to dry, when it fell to the floor. An intelligent poodle in the room thought it was for him and swallowed it. The owner of the note then sued the poodle's master for the hundred francs, and the local court has decided that the latter must pay the amount.
