SCENTS AND PERFUMES.

To be highly perfumed is most vulgar, no matter how dainty the perfume may be; but a faint, sweet scent or just a suspicion of perfume adds materially to the daintiness of a woman's attire. To a great many people strong perfume is most offensive, and too many people use it to conceal other odors, which possibly arise from uncleanliness. It is a pretty idea to select one's favorite perfume and use only that, making it characteristic, so to speak. Sachets are dainty things to have, and one does not need other perfume. If made of good size and generously filled with the sachet powder and cotton, they may be laid among the clothes, and handkerchiefs in trunks and bureau drawers.

The Ruthless Hand Of Nature Permits Only the Survival of the Strongest But Medical Science Secures the Survival of the Weakest,

From the Cornwall Standard,

The science and art of medication holds a unique place in the esteem of the entire civilized world, because by a judicious application of progressive science relative to the art of healing innumerable triumphs are won in the struggle for health. The profession of medicine we may sagely say, is no sinecure its triumphs and successes are rehearsed daily by the million. Those who are in the vanguard of this movement are our greatest benefactors. Their discoveries are a boon to humanity; Putnam's Corn Extractor, the only sure they have given relief to thousands who would have dragged out a miserable and more or less brief existence. He said I had palpitation of the heart and it must run its course. The truth is I felt so weak that my hope of recovery was about nil. About the first of May I determined to try Dr. Williams' Pink Pills. The result was the dizziness left me, day by day my pains vanished into imperceptibility, and I began to feel myself again. The improvement continued until I was able to follow my business with unexpected vigor. I am increasing in flesh and in the general signs of good health, and I unhesitatingly attribute my re-
