KNOWLEDGE IN PLANTS.

Said to Have Traits Found in Human Beings.

That plants have intelligence is maintained by Prof. Shaler of Harvard University. After discussing the automata, he says in a thesis:

"We may accept as true the statement that our higher intelligence is but the illuminated summit of man's nature, and extend it by the observation that intelligence is normally unconscious, and appears as conscious only after infancy, in our waking hours, and not always then."

In summing up he uses the following:

"Looking toward the organic world in the manner above suggested, seeing that an unprejudiced view of life affords no warrant for the notion that automata anywhere exist, tracing as we may down to the lowest grade of the animal series what is fair evidence of actions which we have to believe to be guided by some form of intelligence, seeing there is reason to conclude plants are derived from the same primitive stock as animals, we are in no condition to say intelligence cannot exist among them. In fact, all we can discern supports the view that throughout the organic realm the intelligence that finds its fullest expression in man is everywhere at work."

EVIDENCE THAT NONE CAN DOUBT.

THAT DODD'S KIDNEY PILLS ARE THE ONE SURE CURE FOR RHEUMATISM.

W. E. Ellis got so He Could Not Walk or Feed Himself—He Tells of His Cure.

Cedar Dale, Ont., Aug. 24.—(Special)—Every day seems to furnish fresh proofs that Dodd's Kidney Pills are the one sure and permanent cure for Rheumatism. This village furnishes evidence that no one can doubt in the person of W. E. Ellis. His story is best given in his own words.

"Two years ago," says Mr. Ellis, "I got Muscular Rheumatism. I tried all sorts of medicines, but none of them did me any good."

"At last my wife would send for a doctor. When he arrived I said 'Doctor, can you cure Muscular Rheumatism?' 'No,' said the doctor, 'Then' I said, 'you are of no use to me.'"

"I got so bad I could not feed myself or walk alone. Then I was induced to try Dodd's Kidney Pills. I took six boxes of them which drove all the Rheumatism out of me and left me in good health again."

Dodd's Kidney Pills cure Rheumatism by removing the cause—by putting the Kidneys in shape to take the uric acid out of the blood. They always cure Lumbago and Sciatica in the same way.

COLONIES OF THE WORLD.

Occupy Two-Fifths of the Land Surface of the Globe.

Colonies are not only convenient outlets for the surplus population of older nations but form centers of trade and influence for the mother country. They occupy two-fifths of the land surface of the globe and have one-third of the world's population, that is, about 500,000,000. Most of the colonies are tropical, Canada is an exception. This fact seems to lend force to the prognostics of certain economists who insist that ultimately the strong nations of the North will have to control the tropics.

There are 140 tropical or sub-tropical colonies divided roughly into three groups—East Indian, West Indian, and African. The native population of these colonies is 485,000,000, with but few Europeans. On the other hand, the population in Canada, Australia, and South Africa is largely British and numbers something like 15,000,000. Great Britain comes first in colonial possessions, controlling nearly one-half of the 140 colonies, dependencies, protectorates, and "spheres of influence." The area of the British Empire is about 11,400,000 square miles, exclusive of Egypt and the Sudan.

Next comes France, controlling an area of about 4,500,000 square miles, with a population of 56,000,000 or more. In Africa alone the French domain comprises more than one-third of the land surface. In Asia, her largest possession is French Indo-China, with its 363,000 square miles and its 20,400,000 souls. Germany's colonializations are recent, beginning in 1884. She ex-

exercises influence over 1,000,000 square miles of territory with a population of 14,700,000, mostly in Africa. The Netherlands control a colonial population of 35,000,000. Of Spain's former vast colonial possessions only a mere fragment of less than 100,000 square miles remain.

The seven great nations which have in modern times experimented with the government of non-contiguous people, or "colonies," so-called, are England, Netherlands, France, Belgium, Germany, Portugal, and Spain, and their relative success may be considered as in about the order in which they are here named.

WANTED.

I'd like to read a joke about A woman who can cook; Or meet a man who owned right out He could not write a book.

I'd like to see the villain who With rage turned aught but white; I faint would meet a poet too— A poet who could fight.

I'd like to meet some ma-in-law; Loved by her daughter's spouse; A tramp who just delights to saw, Or a girl who loves a mouse.

Such prodigies as this I fear Can never, never be; But, if they ever should appear, "May I be there to see."

A NEW KIND OF GLASS.

A new kind of glass that resists great heat as well as sudden changes of temperature is made from Brazilian quartz pebbles, says an exchange. The pebbles are heated red-hot and then thrown into distilled water. The purest pieces are next selected, and welded with the oxyhydrogen blow-pipe into long stems like knitting needles, from which glass vessels of any shape can be made. At present the quartz glass is chiefly employed for making laboratory apparatus. Into a test-tube made in this way a white-hot coal can be dropped without breaking it. Vessels of other forms can be heated white-hot and then plunged into cold water without cracking.

BASE INGRATITUDE.

Gracie, aged five, had just recovered from measles, when her small brother took the same complaint.

Upon becoming convalescent he was sitting up munching a sponge-cake, while his sister sat looking on.

By various means she tried to induce him to part with a bit of the dainty, but the invalid took no notice. He ate steadily on; but just as the last bites were disappearing, Gracie could stand it no longer, and she exclaimed indignantly:

"Just look at him! He won't give me a crumb, and it was me that gave him the measles!"

George: "You do not call on Miss Rosebud now?" Jack: "No, I got disgusted. She has such a coarse laugh." George: "I never noticed that." Jack: "You would if you'd been within hearing when I proposed to her."

M'Jigger: "Chicken-hearted? Well, I should say he's the limit." Thinkgumbob: "Is that so?" M'Jigger: "Nothing can make him fight. Why, I've even seen him let a man cheat him out of his turn in the barber's shop, and he never said a word."

THE BANAL ROUTE.

There is nothing more assuring to the traveler than his knowledge of the fact that he is traveling on a firm roadbed, upon which is laid the heaviest of steel rails, made true in all their curves, and that the train which carries him is of the highest standard of excellence known to railroads and is being guided to its destination by experienced minds. These are the conditions which become apparent to the frequent traveler on The Wabash Line, and which have made that line justly famous. The Wabash has its own rails direct to the World's Fair Grounds in Saint Louis. All Wabash through trains stop at World's Fair Station (Forsyth) in order to give passengers an opportunity to view from the trains the World's Fair Buildings. J. Richardson, Dist. Pass. Agent, Toronto and St. Thomas.

A FAIR PERCENTAGE.

In British shipyards 60 per cent of the world's output of vessels during last year were built, from which, during the year, were launched a total of 1,368 vessels or 1,619,000 total tonnage. There were launched in America in 1902, 162 vessels of 315,000 tons. Germany launched 259 vessels of 272 tons.

KNEW HIS BUSINESS.

"Now, here is a showcase," said the commercial traveller, pointing to a peculiar-looking specimen of his wares, "that is bound to become popular. It magnifies everything put in it to double its natural size."

"Can't use it in my business," replied the prospective customer. "What I want is a case that will seemingly reduce the actual size of its contents."

"What is your line?" asked the dealer.

"My speciality is ladies' shoes," replied the other, with a half-suppressed grin.

"I reckon you don't often have such a jolly little party as this to drive?" remarked one of a rather noisy company of young fellows during a day's drive in the country.

"Not now!" was the quiet response of the driver. "I ain't driv such a lot sin' I left my last job!" "What was that?" "Coachman at a lunatic asylum!" came the cool reply.

Mrs. Wickwire sat up and shook her sleeping husband's shoulder vigorously. "What is it?" he mumbled. "I want you to snore either in soprano, bass, alto, or tenor, and confine yourself to one tone. You keep switching from one to another so rapidly that I can't sleep."

Stands any Test

The most severe judgment of the expert tea taster pronounces Blue Ribbon Tea absolutely the best. Why?

It is free from tannin and other bitter substances—no coarse fibrous leaves employed in its making.

The taste is pure, rich and creamy—that nameless quality that signifies to the expert and lovers of true tea that it is the best leaves and shoots of the tea plant properly cured.
