The Fenelon Show.

The eighteenth annual fall show of the Fenelon Agricultural Society was held here on Wednesday and Thursday of last week, and was, we are glad to be able to say, the best in several years. There were very few sheep and pigs on the ground, but the turn out of horses and cattle was unusually good, and the coops of poultry were very numerous. A pair of fowls entered as "Games" looked like colored Dorkings, with the fifth toe cut off and the rooster's comb dubbed; and we noticed that the experienced and wide-awake judge, Mr. D. C. Trew, of Lindsay, had written the word "disqualified" across the card on the coop. In the hall there was a vast improvement over last year, both downstairs and upstairs being crowded with exhibits. Mr. Jas. H. Stanton had a splendid display of photographs, and Mr. R. J. Moore showed a collection of toys from his variety store. During the "speeding in the ring," which, as usual, was the chief attraction of the day, a little boy, son of Mr. John Edward Ellis, of Fenelon, was struck by a wheel of one of the trotting sulkies and knocked down, but, fortunately was not much hurt. The weather was delightful, and the attendance so great that the gate receipts amounted to \$215. The Sylvester band, from Lindsay, furnished excellent music.

LIST OF AWARDS.

DRAUGHT HORSES.—Span, 1 B. Burtchael. Brood Mare, 1 Jas. Robson, 2 Wm. Brandon. Foal, 1 John Fell, 2 Wm. Brandon. Two-year-old colt, 1 B. Burtchael. One-year-old colt, 1 B. Burtchael, 2 Jas. Pondson.
GENERAL PURPOSE HORSES.—Span G. P. 1 Alex. Jamieson, 2 John Moore. Brood Mare, 1 John A. Day, 2 H. C. Hamill. Foal, 1 John A. Day, 2 O. Glaspell. Two-year-old colt, 1 John Moore, 2 Wm. Brandon. One-year-old colt, 1 and 2 John Moore.

Railway Accident.

About 7 o'clock on Wednesday morning an accident—though not as bad a one as was at first reported—happened to the regular train on its way from Haliburton to Lindsay. In the train were three cattle cars full of live stock; and, when about two miles north of Kinmount, one end of the brake on the second of these cars got loose and fell on the track; and the result was that that car, the one behind it, and a box car, were thrown from the rails and fell over onto their sides. Fortunately, there was no embankment at the spot, the train was going very slowly, and the breaking of a coupling released the engine; otherwise, the accident would no doubt have been very disastrous. The two cars contained 47 head of cattle, 15 sheep, 17 hogs and a calf, the property of Messrs. McDougall, Braudon & Austin, of this village, and the head of the firm had accompanied them from Haliburton. As it happened, a number of section men were on the train, and, as they had their tools with them, they demolished the cars and liberated the imprisoned animals in less than half an hour. When this had been done, it was found that a cow and four of the sheep were dead, one of the cattle had a broken leg, and nearly all the others moved as if injured, though they had escaped, as far as could be seen, with whole bones. All of them were more or less battered and bruised, and are worth a good deal less than they were when put into the cars; but the loss, whatever it may prove to be, will fall upon the railway company. The train hands and some of the passengers were in the smoking car at the time of the accident, and nobody was hurt. An auxiliary train was sent from Lindsay as soon as possible after the smash up occurred, and it passed through the Falls, on its way back, about 5 p. m.

Steam Heating.

Mr. J. Twomey's hotel, the Mansion House, is now heated by steam. The "plant," manufactured by the Pease Furnace Co., of Toronto, was put in by Mr. Jeff. Hunter, one of their employees, assisted by local mechanics, and has been in successful operation for upwards of a week. It consists of a furnace, a 15-h. p. boiler, an arrangement of pipes and nineteen "radiators" of different sizes scattered throughout the house. There are, of course, far more than nineteen rooms; but some of the radiators are so large that two of them will heat a long hall and the bed rooms opening into it. They were artistically painted by Mr. Edward Chambers, and are quite ornamental as well as useful. The devices for regulating the supply of heat are very ingenious and work to a charm. The furnace, which has an automatic self-adjusting "damper," will burn either wood or coal, and Mr. Twomey intends to use the latter, which, with wood at its present outrageous price, will no doubt be the more economical of the two. We cannot afford time or space to describe the outfit in detail, and the genial proprietor of the Mansion House will no doubt willingly exhibit it and explain its *modus operandi* to all who may wish to see it—especially to those who may contemplate heating their houses in the same manner. The total cost was about \$1,000; but it will no doubt pay for itself in a very few years by the saving it will effect in fuel.

McDundas & Flavelle Bros. want your surplus Poultry, and will take them alive or properly dressed. Your local merchant will give you prices and particulars.
