

turned out that their exper... had been similar. Plums will be unusually plentiful—both red and blue. Tomatoes and corn will be light, grasshoppers and slugs causing great injury to the former.

The village of Victoria Road was officially declared a port of the Trent Canal on Wednesday last. Superintendent McClelland, Mr. R. J. McLaughlin and so others went up on the government steamer Bob Hall to do the declaring.

A letter received at the Survey Department from Mr. Alex. Niven, D. L. S., of Haliburton, states that he is being deserted by his Indian assistants over a hundred miles from his base of supplies, and will be forced to abandon his work for the winter.

A Toronto lady, Mrs. Russell, while driving from Geleit to Carnarvon one day last week to visit her mother, Mrs. Richard Fry, wrapped her baby up in a shawl to protect it from the rain and cold. After driving about a mile she discovered that the child was dead in her arms, it having been smothered by the shawl.

National School of Telegraphy, Lindsay, Ont.

Mr. A. M. Paton, of Lindsay, for years agent for the Grand Trunk Railway Co., has opened a School of Telegraphy in Lindsay. The demand for operators far exceeds the supply. A common school education is all that is necessary. Mr. Paton's wide and varied experience in the freight and passenger department, as well as commercial and railway telegraph work, gives his school an advantage over any similar institution in Canada. Terms are easy, and six months in his school will make a good operator of any boy of average intelligence. Here is an opportunity for young men and women to get a business in six months and be in a position to command a good salary in early spring. Railway telegraphy leads the way to success. Write for particulars. Address: A. M. PATON, Principal National School of Telegraphy.

RAPE FOR LIVE STOCK.

How to Obtain Best Results in Feeding This Plant.

In feeding rape to sheep it is a practice generally adopted to supply in a feeding box or trough a quantity of dry chaff, which the sheep will eat with the rape, and this will help to prevent any bad effects from the succulent food. In turning sheep onto a rape crop they should not be allowed to roam over a large area at one time. It is a good plan to have a number of small inclosures, so that as soon as the crop on one is eaten down the sheep can be removed to another, and the one left be given a chance to recover. After a few weeks' rest the first inclosure will be grown up sufficiently for the sheep to be turned in again. Whereas, if the sheep are allowed to wander over a large area, they will destroy as much as they eat, and the plants will not do so well if the hearts are continually being nibbled at.

To obtain the best results from the plants, the sheep should be removed when the plants have been eaten down to within two inches of the ground. A very good way to carry this out is to have a portable fence made which can be shifted as required. By this means the sheep can be given just as much of the crop as they can profitably consume, and the eaten crop left to make a fresh growth. Under these conditions the crop can be fed off three times during an ordinary season.

Good Feed For Pigs. Rape also makes an excellent feed for pigs. They can be turned in to graze on it the same as sheep, and young pigs can be fed on a crop and kept in good condition until they are large enough to bring in and top up for market. When it is not convenient to turn the pigs on the crop, and it is not advisable to do so where sheep are likely to be on the same crop, a quantity can be cut and carted to the pigs every day. Pigs can be kept in good show condition and in good order for stud purposes on rape alone.

Rape in conjunction with other fodder is largely used for dairy cattle, but is particularly valuable for mixing with other food to make silage. When mixed with vetches, oats and rye it makes a highly nutritious and valuable silage. When fed to dairy cows in a green state it should be allowed to remain in the field for twenty-four hours after cutting, so as to allow it to wilt. When this is done it is not likely to taint the milk as when it is fed in a fresh condition. It should always be fed to cows immediately after milking—not before the cow is milked.

Cattle should never be turned onto a crop of rape or allowed to consume large quantities of the plant unless the leaves have been well wilted in the sun, says U. R. Gilbert in Farm and Fireside, as it soon causes "hoven" or "blown," caused by the accumulation of gases in the stomach, and if not treated in time this soon causes the death of the animal.

House to Rent.

A large frame house in the outskirts of the village at a very low rental. Good stable accommodation. Apply to THOS. ROBERTS.

BIRTHS.

ELLIS.—At Falmouth, Sask., on Saturday, August 31st, 1907, the wife of Mr. W. S. Ellis of a daughter.

NEWSPAPER LAW.

1. A post-master is required to give notice by letter (returning the paper does not answer the law) when a subscriber does not take his paper out of the office, and state the reasons for its not being taken. Any neglect to do so makes the postmaster responsible to the publisher for payment.

2. If any person orders his paper discontinued he must pay all arrearages, or the publisher may continue to send it until payment is made, and collect the whole amount whether the paper is taken from the office or not. There can be no legal discontinuance until the payment is made.

3. Any person who takes a paper from the post office, whether directed to his name or another, or whether he has subscribed or not, is responsible for the payment.

4. If a subscriber orders his paper to be stopped at a certain time and the publisher continues to send it, the subscriber is bound to pay for it he takes it from the post-office. This proceeds upon the ground that a man must pay for what he uses.

5. The courts have decided that refusing to take newspapers and periodicals from the post-office, or removing and leaving them uncollected for, is prima facie evidence of intentional fraud.
