Much sympathy is felt for his wife and eight small children.

**"Hecla" Furnace**  
Means Perfect Heating without Gas, Dust or Smoke.

The "Hecla" Furnace is the only Furnace with Fused Joints.

These Joints are made by fusing the steel and cast iron parts together at white heat making an indestructible joint. Fused Joints are permanently airtight. Even after 20 years' use they will not work loose or leak. They insure absolute freedom from dust, smoke and gas.

The Steel-Ribbed Fire Pot used on the "Hecla" Furnace has three times as much radiating surface as any other style of fire pot. It will save fuel for you and give you more heat. It extracts from the fire, heat that would otherwise go up the chimney.

Let us show you the 1908 "Hecla" and explain all the latest improvements in detail.

Made by the makers of "Peerless, Peninsula" Ranges.
