Toronto Conservatory of Music. Gold  
Medalist of Whitty Ladies' College. Voice  
and piano pupils accepted. Apply at  
studio, Dr. Wilson's residence, or telephone  
No. 29.

THE  
**EMPRESS**  
SHOE

\$ 3.00

MADE WITH  
STEEL ARCHED SHANK

In shoes a good fit means  
not only good looks but  
good wear. The shoe  
that fits your foot wears  
longer than the shoe that  
is too tight in some places  
and too loose in others.  
The Empress Shoe is  
correctly made by a firm  
who make nothing but  
high grade shoes for  
women.

We are one of their 400  
agents.

J. L. ARNOLD.

## For Summer Wear

We have the finest line of Suit-  
ings ever shown in this district.

Come and see them or write  
for samples.

Quality, fit, style and workman-  
ship always up to the highest  
standard.

## TOWNLEY BROS.

Successors to J. J. Townley Fenelon Falls.

## THE CEREAL STORY

goes fine at breakfast time,  
and is still to be continued.  
Of the making of cereals there  
is no end. We have all the  
good and tried kinds . . . . .  
There are so many varieties  
that we can hardly enumerate  
them, but whatever kind you  
like best is here and at a price  
that will supply you many  
breakfasts at a rate that even  
the most economical must ad-  
mit cheap.

**ROBSON & SON**

## BANK OF MONTREAL,

FENELON FALLS.

HEAD OFFICE - MONTREAL

ÉTABLISSE 1817.

INCORPORATED BY ACT OF PARLIAMENT.

CAPITAL - \$14,400,000.00.

REST - \$11,000,000.00.

UNDIVIDED PROFITS \$922,418.31

ASSETS OVER \$165,000,000.

SAVINGS BANK

DEPARTMENT.

INTEREST ADDED FOUR TIMES A YEAR.

Deposits taken of \$1  
and upward.

Deposits can be  
withdrawn on demand.

**R. M. HAMILTON,**  
MANAGER.

### Result of Co operative Experiments With Autumn Sown Crops.

Three hundred and seven farmers  
throughout Ontario conducted experi-  
ments with autumn sown crops during  
the past year. Reports have been re-  
ceived from twenty-six of the counties  
of the Province. The counties which  
furnished the greatest number of good  
reports of successfully conducted experi-  
ments were Bruce, Norfolk, Middlesex  
Grey and Hutton. The experimenters  
deserve much credit for the good work  
they have done for themselves and for  
the farmers generally. Average results  
of the carefully conducted co-operative  
experiments with autumn sown crops  
are here presented in a very concise  
form.

Winter Wheat.—Three varieties of win-  
ter wheat were distributed last autumn  
to those farmers who wished to test  
some of the leading varieties on their  
own farms. The following are the aver-  
ages in yield of straw and of grain per  
acre: Imperial Amber, 1.4 tons and 25.9  
bushels; Abundance, 1.2 tons and 23  
bush.; and No. 5 Red, 1.2 tons and 22  
bush. Not only did the Imperial Amber  
give the greatest yield per acre in the  
co-operative experiments throughout  
Ontario in 1908 and 1907, but it also  
came first in popularity with the experi-  
menters in each of these years. The Im-  
perial Amber will again be distributed  
throughout Ontario this autumn as one  
of the three varieties for co-operative ex-  
periments. The Dawson's Golden Chaff  
which we distributed for co-operative  
experiment throughout Ontario in each  
of twelve years previous to the autumn  
of 1906, and which is probably grown  
more extensively in Ontario at the pre-  
sent time than all other varieties of win-  
ter wheat combined, has not been inclu-  
ded in the co-operative tests since 1906.

Winter Rye.—Of the two varieties of  
winter rye distributed in the autumn of  
1907, the Mammoth White stood first in  
average yield of grain with 34 bushels  
and the Common second, with 28.6 bush-  
els per acre. Last year the Mammoth  
White surpassed the Common rye by an  
average of 5 bushels per acre through-  
out Ontario.

Fertilizers With Winter Wheat.—In  
the co-operative experiments with dif-  
ferent manures applied in the spring of  
the year, the average yields of grain per  
acre for the past five years were as fol-  
lows: Mixed fertilizer, 27.6 bus.; Nitrate  
of Soda, 25.8 bus.; Muriate of Potash,  
25.7 bus.; and Superphosphate, 25.3 bush.  
The unfertilized land gave an average  
of 22.4 bus. per acre. The Superphos-  
phate was applied at the rate of 320  
pounds, and the Muriate of Potash and  
the Nitrate of Soda each 160 pounds, per  
acre. The mixed fertilizer consisted of  
one-third the quantity of each of the  
other three fertilizers here mentioned.  
The usual cost of the fertilizers, as used

in these experiments, is between four  
and five dollars per acre.

Fodder Crops.—In each of five years,  
the seed of Hairy Vetches and of Winter  
Rye has been distributed through Onta-  
rio for co-operative experiments in  
testing these crops for fodder purposes.  
In the average of the five years' experi-  
ments, the Hairy Vetches produced  
slightly the largest yield of green fod-  
der per acre; but in 1908 the largest  
yield was produced by the winter rye.

As long as the supply lasts, material  
will this year, be distributed, free  
of charge, in the order in which the  
applications are received from Ontario  
farmers wishing to experiment and to  
report the results of any one of the  
following tests: 1, three varieties of  
Winter Wheat; 2, two varieties of Win-  
ter Rye; 3, five fertilizers with Winter  
Wheat; 4, Autumn and Spring applica-  
tions of nitrate of soda and common salt  
with Winter Wheat; 5, Winter Emmer  
with Winter Wheat or Winter Barley; 6,  
Hairy Vetches and Winter Rye as fod-  
der crops. The size of each plot is to  
be one rod wide by two rods long. Ma-  
terial for numbers 3 and 4 will be sent  
by express and that for the other num-  
bers by mail.

### Women's Institute.

The Women's Institute held a very  
successful meeting at the residence of  
Mrs. Wm. Fell, District President, at  
Bury's Green, on Friday afternoon, A. S.,  
28th. Mrs. (Dr.) Gould, President of the  
local branch, and several of the members  
drove out to Mrs. Fell's, a distance of  
seven or eight miles from the Falls.  
There they found assembled a number of  
members from the surrounding country,  
including ten members of the Burnt  
River branch. The meeting was opened  
in the usual manner by repeating the  
Lord's prayer in unison. Mrs. Gould, the  
President, in her initial address to the  
members, said that, as it was her first  
appearance before them since her election  
to that office, she would say first that  
she was pleased to see so many present,  
and secondly, that she hoped all the  
members would realize their individual  
responsibility as members of the Wo-  
men's Institute to help make all the  
meetings successful ones. These were  
the only meetings for women in this dis-  
trict which were conducted on a non-  
sectarian basis, and which afforded them  
an opportunity to exchange views on a  
variety of subjects. She then introdu-  
ced Mrs. Hodgson, President of the Burnt  
River branch. Mrs. Hodgson remark-  
ed that the Burnt River Branch had been  
organized a short time ago, beginning  
with ten members, which had been in-  
creased to sixteen. They had found the  
W. I. a great help in their neighborhood.  
Many attend one meeting and run away  
with the impression that they are only  
for farmers' wives and daughters, but  
his was a great mistake, as all are wel-  
come, and all are benefitted.

Miss Bessie Nie read a splendid paper  
on Self-control, being a synopsis of  
books entitled "Self-control, Its King-  
ship and Majesty," author W. G. Jordan.  
A few extracts from this paper are as  
follows: When a man fails in life he us-  
ually says "I am as God made me," but  
when he succeeds he proudly proclaims  
himself "a self-made man." Man in his  
weakness is the creature of circumstan-  
ces, in his strength he is the creator  
of circumstances. We sometimes envy  
the success of others when we should  
mulate the process by which that suc-  
cess came. We sometimes envy the  
power and spiritual strength of a Paul  
without realizing the weak Saul of Tar-  
sus from which he was transformed  
through self control. We have first the  
primes of the tongue, which are in them-  
selves very destructive. Some of these  
are words of unkindness, anger, envy,  
malice, bitterness, harsh criticism, gas-  
siph, lying, scandal. In the conquest of  
any weakness in our mental or moral  
make-up, in the attainment of any  
strength, in our highest and truest rela-  
tions to ourselves and the world, let us  
make Love our watchword and not mere  
Duty.

Miss Patten then gave an instrumen-  
tal solo which was much appreciated.

Mrs. Hopkins, of Burnt River, read an  
interesting paper on "Getting ready to  
be happy." The summing up of this  
paper was to not waste time "getting  
ready" but enjoy life on the way.

Miss Nie read a very good paper writ-  
ten by Mr. R. D. Keefer, of Bobcaygeon,  
entitled "Bad Temper." One extract  
from this is as follows: It is of course,  
needless to point out that a person with
