

The Store Where  
Dollars  
Bring Their Value.

# TERRILL BROS.

The Store of  
Quality  
And Fair Dealings.

The beginning of March marks the fifth anniversary of our business career in Fenelon Falls. During these years it has always been our aim to give honest value in merchandise for every dollar received. It has been our highest ambition to make this store "The Store of the People," and how well we have succeeded is manifested by the ever increasing number who are making this store their trading centre. But we are planning to make the sixth year one of still greater success, and start the same with an array of Bargains that will appeal to every economical housewife. We celebrate this occasion by offering

Constable John Short, of Lindsay, was the victim of a brutal assault shortly before one o'clock on Thursday morning last. Five men standing on Kent street were ordered to move on; but, instead of doing so, they attacked Mr. Short, who made a plucky resistance, but was overpowered, and received injuries that made his removal to the Ross hospital necessary. Mike Carlin, the principal assailant of Constable Short, is still at large. A reward of \$50 is being offered for his arrest.

The report of the New York State Department of Labor shows that in 1908 there were ninety thousand fewer men reporting employment in there various unions than in 1907, while membership of the labor unions of the state, from April to September, decreased from 398,583 to 371,459, a loss of 26,123. The cause for the falling off is not reported, but it is doubtless due in part to the inability of some of the unemployed to keep up their union dues, and partly also to a decision to accept work wherever it could be found, regardless of the interests of unionism. A notable feature of the report is that the wages do not seem to have been lowered materially, despite the fact that so many thousands are out of work.

**Choice of Evils.**  
"Well, old man," said Sinnickson after the performance, "I certainly was surprised to see you in private theatricals."  
"Yes," replied Brightly, "but you see if I didn't appear on the stage I'd probably have to sit in the audience and be bored to death."

### Humor and Philosophy

By DUNCAN M. SMITH

#### PERT PARAGRAPHS.

Sometimes capturing a thing is child's play compared to letting it go.

When some men start the furnace fire cheerfully it is evidence that they are trying to square themselves.

An amateur poultry raiser is as long on figures as he is short on eggs.

#### Comes Natural to Them.

A western farmer writes in to one of the eastern papers to inquire if the editor knows of any way to keep boys from stealing watermelons.

This has been a subject that has engaged the attention of many market gardeners from the time of Adam down; but, after looking over the field, most of them have given up the job as hopeless. The combination of a barbed wire fence, a bulldog and a shotgun may do some good, but even that is not boy proof.

About the only sure way is to chain all of the boys in the neighborhood with inch log chains and then throw them down a cellar and sit on the lid.

Even that is not warranted to work every time, for a new boy may come visiting in the neighborhood after the committee has made up the collection.

About the only sure way would be for Burbank to graft a phonograph on a watermelon, and then it could call for help when danger came on two bare feet. By having the hired man sleep in the barn to respond to the call most of the fruit should be saved until the time came to put it on the market.

#### Varied the Exercise.

"I see she is going with a left handed man."

"Yes, she wanted to develop evenly."

#### Ran to Fruit.

"Did he get the check for his apples?"

"Yes, and it was a peach."

#### Mixed.

He asked would she go strolling Along the placid lake. Although his name was Charley, She answered him, "Sure, Mike!"

### Quality in Seeds.

As the result of tests of alfalfa, red clover and grass seeds secured in the open market Chief Galloway of the bureau of plants industry makes a report that is certainly of interest to farmers.

**Red Clover.**—Of the 1,217 samples of red clover seed secured 405, or one-third, contained seed of dodder, 424 contained traces of yellow trefoil seed, and 135 bore evidence of having originated in Chile.

**Alfalfa.**—Of the 399 samples of alfalfa seed secured 191, or about one-half, contained seed of dodder, 135 contained a trace of yellow trefoil seed, 120 contained a trace of sweet clover seed, and 16 contained a trace of bur clover seed.

**Bromus Inermis.**—Of the 55 samples of Bromus inermis seed obtained 15 contained seed of cheat, or chess, 28 contained from 2 to 3 per cent of seed of the wheat grasses, several contained seed of meadow fescue, and one contained more than 24 per cent of meadow fescue and rye grass seed together.

**Kentucky Blue Grass.**—Of the 429 samples of Kentucky blue grass seed obtained only 8 were found to be free from any trace of Canada blue grass.

In most of these samples the trace of Canada blue grass found was immature seed, showing that it was harvested with the Kentucky blue grass seed. The seeds of the two plants not ripening at the same time, it is improbable that mature seed of Canada blue grass would be harvested with Kentucky blue grass seed. In 110 samples, however, Canada blue grass seed was found in quantities exceeding 5 per cent, 32 of these being Canada blue grass seed misbranded as Kentucky blue grass seed.

#### Where Hogs Follow Cattle.

Even if in addition to corn other concentrates richer in protein and ash than is corn are fed to steers, the corn in the droppings is much more readily found, and the benefit derived by the hog from the feeds other than corn is not very great, although it is believed that some benefit may be derived.

#### Pruning the Currant.

In general a currant bush should be composed of from five to eight stalks stopped about eighteen to twenty inches in height. If the plants are vigorous shoots stopped at this height will produce several lateral branches, thus forming a compact, broad headed bush with a maximum expanse of bearing wood.—L. C. Corbett.
