When You Buy Shoes

Be sure—or as sure as you can be
—that what you put on your feet is
worth what you take from your pocket
book.

We can help you to be sure. We've
a care—a big care—for the quality that
means cheap shoes—Durability.

The quickest way to have you know
about what is here is to tell you—but
the better way is to have you see it.

High Grades of Groceries at Fair
Prices is the best business proposition
that a merchant could possibly make
you. We make it. Why are superior
eatables the best to buy? Because
they give better results—more satis-

much further. Let your money buy all
the value that it can—do this by spend-

District Notes.

Peterboro Review: The bridge and
construction cars of the G. T. R. arrived
in town the other day from Burnt River
on the Haliburton branch, where they
have been constructing a steel bridge.
The party left here for Madoc, where
they will replace a wooden bridge by
one of steel. The bridge is in the
vicinity of Moir Lake, and is on the
Madoc branch. The work will be in
charge of J. W. Cairns, of Lindsay.

The Keene correspondent of the Peter-
borough Times says: "We have been in-
formed that the citizens of Peterborough
are buying all the revolvers the hard-
ware stores have in stock. Judging by
the reports of the Charity Board, we
have come to the conclusion that the
weapons must be for the city fathers.
The people of this little hamlet are not
so timid as their city friends, and there-
fore are investing their money in stocks
and bonds. We suppose that if any tramp
calls in our town he will immediately
be put in the stocks or bonds."

Minden Echo:—It is now up to
Minden or Kinmount to invent an ex-
plosive. Haliburton has the Holmes'
Blasting Compound, which is now pat-
ented and being manufactured in Toronto.
There comes then the Oliver Explosive,
of Gelert, that promises to bring its dis-
coverer a snug sum, one of these days.
This week, Haliburton is forward with
another explosive that is a marvel to
the people and an astonishment to the
rocks. Surely other minds, moving
along the same line, will be able to
devise something equally wonderful.
The world has need of inventive genius
at every turn, but we presume it would
never do for us to invent an explosive,
for we would be sure to try it on our
delinquent subscribers.
