#### Government Annuities.

The Dominion Government is sending out in booklet form details of its plan of providing old age annuities, giving tabulated rates and other particulars. The booklets may be obtained from local postmasters, who will also furnish inquiry cards which may be sent to the Minister of Trade and Commerce by anyone desiring information not contained in the booklets.

The Government annuity scheme as set forth appears to be worthy of commendation as far as can be judged from a brief examination; but the circular accompanying the other literature might easily be improved upon. It is a reprint of an editorial from the Hamilton Spectator, endorsing the sentiments of Dr. Samson, the Government lecturer on the annuity scheme. Dr. Samson in an address at Hamilton emphasized the importance of thrift on the part of the people. The Spectator goes considerably further than this. It not only approves of the thrift idea, but blames carelessness and improvidence for all the evils that flesh is heir to, and says "it is the extravagance and recklessness of our daily lives that is responsible for the low state of morals the world over."

This looks like a very reckless and extravagant assertion, which the Spectator would have difficulty in finding foundation for, if required to do so. The majority of people nowadays do not get money enough to be extravagant with. It is all they can do to pay for necessities. Many cannot even do that. As for immorality, the struggle to make a half decent living is more responsible for it than anything else is.

#### Gypsies Rounded Up.

The gang of gypsies that were in this vicinity a few days ago were arrested near Fowler's Corners a few days ago. A dispatch sent on Monday from Peterborough to the Toronto dailies gives the particulars as follows:

"Provincial Inspector Greer, together with the high constable of Peterborough and a posse of constables, to-day went out in the vicinity of Bobeaygeon and rounded up the gang of gypsies who have been terrorizing the people of this district for the past few days. In all 66 were placed under arrest and landed in jail under various charges—larceny, threatening, fortune telling and other misdemeanors. This wandering band arrived in Ontario a few weeks ago, and from every point they have visited complaints of their conduct have been received. Stealing chickens, robbing gardens and pilfering small articles from stores are among the indictments lodged against them. The women of the party were said to be even worse than the men, and ladies who refused to have their fortunes told were threatened with all sorts of dire calamities. In most of the towns visited the tribe were given a certain time to leave the corporation limits; but in smaller places, where police protection is lacking, the gypsies deported themselves with great boldness. Complaints reached the Attorney-General's department from Omemece and also from Babeygeon, and Detective Greer was placed on the case, with the results above stated."

#### Powles Corners.

(Correspondence of the Gazette.)

One day last week, while all the members of a family in this locality were away from home, some one came and took two young pigs out of their pen. It is supposed that one was taken to keep the other company.

Quite a number from here took in the excursion to Guelph, and some are waiting for the excursion to Peterborough on Monday, July 5th.

Statute labor is now being done; the job near Mr. A. McGe's reflects credit on the road overseer and his assistants.

There is good money in raising a good class of horses. Mr. A. McGe is making a start with five young colts that will turn up eight or nine hundred dollars in four years or less, if no accidents happen to them.

The school closed here last Wednesday for the summer holidays, and the teacher and scholars will have a much needed rest.

#### Big Day at Burnt River.

Burnt River is offering an attractive programme of sports for Dominion Day, and has an energetic committee in charge. Dinner and tea will be served, and a good time is assured. See bills for particulars.

The most popular people during the last decade of the nineteenth century were the people who had had influenza and so could discuss it in all its various stages, but whose record temperature had always kept one degree lower than the temperature of those with whom they conversed. There is a subtle flatness in a slight inferiority of temperature which even sanctified human nature cannot resist.
