

Baddow.

(Correspondence of the Gazette.)

Mr. and Mrs. Edmund Watson and Master Richard left on Friday to spend a few days with Cameron and Valentinia friends.

Mrs. Hawkins, of Woodville, was in Baddow over Sunday.

Mr. John Suggitt, was in Lindsay on business last week.

Mr. and Mrs. John Wilson visited their daughter, Mrs. Cochran, at Cambray last week.

Mrs. Joe Griffin was the guest of Lindsay friends last week.

We are sorry to report that Mr. W. J. Goodhand is very ill, but under the skillful treatment of Dr. Graham we hope to see him out again soon.

Mrs. Eade and Mrs. R. Graham were in Glendown on Sunday.

Miss Pearl Wilson is in Cambray this week.

Miss O. Townsend spent Sunday at her home in Burnt River.

Mr. Shuttleworth, of Burnt River, paid Baddow a flying visit on Tuesday.

Rosedale.

(Correspondence of the Gazette.)

Mr. and Mrs. Geo. Rea, of Lindsay, who spent the last six months in Rosedale, returned to their home on Thursday of last week.

A steam drill, the property of the R. McDonald Co., arrived on Saturday last and commenced work on Monday.

A number of our citizens attended the Presbyterian tea at Cobocook on Friday evening of last week. All report a good time.

The ladies of the Presbyterian congregation in this place have organized an auxiliary of the W. F. M. S. Mrs. J. Dickson has been chosen as president of the society, and the ladies already engaged in their good work.

Mr. Pritty, of the T. V. C. office, Peterboro, was in Rosedale on Tuesday inspecting the work on the canal.

Mrs. W. R. Macdonald left for Toronto on Wednesday for a visit to her mother.

Mrs. M. Sutherland-Clapp, with her two little nephews, went to Toronto on Wednesday.

The Misses Bonnel returned to Bobcaygeon last week after a pleasant visit to Mrs. Dickson.

Mr. and Mrs. H. J. Lytle, Lindsay, made their final visit for this season one day last week.

Kinmount.

(Correspondence of the Gazette.)

This week we have bidden "God speed" to both our Anglican and Baptist ministers, and, after a summer of hearty co-operation and good fellowship among the different denominations, regret at their departure is wide-spread.

Rev. T. France, of the Baptist church, and Mrs. France came to Kinmount four years ago, and during that time his love for and interest in the people, not only of his own denomination but those outside, has been shown in all his work, and in his unselfish, wholly christian example in all things pertaining to the welfare of the religious advancement of the community, both Mr. and Mrs. France were ever ready to assist, and the success of the Local Option campaign was partly due to his efforts. His own church people tried to show their affection and loyalty by presenting him with a purse previous to his departure, to-day, for his new mission on Lake Erie. Mr. France preached his farewell sermon on Sunday, Sept. 27th, when the congregation at St. James's church was dismissed in order to attend the service; the same compliment being paid Mr. Atkinson, of St. James's the following Sunday by the Baptist congregation.

During the latter part of June, on the departure for Cannington of Rev. A. Cummer, Mr. J. Atkinson, of Wycliffe College, Toronto, took charge of the Anglican mission, and, though his stay was not a long one, he entered into the work with such cheerful energy and unflinching interest in its every part, that a newly awakened interest in the life of the church is the general result. On Friday of last week the members of the congregation, wishing in some way to show their appreciation, surprised him at the Rectory, where he has been keeping "Bachelor's Hall" during the summer, and, after spending a particularly pleasant evening, presented him with a sum in gold. Mr. Atkinson left on Monday to resume his studies at Wycliffe College, and bears with him the good wishes not only of the members of St. James's congregation, but of the people throughout Kinmount, Burnt River and the remainder of this parish.

Mr. and Mrs. A. Y. Hopkins left this morning to attend the wedding of their son Gordon to Miss Pearl Hopwood of Onemeo.

Mr. Wilford Newman has closed the tailor shop of which he has been manager for M. H. McCallum, of Fenelon Falls, for the past few months, and returned to his home in that town, after a very successful season.

Quite a number of our residents attended the different fairs—Bobcaygeon Minden yesterday.

The firm of M. E. Craig & Bros. expect to clear out their stock of groceries and boots and shoes during the next month, and are selling at a reasonable discount.

Mr. and Mrs. R. J. Graham, and Miss Jean Graham drove to Peterboro on Friday of last week and returned yesterday, Tuesday.

Mr. F. Dötman is making extensive preparations for his winter's camp.

PHENOMENAL VALUES IN SEASONABLE MERCHANDISE.

Boys' single and double breasted 3 piece suits, made with double seats, knees and elbows, strong serviceable suits and a genuine bargain, at \$5.00

Terrill Bros., Cheapest General Store in the County, Fenelon Falls

FOR the money invested and work applied poultry is one of the most profitable side lines on the farm. Indeed, many farms are run at a profit with poultry alone. If poultry is profitable on a place where all the feed must be bought it should be doubly so on the general farm, where much of its feed is made up of waste products. Too often the work of caring for the poultry is left to the women and children. Much of it is light work that they can do all right, but the man of the place should not consider it beneath his dignity to lend a helping hand when it is needed.

If poultry is to be kept at a profit some kind of shelter other than the machine shed, the apple trees or the cow stable will have to be provided. A good, warm poultry house is absolutely necessary if winter eggs are to be secured. At 30 to 50 cents a dozen winter eggs will soon pay the cost of building a house of this kind, to say nothing of the superior health of the flock.

same barnyard fowl. That it has always more than paid its way even when neglected shamefully is but an indication of what it would do under better treatment.

Locating the Poultry House.
The poultry house should be located near the other buildings. The chickens will go to the barnyard to scratch anyway, and if the poultry house is

FIG. 112—SMALL POULTRY HOUSE.
too far away they will roost in the barns and sheds rather than return to it. The poultry house should not be too far from the dwelling either, in order that it may not be too inconvenient to care for the poultry. The ground where it is placed should be fairly high and naturally well drained. A damp poultry house fosters all sorts of diseases.

The size of the poultry house depends upon the number of fowls kept. It is estimated that about five square feet of floor space should be allowed per fowl. If they can be out of doors most of the time they can get along with considerably less. The best kind of house to build is the scratching shed type, built with a shed roof. The high side should be to the south. About half of this house should be partitioned off for a scratching shed. The south side of this shed part is to be left open, covered only with wire netting to keep the fowls in. If the back and sides of this room are tight and the bottom boarded up a foot or two there will be little draft and the fowls will be comfortable even in the coldest weather. The floor of this shed part may be of dirt and should be kept covered with several inches of straw.

The remainder of the house should have a floor, preferably of cement. A cement floor is easily kept clean and is little more expensive than a wooden one. The chief advantage is that it keeps out rats and other vermin better than any other kind of floor. Neither does it furnish any crevices in which lice and mites can hide. These pests are the worst enemies to poultry culture, and care should be taken in building a house to leave as few cracks where they can hide as possible.

Robson's Drugstore. FENELON FALLS.

Value of a Curtain Front.

There should be several windows in the south side of the house to supply light. Light is one of the best disinfectants. It does much to keep the fowls free from disease and happy and contented. To provide for ventilation there is nothing equal to the "curtain front." This is a large square of muslin fitted into a frame the same as a window. This allows a gradual admission of fresh air without drafts. The exchange of air takes place slowly enough, so that it does not lower the temperature of the house too much. Considerable light comes through the curtain also, and less heat escapes through it at night than through glass windows. The curtain has the further advantage of being cheap. No poultry house should be put up without one.

Whether built of lumber or of some other material, the poultry house should be tight. Drop siding is good material for the side walls. A single wall is the cheapest and answers the purpose very well. It costs only a little extra, however, to lath and plaster the inside, and such a house is more desirable in regions where the winters are extremely cold. It does not pay to paper the inside of the house, as the mites will find a congenial home between the paper and the wall.

Roosts and Nest Boxes.

Part of the main part of the house should be given over to roosts and the rest used for nest boxes. It is better to have the roosts along the north side. A muslin curtain arranged on a roller, so that it can be let down in front of the fowls on cold nights, does much to keep them comfortable. The roosting space to be allowed to each fowl is six to twelve inches, according to size. Two by fours set edgewise, with the sharp corners rounded off, make good roosts. They should be set in notches, so that they can be easily removed to be cleaned and disinfected. The droppings should be removed every week or two and not left for a year, as is so often done. If plenty of straw is used on the cement under the roosts it is but a short job to throw the excrement out of a hole back of the roosts and pull in fresh bedding. It is labor that will be well repaid, for a clean, sweet smelling house is essential to egg production.

A little slaked lime thrown around under the roosts helps to keep down bad odors. Sprinkling the house with coal tar dip and whitewashing the roosts and walls once in a while are also good practices.

The nest boxes should be provided with a cover and so arranged as to be dark and secluded inside, as the hens prefer to lay in this kind of place (to be continued.)
