Entrance Examinations.

The High School entrance examinations for 1910 will begin on Wednesday, June 22, at 8.45 a. m., and all candidates who propose to write on the examination must notify the Public School Inspector of the district before the first of May. A circular has just been issued by the Education Department giving the dates of the examinations.

Examiners will be more strict than ever this year. The High and Continuation School Inspectors have reported that in some of the schools under their charge the attainments of the pupils who have been admitted are defective and inadequate, and that in their judgment the High School entrance boards concerned have not set a proper standard in valuing the answer papers. In this connection the Minister of Education reminds entrance boards that, while they are at liberty to make special provisions for admission in special individual cases, they are not at liberty, without the concurrence of the Minister, to lower the 40 per cent. minimum of the aggregate. It also has come to the Minister's knowledge that in valuing the answer papers in arithmetic, some boards have ignored the provision that no value whatever is to be assigned to the certain questions on the examination paper unless the answer thereto are absolutely correct that is, that no marks shall be assigned for principal or for partial answers. "The condition of affairs with which this memorandum deals is manifestly an injury to both the High Schools and the Public and Separate Schools," says the circular, "and it cannot be permitted to continue. The Minister has, accordingly, directed the High and Continuation Schools Inspector to report specially to him hereafter all cases in which there are evidences of laxity."

A Record Case.

The town of Lake Megantic, in the Province of Quebec, voted almost unanimously for prohibitions last week. Public sentiment had been worked up to such a pitch that those in favor of licence were ashamed to go to the poll. The campaign was managed by the parish priest, Father Choquette. When he was placed at Lake Megantic there were nine taverns, and temperance sentiment was dead. Through his exertions the number of licences was reduced, but the evil was only modified a little, and he saw the only remedy was closing every bar-room. The night before the vote was taken he called a mass meeting which was held in his church. The front pews were reserved for Protestants, and among the speakers was a Protestant—an unheard of incident in that Province. Father Choquette's success, it is said, will have the effect of stimulating other priests to do likewise.

Soo Star on Loyalty.

What's the use of having a pay roll of \$125,000 a month if we send four months' pay out of town every year.

Some of our loudest "boosters" buy goods from the city stores.

They yell for the Sault,—prosperity,—greatest town in Canada,—this is the place to invest in, etc.—and then make up a mail order for the city department store, or permit one of the family to do it.

Once a man wrote a whole column for the Star on the subject "How to Build Up the Town" and the following Saturday his daughter smuggled her spring coat into town from across the river.

Evidently she hadn't read the article written by her father.

And—whisper—the old man buys his clothes occasionally out of town himself. He regrets that the tailors here "can't make clothes."

A well nigh hopeless class in town is composed of Americans who find their patriotism stronger than their desire to build up a Canadian Soo.

The only reason the Sault isn't the best town in America is just this;

Too many Sault people are not loyal to their own town.

We may get seventeen steel plants, but until people stop sending their money out of town for goods they can buy here, the Soo will never amount to much.

If a man prefers to buy his clothes and boots and furniture in Toronto or across the river, instead of spending his money at home, he is about as much use to the Sault as a resident of Greenwood.

The members of the Board of Trade might make a start with a signed pledge to only deal at home.

If we would all sign it and stick to it we would keep \$500,000 at home every year that is now sent out of town.

That's equal to 1,000 men at \$500 per year.
