

INDIVIDUALITY IN CIGAR MANUFACTURING.

To many people the word Havana, as applied to cigars, means something fine to smoke. They would hardly believe that there are 30,000 bales of tobacco on the island of Cuba to-day that is practically unsaleable.

The selection of the proper leaf is a science that is acquired only by the student in tobacco, and it takes years of study.

Even after the leaf has been well selected it can be spoiled in the manipulation. Two manufacturers, similarly equipped, may select a "Vega" of Havana tobacco that is very fine, one of them will take all the odd numbers and the other all the even numbers, they will make the same shape, weight and style, but the cigars will be entirely different in taste, because one has not exercised the same care in the dipping of the tobacco in the water, has stripped it too quickly, not allowing it to properly absorb and draw through, has dried it too quickly, has dampened it too much because some of it became too dry, has given it to his workmen when it was either too dry, or too soft and has eventually turned out a poor cigar from a good piece of tobacco.

The house of "Payne of Granby" enjoys a very enviable reputation for their individuality in their cigars for the uniform blend and taste and the exquisite workmanship, as no smoker of their "Pharaoh" cigar has ever found one that drew hard.

All of the employees in "J. Bruce Payne, Limited," factory have learned their trade in the factory, their foremen have been promoted from the ranks of the cigar makers and are stock holders in the business.

They have recently introduced a new high grade line called "Lords of Canada," that goes over the counter at ten cents straight that is winning a great reputation for its generous size and exquisite taste, bringing repeat orders, although owing to its cost to manufacture no money is being spent on advertising it.

ABOUT FAILURES.

A man is only a failure in this world when he admits it himself.

SHARK PRODUCTS.

Even the Bones Are Useful, the Spine as a Walking Stick.

Products obtained from the shark are both numerous and valuable. Shark fins furnish a jelly that makes a delicious soup, if one may credit the statements of those affecting that delicacy. There is an excellent market for this jelly wherever Chinese are to be found.

The shark's liver gives a splendid clear oil excellently adapted for the lubrication of the parts of watches, clocks and fine guns. This oil is held in some quarters in as high esteem as is the oil obtained from porpoise and dogfish liver, long claimed to be the finest of animal oils.

Sharkskin is of much value. It is of a beautiful burnished gray or bluish color and at first glance looks like finely grained leather by reason of the tiny prickles plentifully set one way. There are so many of these prickles, quite invisible to the naked eye, that the effect afforded by the dried skin is one of rich beauty, a quality that makes it particularly valuable for the manufacture of shagreen. It is employed for many decorative purposes.

Even the bones of sharks are useful. The spine is in constant demand by the manufacturers of curious walking sticks. They pass a thin malacca or steel rod through the polished and round vertebrae, and the result is a cane that sells for a high price. The shark spine stick is a great favorite in Germany.—Harper's Weekly.

Pineapple Seeds.

The pineapple as ordinarily cultivated is almost seedless, seeds being so rarely produced that the great majority of growers have never seen a seed and believe the fruit to be wholly sterile. But it is possible to produce them.

"By Medicine Life May be Prolonged."—So wrote Shakespeare nearly three hundred years ago. It is so to-day. Medicine will prolong life, but be sure of the qualities of the medicine. Life is prolonged by keeping the body free from disease. Dr. Thomas' Electric Oil used internally will cure coughs and colds, eradicate asthma, overcome croup and give strength to the respiratory organs. Give it a trial.

The Best Liver Pill.—The action of the liver is easily disarranged. A sudden chill, undue exposure to the elements, over-indulgence in some favorite food, excess in drinking, are a few of the causes. But whatever may be the cause, Parneelee's Vegetable Pills can be relied upon as the best corrective that can be taken. They are the leading liver pills and they have no superiors among such preparations.

USES FOR SAWDUST.

Don't throw away the sawdust that comes around things in packages. It may be utilized in many ways about the house.

It is good for removing sediment in glasses and earthenware.

A handful thrown on a drying fire will help to revive it.

Well dried and heated and sprinkled over grease spots on carpets, etc., it is useful in removing these marks.

Heated on a sheet of paper in the oven, it is an excellent remedy for mildew and damp spots on metals or other polished goods.

Rub dry sawdust on articles that have been polished and the polish will last longer.

Slightly moistened sawdust, sprinkled on kitchen, larder and verandah floors, and brushed off with a hard broom, will clean the floors without much trouble.

ONTARIO GAINS.

Impetus to the Industrial Development of the Province.

The organization of the Canada Machinery Corporation has more than usual interest from an Ontario standpoint, inasmuch as all the companies included have grown with the country from very small beginnings to the point where they are the largest concerns of their kind, not only in Ontario, but in the whole of Canada.

The town of Galt has been the great centre in Canada for the manufacture of woodworking machinery and tools, and the growth of the industry there and in neighboring towns has been of the steady and soundest character. Ever since the woodworking machinery business in Canada was big enough to be known, the name of Mr. R. MacGregor has been closely associated with it, and it was under his direction that the leading companies included in the consolidation became known by the lines of machinery they manufactured from one end of Canada to the other.

Mr. MacGregor, as well as all the other men who have had practical experience in the different companies included in the consolidation are being identified with the Canada Machinery Corp., and as the re-organization plan provides for ample working capital of the new company, the development of the woodworking machinery and tool manufacturing of Canada should be much greater than it has ever been at any previous period.

Minard's Liniment Co., Limited. Gentlemen—In June '28, I had my hand and wrist bitten and badly mangled by a vicious horse. I suffered greatly for several days and the tooth cuts refused to heal until your agent gave me a bottle of MINARD'S LINIMENT, which I began using. The effect was magical; in five hours the pain had ceased and in two weeks the wounds had completely healed and my hand and arm were as well as ever.

"When my wife cooks it," came the reply.

The transition from winter's cold to summer's heat frequently puts a strain upon the system that produces internal complications, always painful and often serious. A common form of disorder is dysentery, to which many are prone in the spring and summer. The very best medicine to use in subduing this painful ailment is Dr. J. D. Kellogg's Dysentery Cordial. It is a standard remedy, sold everywhere.

IT WAS A VOLUME OF TRAVEL.

After spending an evening with convivial friends, the head of the family entered the house as quietly as he could, turned up the reading-light in the library, and settled himself as if perusing a massive, leather-bound volume. Presently his wife entered the room, as he knew she would, and asked what he was doing.

"Oh," he replied, "I didn't feel like turning in when I first came home, and I've been reading some favorite passages from this sterling old work."

"Well," said the wife, "it's getting late now. Shut up the valise and come to bed."
