

TRIED TWO DOCTORS WITH NO BENEFIT

Then Dr. Williams' Pink Pills Wrought a Lasting Cure

Dr. Williams' Pink Pills have made so many remarkable cures in serious cases that people are liable to overlook their value as a tonic for the blood and nerves in debility and general run-down conditions. That such conditions are the cause of much misery and unhappiness is fully known to those who suffer from them and the need of curing them is as vital as is relief from diseases with higher sounding names. We commend the following statement to any one suffering from weak, thin blood, or shattered nerves. Mrs. Mae Macabe, Gleichen, Alta., says: "A few years ago I became run down, not seriously ill, but just tired and weak all the time. I consulted our family doctor, who gave me tonic after tonic with no effect. I gradually got weaker and weaker until I could not do my work. Then I went to another doctor, who pronounced my case one of decline, and recommended a warmer climate with complete rest. This I could not afford, and I began to worry and fret, until I became a complete nervous wreck. One day while visiting a neighbor an old gentleman who was taking Dr. Williams' Pink Pills for partial paralysis recommended them to me. I sent out and got three boxes, but without much faith that they would help me, but before they were gone I noticed an improvement and I continued taking the Pills, constantly growing stronger, until I had taken seven or eight boxes, when I was completely cured. I could do my work as easily as ever I had done in my life, and the doctor told me that he could scarcely believe the change in me, as he had not had the least hope that I would be strong again. Now I always keep the Pills on hand and if I feel fatigued or weary take them for three or four days so as not to get run down."

Sold by all medicine dealers or by mail at 50 cents a box or six boxes for \$2.50 from The Dr. Williams' Medicine Co., Brockville, Ont.

A Pill That Lightens Life.—To the man who is a victim of indigestion the transaction of business becomes an added misery. He cannot concentrate his mind upon his tasks and loss and vexation attend him. To such a man Parmelee's Vegetable Pills offer relief. A course of treatment, according to directions, will convince him of their great excellence. They are confidently recommended because they will do all that is claimed for them.

"My hair comes out in handfuls. If it keeps on I'll soon be bald." "Nonsense; if it keeps on you can never be bald."

QUITE TRUE.

"Worry wears out more people than work does," said the ready-made philosopher. "Of course it does," replied Mr. Growcher: "for the simple reason that so many of us would rather put in our time worrying about work than doing it."

HORSEFLESH IS CHEAP.

Is Eaten by Poor People of Most European Countries.

The sending of British commissions and delegations to Germany to investigate material conditions has been all the fashion. Political parties and leagues and societies advocating this or that have had inquisitors ransacking the fatherland from frontier to frontier, and their findings have been embodied in tons of reports, some instructive, but most of them unconvincing and stupid.

Hundreds of "Free Trade Leaguers" and "tariff trippers" have sought the secret of German prosperity, and their junketings have produced deductions wonderfully expressed, as might have been expected, the predilections of the visitors have found ample support as a consequence of the investigation. Free traders discovered that Germany was not prospering because of protection, and vice versa. Employers of labor invariably learned that the toiling masses were poorly paid and worked more hours than at home. In fact, every investigator seemed to discover what he wished to find. Nearly every delegate published his "report" with the result that England has had a plague of leaflets. Hundreds described what they believed they saw, but one tripper tersely told what he did not see, and this was the best report of the avalanche. Here is what he said of Germany: "No unemployed standing at street corners. No drunkenness or brawling. No nooliganism. No slums of poverty, as in England. No discourtesy. No begging or hawking. No deformed persons. No land out of cultivation. No ragged children. No late trains."

The alarming discovery was made that thousands of poor subsist on horseflesh, and, to prove the horror, scores of investigators brought home the public advertisements of horseflesh merchants. These produced an outburst of righteous indignation. About a hundredth part of the meat eaten in Germany is horseflesh. It is sold openly as such, and it is held to be wholesome and palatable, and is rigidly inspected by health officials. Probably every Continental country has people who eat horseflesh on account of its cheapness (in Germany it sells at 8 or 10 cents a pound). Other British investigators pounced upon the black bread as unfit for human beings, comparing it detrimentally with the armor-coated loaves of rural England.—Review of Reviews.

A Powerful Medicine.—The healing properties in six essential oils are concentrated in every bottle of Dr. Thomas' Electric Oil, forming one of the most beneficial liniments ever offered to the use of man. Thousands can testify as to its power in allaying pain, and many thousands more can certify that they owe their health to it. Its wonderful power is not expressed by its cheapness.

THE CRY "HURRAH!"

"Hip! Hip! Hurrah!"—the distinctly British cry—is surprisingly modern. The "Hip!" and the "Hurrah!" do not seem to have come together before the nineteenth century. In the eighteenth century "Hip!" amounted to just "Hi!" or "Hullo!" while "Hurrah!" was then usually "Huzza!" It is very like the Cossack shout "Ora!" but it is supposed to have been a German cry of the chase, adapted by German soldiers to war, and borrowed by neglect, default or misperhap, Corporation is not to be the Threach of this covenant; is said tion agrees to use due of the repair any such accident eration tion agrees to renew fact th tion from taxes for a ceuth od of ten years from the za!" a of October 1921, and to to the er as aforesaid for a fur have bet ten years from the First sa!" er 1921, upon the perfor- covenants and conditions ined on the part of the 5, and subject to the A huge Agreement and subject in court of the electors being wife louch renewal. POWER OF AN AIR BRAKE.

Some idea of the power of an air brake may be gained from the following facts: It takes a powerful locomotive drawing a train of ten passenger cars a distance of about five miles to reach a speed of sixty miles an hour on a straight and level track. The brakes will stop the same train from a speed of sixty miles an hour in 700 feet. Roughly it may be stated that a train may be stopped by the brakes in ab ut 3 per cent. of the distance that must be covered to give it its speed.

Very many persons die annually from cholera and kindred summer complaints, who might have been saved if proper remedies had been used. If attacked do not delay in getting a bottle of Dr. J. D. Kellogg's Dysentery Cordial, the medicine that never fails to effect a cure. Those who have used it say it acts promptly, and thoroughly subdues the pain and disease.

COULDN'T BELIEVE HIM.

Bill was a Far West cowboy, and noted for his craftiness. It was impossible to trust him. He got finally 'nto the toils of the law, and at his trial he pleaded guilty.

He did well, for the case against him was strong and irrefutable. Nevertheless, the jury in its verdict declared him innocent.

The Judge was thunderstruck. "Innocent!" he said. "Innocent! But the man himself pleads guilty!"

"We know that," said the foreman of the jury, "but he is such a liar that we can't believe him!"

HIS BIT OF LUCK.

After suffering a roaring toothache for fourteen days, Tommy consented to visit the dentist's.

"But he'll kill me!" asserted the nervous youngster on the verge of tears. "I know he'll kill me!"

But it was a case of choosing between two evils.

He went with his nurse, and when he returned, greeted his mother beamingly.

"Not dead?" bantered mamma.

"No," answered Tommy; "'cos just before the dentist killed me the toof came out!"

The destruction of the house fly is a public duty. Almost every American State Board of Health is carrying on a crusade against him. His filthy origin and habits, and the fact that his body is generally laden with disease-producing germs, makes him one of the greatest enemies of the human race. If the housekeepers of Canada will use Wilson's Fly Pads persistently, this peril would be tremendously reduced.
