Baby's Rash Became a Mass of Humor

Parents Decided He Could Not Be Cured. "Cuticura" Soon Made His Skin Perfectly Clear.

A Toronto man, Mr. Robert Mann, of 7582 Queen St. East, says: "Our boy was born in Toronto on Oct. 13, 1908, and when three months old a slight rash appeared on his cheek. What appeared to

be a water blister would form. When it broke, matter would run out, starting new blisters until his entire face, head and shoulders were a mass of scabs and you could not see a particle of clear skin. We did not know what to do for him and tried about every advertised remedy without avail, indeed some of them only added to his suffering and one in particular, the Remedy, almost put the infant into convulsions. The family doctor prescribed for him. This did not do any good, so we took him to a hospital. He was treated as an out-patient twice a week and he got worse, if anything. We then called in another doctor and inside of a week the boy was, to all appearances, cured and the doctor said his work was done. But the very next day it broke out as bad as ever.

"We decided that it could not be cured and the course and so we just kept be a water blister would

"We decided that it could not be cured and must run its course and so we just kept his arms bandaged to his side to prevent his tearing his flesh. The Cutlcura Remedies were recommended. We started using them in May, 1909, and soon the cure was complete. Cutlcura made his skin perfectly clear and he is entirely free from the skin disease."

(Signed) Robert Mann, May 3, 1910.

In another letter, dated June 29, 1911, he adds: "My boy has never had any more trouble since using Cutlcura."

For more than a generation Cuticura Soap and Ointment have afforded the most successful treatment for skin and scalp troubles of infants, children and adults. A single set is often sufficient. Although sold by druggists and dealers throughout the world, a liberal sample of each, with 32-p. book ou the skin, will be sent free, on application to Potter Drug & Chem.
