

SAWDUST IS NOT SO OBJECTIONABLE

Uses Being Found for this Form of Waste at Mills—Double Economy Now in Progress

Sawdust is usually regarded as an objectionable product because it increases the danger of fire if deposited near mills or lumber piles and necessitates either cartage with accompanying expense or the construction of a "burner" and the use of conveyors or carts to transfer it from the saws.

A double economy, however, is now in progress. As a result of the use of band saws instead of the old circular and gang saws, a log that under the old system produced eight boards, will now produce nine, a very substantial increase in product with a corresponding decrease in the amount of sawdust produced.

Owing to its chemical and mechanical properties, it has an ever increasing field of usefulness. Used as an absorbent for nitro-glycerine it produces dynamite. Used with clay and burned it produces a terra-cotta brick full of small cavities that, owing to its lightness and its properties as a non-conductor, makes excellent fire-proof material for partition walls. Treating it with fused caustic, alkali produces oxalic acid. Treating it with sulphuric acid and fermenting the sugar so formed produces alcohol. Mixed with a suitable binder and compressed it can be used for making mouldings and imitation carvings; while, if mixed with Portland cement it produces a flooring material. It is an excellent packing material for fragile articles and for dangerous explosives, and can be used as packing in walls to make them sound-proof and cold-proof.

MAKING FRIENDS

If you have a friend worth loving,
Love her. Yes, and let her know
That you love her ere life's evening
Tinge her brow with sunset glow.
Why should good words not be said
Of a friend till she is dead?

If you hear a song that thrills you,
Sung by any child of song,
Praise it. Do not let the singer
Wait his well-earned praise too long.
Why should one that thrills your heart
Lack the joy you may impart?

If you hear a prayer that moves you,
By its humble, pleading tone,
Join it. Do not let the seeker
Bow before his God alone.
Why should not your brother share
The strength of "two or three" in prayer?

Scatter thus your seeds of kindness,
All enriching as you go;
Leave them. Trust the Harvest Giver,
He will make each seed to grow.
So, until its happy end,
Your life shall never lack a friend.

BONNETS ARE BEST

For very small babies, close-fitting caps or bonnets are best in the winter time. There is a distinct prejudice among many mothers with regard to baby boys wearing bonnets. There is no foundation to the idea, yet it remains that mothers will persist in disclaiming them as out of place.

The sensible mother, however, will not allow her judgment to be governed by such opinion. It is obvious that an article which covers at once the head and delicate membranes of the ear is infinitely more practical, serviceable, convenient, and in most cases will save the tiny wearer considerable discomfort, and even pain.

A NOVEL IDEA

Three colored candles for a birthday cake may take the place of the larger number indicating a person's age, and this is a prettier idea to carry out when the years begin to accumulate. Take a yellow, a green, and a white candle for the cake. The yellow one represents the past, the white the present, the green the future. As the cake is cut, let somebody tell of a happy birthday in the past, another offer congratulations on the present birthday, and a third express a loving wish for the future.

YOUR SEWING MACHINE

If you want your sewing-machine to do satisfactory work remember that it needs to be kept clean. After every ten hours' work it needs oil; but all surplus oil must be carefully wiped off afterwards. Always work it steadily, and never start or stop with a jerk. The best way to finish off a machine seam is to turn the material round and stitch back for about an inch. This saves tying the ends of cotton, which is fidgetty work, and takes up a lot of time if there are many seams.

TO WASH SCARLET FLANNEL

Mix a handful of flour in a quart of cold water, and boil for ten minutes. To this add some warm suds, and then wash the flannel, gently rinsing rather than rubbing it. Now rinse in two or three waters comfortably warm to the hands—no hotter—and hang in the shade. By this method the color should remain good after many washings.

A DAINY SET

How a Young Girl May Make a Pretty Bedroom Outfit

Daintiest of all bedroom sets for a young girl are those made of hand-embroidered handkerchief line of finest quality broad satin ribbon and delicately tinted silk.

Near the left end of the scarf, which is precisely the size of the bureau top and does not project beyond its edges in any direction, is embroidered one of those quaintly shaped flower baskets, with deeply curved brim and semi-circular base seen in the patterns of old-fashioned carpets and wall papers and among the accessories of women's portraits painted during the early Victorian era.

The handkerchief case, of the usual oblong form, precisely matches the design of the bureau scarf, but its under side is plain and the two free edges are joined with strips of wide ribbon, which tie into big ornamental bows. The oblong pin cushion cover, finished similarly to the scarf and handkerchief case, carries the same embroidered design, but its beading runs across the upper long side and its large bow of ribbon is set diagonally above the lower right corner.

Such a set would make a charming birthday anniversary gift from one college chum to another, or from a quite young girl to a bride.

EMPIRE GIFT BY MILLION MARYS

Lady Bute to Search Empire for Women of Same Christian Name as Queen—Coronation Scheme

Lady Bute's search for Marys is now explained as a scheme for a novel Coronation gift for the Queen.

The idea is that all persons of the Empire whose Christian name is Mary shall offer a gift to Queen Mary, either in the form of a personal ornament, or of a sum of money, to be placed at her Majesty's disposal.

In order to permit the poorest Mary to participate, sums ranging from one penny to £1 may be given. Persons named Maria, May and Marlon will be included in the scheme.

Over three hundred years ago a Scottish Queen Mary was surrounded by four Marys—known to history as

FORTY-SEVEN HATCHERIES

Canada Will Have that Number When Few More are Completed

The Fisheries Department of the Dominion Government are increasing the number of hatcheries, establishing additional ones for lobsters on the Nova Scotian coast and new ones for salmon on the British Columbian coast, while a new one on the Yukon coast, while a combination whitefish and salmon hatchery is to be built at Port Arthur. When these are completed there will be forty-seven hatcheries throughout Canada established by the Fisheries Department.

For Sale or Rent.

On Fidler's hill, a large seven roomed frame house, with summer kitchen and woodshed attached, a good stone cellar, cistern, stable and a garden. Apply to Mr. Thos. Graham, Fenelon Falls, or 362 Huron St., Toronto.
