

You  
Know

That any old shoe will not fit your feet.

WE KNOW

That with Invictus shoes we can give your feet every comfort and you will have style and quality as well. Come in—try a pair, then you'll know what we know.

The Best Good Shoe—Invictus

A. & C. MCFARLAND.

YOUR WATCH

Should be wound regularly and cleaned at least every eighteen months. In that time the oil will have lost its lubricating qualities and the parts begin to wear.

Does Your Watch Need Attention?

We have a well earned reputation for doing good watch work.

Orders by mail promptly attended to.

Making Criminals.

Barrie Advance.

Some time ago attention was directed to the practice in vogue in county gaols of turning criminals out without a cent in their pockets to take them back to where they are known and may procure work. Sometimes it is some poor fellow whose over-indulgence in liquor has earned him thirty days. When he is released he looks for employment, and the question is asked, "Where have you been working?" If he answers that he has been serving thirty days, is it ten to one that he will be refused. His next resource after several unsuccessful attempts to obtain employment, is to beg or, perhaps, becoming discouraged and hardened against society, he will steal. Back to his own way he drifts, and possibly to another term. Are we making criminals by this vicious system? It does not look as if we were reforming the unfortunate, anyway.

Red Light as a Milk Preservative.

Scientific American.

Interesting experiments have been recently made concerning the influence of red light on milk. That light as such is detrimental to the conservation of milk has long been known, but which of the rays really did the mischief has only now been determined, when it was found that the red rays are beneficial, while those towards the violet side of the spectrum caused the milk to "turn." Pure, fresh milk put in an uncolored glass bottle in the full sunlight, and sterilized and pasteurized milk, placed also in uncolored bottles in the same place, were found at the end of the day to be completely spoiled and unfit for consumption.

Absolutely no difference could be detected between the ordinary "fresh" milk and that which had been sterilized—both were equally bad. But if even unsterilized milk is placed in a red bottle or in a bottle covered with red paper in the full sunlight it keeps perfectly good for ten hours. In Holland much care is being expended on delivering pure milk to the public. The "fresh milk" is brought around by the milkmen in large, covered brass vessels placed on small hand-carts. On these same hand-carts are open holders to contain the bottles of pasteurized or sterilized milk, which costs rather more, but to which many persons give the preference, as it is considered more hygienic. Now, however, that experiments have proved how easily even this pure, sterilized product "turns" by the influence of the light, it may soon be expected that every dairy will adopt red bottles. Until a sufficient quantity of such shall have been manufactured, the bottles will be wrapped in red paper.

Conger—Thurston.

A pretty wedding celebrated on Wednesday, June 11th, at Suver, Oregon, was that of Miss Alice Thurston to Mr. Laurence L. Conger. The ceremony was performed by Rev. F. M. Baum, of Portland, the bridal couple standing beneath an arch of locusts and beautiful Caroline Testate roses. The young couple were unattended. The bride wore a gown of pearl grey chiffon cloth with draped skirt and carried a sheaf of white roses and ferns. Miss Alice Thurston, of St. Helen's Hall, Portland, cousin of bride, rendered the wedding march. Only the immediate relatives and friends were present.

After the ceremony a dainty dinner was served, the decorations being prettily carried out in pink and white roses. Later in the evening the bridal party motored to Albany, departing on the Oregon Electric for Portland and other points west. On their return Mr. and Mrs. Conger will reside on their ranch at Suver. Going away the bride wore a suit of grey cloth fana trimmed with white, and a white Milan hat trimmed with flowers and satin. The bride is a daughter of Mr. Jas. H. Thurston, formerly of Fenelon Falls, Ont., where they resided until four years ago, when they moved to Suver, Oregon, where they are engaged extensively in farming.

Personal.

Messrs. John D. Smith and J. H. G. McVity were at the Falls this week.

Mr. James Naylor, of Michigan, who is visiting his brother Isaac at Islay, spent Saturday at the Falls, renewing old acquaintances.

Mrs. Jas. Cameron and her daughter, Miss Cameron, left on Tuesday for Vancouver and Seattle on a visit to relatives. Mr. Thos. Robson left on Monday, and will accompany them to the coast from Toronto.

Mr. Ray Burgess of Toronto is spending a few days at the Falls this week.

Miss Harvey of Toronto was the guest of Mrs. French over Sunday.

Rev. H. B. Kenny of Bowmanville was at the Falls on Tuesday and Wednesday.

Mrs. A. Townley is spending a few days in Toronto this week.

Mrs. W. B. Jordan and son left on Tuesday to visit relatives in Toronto.

Mr. and Mrs. Dykes of Toronto spent the week-end at the Falls.

Dr. M. McEachern is spending the week in town.

Miss Moore of Peterborough is visiting her aunt, Mrs. T. Cashore.

Mr. Johnstone Penrose of Toronto is a visitor to the Falls this week.

Miss Ada Mitchell returned on Wednesday from an extended visit to relatives in Winnipeg.

Mr. Livingstone Kelly, of Hamilton, is visiting his parents, Mr. and Mrs. C. Kelly.

Mr. Harold Wilson, of Toronto, is spending a vacation with his parents, Mr. and Mrs. Geo. Wilson.

Mr. A. W. Spence was in town on Monday.

Mr. T. Buckley of Lindsay spent Monday at the Falls.

Miss McVity of Port Hope is a guest at the Hotel Kawartha.

Mr. and Mrs. Metzger and son, of Rochester, are visiting Mrs. Archer.

Mr. Dick Junkin of Toronto is visiting friends at the Falls.

Mrs. Jno. Cook, of Cobocok, spent Thursday in town.

Women's Institute.

The summer meeting of the Women's Institute was held on Wednesday afternoon, June 18th, in Dickson's hall, with a good attendance. The meeting was presided over by Mrs. James Lamb and was opened in the usual manner, after which the business of the branch was transacted. After the roll call a very interesting address was given by Miss Winnifred Harvey, graduate of Toronto University, and an excellent speaker. The subject of her address was "Tendencies in the present development in Canada," and she treated it in an admirable manner. At the close of the address Miss Tilly Patten rendered a piano solo in good style. Miss Harvey then gave a short address on "How to Dress Economically and Well," which was much appreciated. She gave a practical demonstration of cutting a one-piece dress which could be made in half an hour, requiring only three yards of material 36 inches wide to make a dress for a person of average size.

Agricultural Society Meeting.

There will be a meeting of the Fenelon Agricultural Society on Saturday, 28th, at two o'clock, at the McArthur House, for the purpose of discussing revisions in the prize list, and other business.

ST. JAMES' CHURCH.

Miss Tura Moore, of Toronto, at present visiting Mrs. Cashore, will sing in St. James' Church on Sunday evening next.

EXCURSION TO CHEMONG.

St. Andrew's Church annual excursion will be held on Tuesday, July 8th. The steamer Stoney Lake has been engaged, and will run to Chemong Park, calling at Sturgeon Point, Bobcaygeon and intermediate points. The boat will leave Fenelon Falls at 8 o'clock, and Chemong Park at 3.30. Tickets 50c.; children 25c.

BAPTIST EXCURSION.

The Baptist Church will run their annual boat excursion on Wednesday, July 2nd, to Port Perry. The steamer Esturion will leave the lower wharf at 8 o'clock a. m., and will call at upper wharf at Sturgeon Point, going and returning. Tickets 50c. and 25c. The Esturion has been extensively improved, and is in better condition than ever for an enjoyable outing.

ANOTHER BUTTERFLY.

Mr. P. C. Burgess caught another "comma" butterfly near the power house a few days ago. It is unnecessary to say it was a "full stop" when captured. The butterfly is a trifle larger and stouter and a much more gaudily colored specimen than the first one. The general color is gray. The trimmings are red, white, black and light and dark gray. Its body is decorated with narrow rings of alternate gray and white, something after the style of a zebra or a Plymouth Rock rooster, on a very delicate and fine scale.

RUNAWAY.

About 9 o'clock p. m. on Saturday a horse which Mr. Ernest Lake, of Cobocok, left tied in front of Aldous' hotel, took fright at a piece of paper on the road, broke loose and ran away, crossing both bridges and smashing the buggy he was drawing, and was caught and stopped by Mr. Otto Pohlson somewhere near Brooks' hotel.

STRAWBERRY FESTIVAL  
TO-NIGHT

At the Methodist parsonage. Ice cream, strawberries and refreshments, and a good programme. Open from 7 to 10.

Mr. Richard Hadwin of Cameron lost three sheep and five lambs on Friday night last, and was much puzzled to account for their disappearance. On Monday he got track of them near Glenarm, seven or eight miles from Cameron. The sheep had evidently been chased by dogs, and separated from the rest of the flock, as one of them when found showed marks of being worried.

A very interesting and entertaining programme was given by the Cobocok Dramatic Club on the 13th and 14th at Cobocok under the auspices of the Women's Institute. The programme consisted of Gilbert & Sullivan's dramatic cantata "Trial by Jury" and "Leu on Parle Francais," a one-act comedy. Those who presented the programme rendered their respective parts in a most capable manner, displaying marked talent in their interpretation of the various characters. The entertainments were well patronized by the people of Cobocok and surrounding communities, showing that they appreciated the efforts of the members of the Dramatic Company.

Powles' Corners.

Correspondence of the Gazette

Quite a number from around here went to Lindsay last Saturday to see the circus, and it was pronounced a stupendous show.

The social here in the school ground last Friday evening was very successful. About thirty dollars was realized.

There has been some loss of live stock in this section. Messrs. E. Sims and Wes. Wagar each lost a mare and foal, and Mr. Thos. Harrison lost two colts.

Mrs. L. Rabb (nee Miss Garnet Quinn) of Toronto spent a few days here the guest of the Misses Powles.

Miss Gertrude Povlos has returned from Toronto.

Mr. N. C. Hart is spending a few days here visiting.

Mrs. G. A. Powles of Chicago is expected about the 27th for a few days visit here. Mr. W. E. Powles and his Uncle George are expected about the 15th of July.

The electric storm that passed over here on Sunday the 15th left a job for a mason. Mr. and Mrs. Jno. C. Wagar were away from home and the lightning struck the chimney of the house and passed down below, and tore off some plaster. The result might have been more serious.

Calendar Stone of the Aztecs

The famous Aztec calendar stone, now in the National Museum of Mexico, is a block of basalt weighing 25 tons and having a diameter of 11 feet. Encircling the head of the sun god is a diadem bearing hieroglyphics representing the divisions of time and the Aztec method of numbering the years. The number of days in their year was 365, as in ours. Each year had a different emblem repeated every four years. The first year was called Tochtli, or rabbit; the second, Acatl, or reed; the third, Teepal, or flint; the fourth, Calli, or house. The years were further arranged by thirteens, four such periods making a Mexican age. When the City of Mexico was taken by Cortez in 1521, and the great temple destroyed, the calendar stone was left in the square. It was buried in 1555, and not recovered again until 1790.

Work and Food

According to a French scientist a man who eats liberally should recuperate in weight every 24 hours; if he loses weight, he works to excess; if he gains he has not expended his maximum effort.

Disinfecting Baggage

Cars containing apparatus for disinfecting the clothing and baggage of passengers who have been exposed to contagious diseases have been put into service by an Italian railroad.

The Wind Put to Work

Coal is hoisted and water pumped from a Kansas mine by a specially designed windmill with four broad vanes.

DIED.

NORTHEY.—At Fenelon Falls, on Saturday, June 21st, 1913, Maggie Ethel Northey, fourth daughter of Felix Northey, aged 14 years, 7 months and 2 days.

CARD OF THANKS.

Mr. and Mrs. Felix Northey desire to thank the neighbors and friends who so kindly assisted them in the time of their bereavement, and also the teacher and pupils of the public school.
