## THE EDIBLE SNAIL.

Gathered By the Hundreds of Thousands in France.

The edible snail, which is considered a delicacy in France, is a very different kind of snail from that which the average man clears out of the back garden, though it is rather similar in appearance. It is, however, about five times as large as the garden snail. The best for the table, according to Harper's Weekly, are found in Burgundy, where they are gathered by hundreds of thousands in the vineyards.

These snails during the season cost from twelve to fifteen cents a dozen. A dozen snails form just an appetizer, as it were, before a meal. The season lasts from November to February, those months when the snail buries itself underground to pass the winter.

Edible snails are never eaten raw, but are cooked and eaten in various ways. In Paris a dozen snails are served piping hot on a dish, and they are extracted from their shells with a special snail fork and eaten whole.

In parts of France the cooked dainty is chopped up with butter and herbs before being eaten. In Marseilles the snails are steeped for one or two days in milk, to make their flesh tender.

Mrs. T. Harris, of Tyneside, Ont., knows all about GIN PILLS. "I am taking my third box of GIN PILLS," she writes. "The pains across my back and kidneys has almost gone. Be cheerful and seek not eternal help, nor the tranquility which others give. A man must stand erect, and not be kept erect by others.—Marcus Aurelius.

Most people think they are virtuous merely because they are tame and inoffensive. Tameness is not a virtue, it is merely the absence of a vice.—J. S. Blackie.

**The Small Boy Again.**

A clergyman famous for his begging abilities was once catechising a Sunday School. When comparing himself as pastor of the church to a shepherd, and his congregation to the sheep, he put the following question to the children—"What does the shepherd do for the sheep?" To the confusion of the minister a small boy in the front row piped out, "Shears them!"

## ORIGIN OF PETROLEUM.

Observations May Further Solution of Some Problems.

The principles governing the origin and mode of occurrence of petroleum and natural gas are as yet but fragmentarily grasped by geologists. Every oil field examined in detail contributes its data for use in the eventual interpretation of the problems, and each pool is studied with keen alertness for the discovery of some key that may aid in the co-ordination of the data, which sometimes, according to the region and conditions, seem, on account of our lack of knowledge, even to be in conflict.

The observations made by the geologists of the United States geological survey in the oil and gas fields of California and Kentucky promise to further the solution of some of the problems, and by pointing out the relations of oil and gas occurrence to the geological structure of the regions examined they have rendered important scientific as well as economic aid in oil and gas development; but the basic principles controlling the widely-varied modes of occurrences in the kinds of oils in widely separated regions are possibly still far from view.

## HUNGER BRINGS HEALTH.

Fasting As a Cure for Many Troublesome Complaints.

"These hunger-strikes, doctor," inquired a London Answers man of a famous London physician, "are they dangerous to life?"

"Oh, yes!" said the doctor. "They may be dangerous for a delicate woman, but incidentally they cure a lot of troublesome ailments."

"Fasting relieves pain of almost every kind. If you have a bad toothache, refrain from food for twenty-four hours, and ten to one your toothache will vanish."

"Are you gouty or rheumatic? Then the sovereign cure is a good long fast."

"Paralysis you probably think is an incurable disease. No doubt many forms are, but miraculous recoveries have occurred under treatment by fasting. Men who had abandoned all hope, and who then tried fasting, for thirty, forty, and even fifty days, had the use of their limbs completely restored."

"How does this happen? My theory is that certain waste matters, poisoning the nerves, are often the cause of the disease, and by a prolonged fast these are removed."

"I have known a patient suffer for years from chronic catarrh of the nose and air passages. No doctor could cure the trouble, but a twenty days' fast completely cured it, in this instance."

## Pleurisy Pains Vanish! Chest Colds Cured!

**NERVILINE HAS NEVER FAILED TO CURE.**

Don't suffer! Nerviline is your relief. Nerviline just rubbed on, lots of it, will ease that drawn, tight feeling over your ribs, will destroy the pain, will have you smiling and happy in no time.

"I caught cold last week while motoring," writes P. T. Mallory, from Linden. "My chest was full of congestion, my throat was mighty sore, and I had the fiercest stitch in my side you could imagine. As a boy I was accustomed to have my mother use Nerviline for all our minor ailments, and remembering what confidence she had in Nerviline, I sent out for a bottle at once. Between noon and eight o'clock I had a whole bottle rubbed on, and then got into a perspiration under the blankets. This drove the Nerviline in good and deep, and I awoke up next morning fresh as a dollar and absolutely cured. Nerviline is now always part of my traveling kit, and I will never be without it."

There was recently haled into court a little Irishman to whom the thing was a new experience. He was, however, unabashed, and wore the air of a man determined not to get the worst of it.
