

Powles' Corner.

Correspondence of the Gazette

Mr. Charles Hepburn, of Fenelon Falls, was in this section last week cutting wood for a few of our farmers.

Mr. E. Kendall, of this section, is out on business with his wood cutter.

Mr. J. C. Parris has resigned the secretaryship of the school board, and Mr. James Slater has accepted the position.

It is a great mistake that there are not more farmers in the House of Commons at Ottawa, as representatives, instead of doctors, lawyers and lumber merchants. One of our farmers, who is a Conservative in politics, says that he does not care how much money is spent at Ottawa if they spend it right. That is an improper view to take; perhaps there are some people who don't know when they are spending it right.

Mr. Hugh Milloy is home from the North-west on a visit.

Mr. W. H. Cullis, of Cambourne, is on a business trip here a few weeks.

A sleigh-load of Zion people spent a few hours last week with Mr. and Mrs. W. H. Powles.

Some of the young people of this section and a number from outside "tripped the light fantastic toe" last Tuesday evening at Mr. R. Parks.

About half a dozen young people from Cannington called on Mr. and Mrs. W. Day on Sunday, Jan. 25th.

Bethel

Correspondence of the Gazette.

A party was held at Mr. William Patterson's on Tuesday evening last, about thirty being present. Dancing and games were kept going until the early hours of the morning, Miss Patterson and Master Garnet Junkin supplying the music. A very enjoyable night was spent, terminating in a nice supper, and all went home thanking Mr. and Mrs. Patterson for their hospitality.

Another pleasant event was a party at Mr. Bruce Junkin's the same evening, Mr. Wm. Kelly taking a load of young people from Bethel. Dancing was kept up until the wee sma' hours, and all had a first class time.

Fire-killed Spruce Useful

The manufacture of violins and sound boxes for talking machines offers two uses that have been found for fire-killed spruce timber, large quantities of which are found in the forests of the Rocky Mountains.

A maker of high-grade violins claims that fire-killed Englemann spruce is the best material he has ever found for the manufacture of violin tops. The value of the wood lies in its very light weight, its fine straight grain, and its freedom from rosin. Wood for violin tops must be straight-grained and absolutely edge-grained; that is, cut at right angles to the annual rings, which for this use should show from twenty to thirty to the inch.

MARRIED

EVERSON—JUNKIN.—At the home of the bride's mother, by Rev. Mr. Webber, Mr. W. B. Everson to Miss Emily Junkin, eldest daughter of Mrs. Thos. L. Junkin, all of the township of Verulam.

DIED

WOOD.—At Fenelon Falls, on Friday, Jan. 30th, 1914, Harriet Acton, wife of Mr. Edwin Wood, aged 76 years, 2 months and 17 days.

NOTICE.

Applications will be received up to 12 o'clock noon on Monday next, Feb. 2nd, for the position of Assessor of the Village of Fenelon Falls for the year 1914. Address E. FITZGERALD, Clerk.

SPENDING AN ART

Those Who Accumulate Wealth Should Dispose of It Themselves

It is not necessarily a great achievement to accumulate millions. The accumulation is merely a means to an end. If you merely pile up the millions and die before you have done anything with them, or indicated what you want done, your life is a failure. You have failed to impress your personality upon the world. Somebody else will control the spending of the money, will say whether it is to be spent in luxury or in benevolence, or in the development of some industry, or in the advocacy of a cause. The spender's personality, not yours, will be impressed upon the world.

The lesson would seem to be that after making due provision for your old age and your family, you should spend your money as you go. In that way you can control it, devoting it to such enterprises, whether industrial or philanthropic or otherwise, as you deem worthy.

A millionaire may live as frugal a life as his clerk. But what avails his frugality if he leaves millions to be squandered by an extravagant family in senseless luxury and show.

It is true that our present system places too much power in the hands of a man of enormous wealth—more power than any wise man, conscious of his own limitations, would like to enjoy. But as the power is there, it must be used; and it is foolish to devote every faculty and every pound of energy to accumulating the power, and none to the wise exercise of the power. Spending is quite as important as getting.—Toronto Star Weekly.

TREES DYED AS THEY GROW

Sap Carries Stain Upward Through the Trunk

Staining wood by inoculating the growing tree with dye fluids is an industry described in the Independent. The staining solution is introduced into the tree by holes bored through the trunk near the ground, and the color spreads with the flow of the sap. The liquid is absorbed very rapidly. A Scotch fir was known to take up three gallons in two days.

When a tree so treated is cut up it is often found to be beautifully veined. This is particularly true in the tropics, because of the rapid upward rush of the sap at certain seasons.

Only dyes soluble in water will serve, and many of these are useless. One per cent. solutions have been found to be the best, and the dye best suited to each wood must be determined in advance by experiment.

"Birch was splendidly colored," the article says, "by malachite green and methylene blue, yet eosin produced a very streaky effect. Eosin is not fast to light, another objection. Aniline chloride reacts with the lignin of the wood to produce a beautiful yellow. In fact, many chemicals not in themselves dyes, are suitable, because they act on compounds in the wood to form colors. A splendid salmon-red may be secured by using paraphenylenediamine. Tannic acid acts in a different way. After it has penetrated the wood thoroughly the tree may be cut and sawed into boards and fumed with ammonia just as oak, chestnut and any wood naturally containing tannic acid is fumed. Treated with potassium dichromate, a rich brown results with a wood which has previously absorbed tannic acid. Thus cheaper woods may be made to equal the more expensive oak in appearance."

"Ban's" New Idea

World series baseball contests of nine games, at a reduction in the scale of prices charged for admission, are favored by Ban B. Johnson, president of the American League. President Johnson believes that an extension in the number of championship games at a reduced price, would be more satisfactory than the present arrangement of seven games. More people would see the games at a more reasonable price and the additional games would prevent the gate receipts from suffering.

MR. D. M. McINTYRE

Chairman of the Ontario Railway Commission, a judicial body which like the Dominion Board, handles the cases which come before it with a lack of formality that one usually associates with a police court.

Alfalfa yields from two to three times as much as clover or timothy, and is more valuable hay.

Alfalfa is the agricultural wonder of the twentieth century.

Alfalfa contains more protein per ton than clover or corn.

DEYMAN'S FOR FURNITURE

We carry a good stock of the best furniture at attractive prices. Always pleased to show goods.

Picture framing a specialty.

L. DEYMAN & SON
FURNITURE DEALERS

DO YOU ENJOY THAT COLD ?

If not, take Laxacold. Laxacold starts everything working, and before you realize it you are feeling alright again.

35 Tablets for a quarter.

Druggist and Stationer
FENELON FALLS

Take Care

Of the old rigs. New ones cost money. We make a specialty of repairing, repainting, etc. If you have anything that needs fixing up bring it here. Or if you need a new one we can build it—good as the best.

F. C. CHAMBERS,

Colborne Street
Fenelon Falls.

He leaves home a boy—he comes back a man. Have a good photograph made of him before he goes out into the big world, before the boyish features and expression have taken on the older impress.

Don't trust to memory to recall them, memory plays queer tricks on us all.

Make a date with your photographer to-day and spare yourself the regrets of to-morrow.

J. H. STANTON.

You Can Make Someone Happy

By giving them your piano votes if you are not saving them for yourself.

If you purchase a \$5.00 Trading Book it entitles the contestant to 25,000 votes at the time of purchase and 5,000 more votes when the book is used up.

Remember, no favors will be shown, and every person will have an equal chance to secure the Piano.

W. BURGOYNE & SON

The King of Ranges— "BUCK'S HAPPY THOUGHT"

THE day has gone past when a wise woman will put up with an inferior cooking apparatus. She has heard of

The "Happy Thought" Range,

The Corrugated Oven

and her neighbors tell her what it will do.

If by chance you do not know the merits of The "Happy Thought" you owe it to yourself to investigate. See the Range, look into the firebox and flues, weigh the covers, note the patented dampers, the ventilated, illuminated oven, the corrugated oven plates, and all the different features that make this Range so different and so superior.

You don't know true household comfort if you don't know The "Happy Thought" Range.

Write the Manufacturers for Illustrated Catalogue.
